development and population would require less capacity, the utilities and service systems serving the City are sufficient for both Alternative 3 and the Project. Impacts to the City's infrastructure systems and water supply would be reduced under Alternative 3 and impacts would remain less than significant.

Transportation

Similar to the proposed Project, all roadways, bikeways, and intersection improvements would be designed to City or Caltrans engineering and safety standards, as appropriate. Future development under the General Plan 2045 would also be required to comply with street design standards, Manual of Uniform Traffic Control Devices requirements, building code requirements, fire code requirements and zoning regulations, ensuring that this alternative would result in less than significant impacts with respect to design hazards and emergency access.

Under existing conditions, the City's overall land use diversity score of 81.5. An ideal score is 100. Scores that fall below the impact threshold (75.4) would indicate a significant impact. If the population drivers anticipated in the proposed Project persist through this period but Arcata reduces its growth rate, the new population would be absorbed in nearby communities instead of in Arcata. Considering the prime driver for population growth is Cal Poly Humboldt, this has implications for vehicle miles travelled and greenhouse gas and more people would drive into Arcata from outside the City. The countywide average currently has a score of 74.3, which is lower than the impact threshold. Alternative 3 may fall below the impact threshold of 75.4 and therefore be significant and unavoidable.

Agriculture and Forest Resources

Alternative 3 would not propose zoning changes or increased development on agriculture or forest lands. Therefore, Alternative 3 would have equivalent impacts to agricultural resources with respect to conversions of agricultural land (less than significant), conflicts with agricultural zoning or a Williamson Act contract (no impact), or other changes resulting in conversion of farmland (no impact).

Neither the proposed Project nor Alternative 3 would have significant impacts to forest resources as no changes to zoning of forest land or forest management practices would occur. In both cases, removal of vegetation could occur to accommodate construction; however, potential removal of trees during infill development would be minor, if at all, and removal of trees would typically require a permit and likely require mitigation to offset the loss of that vegetation. Therefore, the impacts related to agriculture and forest resources would be equivalent to the proposed Project.

Biological Resources

As a result of existing federal and state regulations protecting natural resources, and existing and proposed policies under the General Plan 2045 that would require assessment, inventories and buffers for protection of natural resources, it is unlikely that implementation of this alternative, would have a substantial adverse impact directly or indirectly on a special-status species via construction in undeveloped lands. The regulations protecting biological resources in the existing General Plan and mitigation measure proposed in this EIR would be sufficient to mitigate the impacts to biological resources to a less than significant level.

Geology and Soils

Activities under Alternative 3 and General Plan 2045 may include building construction, shallow excavation and repaving, which could potentially be ruptured by the Fickle Hill fault, resulting in a potentially adverse impact. General Plan 2045 policies would reduce impacts from seismicity and liquefaction risks to a less than significant level.

Construction activities, including cut, fill, removal of vegetation, and operation of heavy machinery would disturb soil and, therefore, have the potential to cause erosion. These construction activities would be performed in compliance with the Best Management Practices prescribed in the Arcata Municipal Code, North Coast Regional Water Quality Control Board regulations, and the California Building Code. Therefore, no substantial soil erosion or loss of topsoil would result from development occurring, and the potential impact would be less than significant. Alternative 3 would not require the use of additional septic tanks or an alternative wastewater disposal system.

Development within the City could uncover paleontological resources which are protected by state law. If paleontological resources were discovered, a potentially significant impact could occur. Mitigation Measure GEO-1 inadvertently discovery protocol, would reduce the potential impact to less than significant. Therefore, the impacts related to geology and soil would be less than significant with the incorporation of mitigation, and equivalent to the proposed Project.

Hydrology and Water Quality

Under Alternative 3 less development would be likely to occur and therefore less water quality impacts due to construction and increases in impervious surface area.

Similar to the Project, the General Plan 2045 policies, Land Use Code, City's MS4 requirements, along with other state and federal regulations would reduce water quality, flooding, and groundwater impacts of Alternative 3 to a less than significant level. Hydrology and water quality impacts would be reduced under Alternative 3, but impacts would remain less than significant.

Mineral Resources

Under both Alternative 3 and the proposed Project, construction of buildings and roads would use aggregates, such as those extracted within Humboldt County outside of the City. Alternative 2 would promote less development, and therefore would use fewer mineral resources. The impact to mineral resources would remain less than significant.

Wildfire

Alternative 3 would result in a smaller increase in development, population, and employment, compared to the proposed Project. Therefore, wildfire impacts would be reduced under Alternative 3, and impacts would remain less than significant due to the low wildfire risk in the City.

Energy

By indirectly promoting population growth away from City centers, Alternative 3 reduces transit-supportive densities, promoting longer trip lengths, increasing pollution and emissions, and reducing participation in alternative transportation methods, thereby increasing energy use (fuel use). However, similar to the proposed Project, new buildings, redevelopment, and building additions would be subject to California Title 24 Energy Code and CALGreen Code Mandatory Measures. Other land use agencies within Humboldt County are also required to comply with state regulations regarding energy conservation and renewable energy infrastructure. Therefore, impacts under this alternative, as with the proposed Project, would remain less than significant.

7.4 Comparison of Alternatives

Table 7-1 (Comparison of Alternatives to the Project) compares the impacts of the proposed Project with each of the alternatives. Significant and unavoidable air quality impacts would remain with all three alternatives.

As summarized in Table 7.4-1, the No Project Alternative has a greater impact than the proposed Project in relation to greenhouse gas impacts and population and housing because state policies related to greenhouse gas emissions and state housing needs would not be met. The No Project Alternative would reduce significant impacts to cultural resources and noise due to the location and type of development.

Potential environmental impacts resulting from Alternative 2 are generally equivalent to the proposed Project, except Alternative 2 has less impact in relation to cultural resources and noise.

Alternative 3 has a greater impact than the proposed Project in relation to greenhouse gas, land use and planning, population and housing, and transportation due to inconsistencies with state and local policies. Alternative 3 would reduce significant impacts to aesthetics, cultural resources, and noise due to the lower intensity development associated with the reduced population estimate.

Table 7.4-1 Comparison of Alternatives to the Proposed Project

Resource Category	Proposed Project	No Project	Alternative 2	Alternative 3
Aesthetics	Less than significant	=	=	-
Air Quality	Significant and unavoidable	=	=	=
Cultural Resources	Significant and unavoidable	-	-	-
Greenhouse Gas Emissions	Less than significant with mitigation	+	=	+
Hazards and Hazardous Materials	Less than significant	=	=	=
Land Use and Planning	Less than significant with mitigation	=	=	+
Noise	Less than significant with mitigation	-	-	-
Population and Housing	Less than significant	+	=	+
Public Services and Recreation	Less than significant	=	=	=
Tribal Cultural Resources	Less than significant	=	=	=
Utilities and Services Systems	Less than significant	=	=	=
Transportation	Less than significant	=	=	+
Agricultural Resources	Less than significant	=	=	=
Biological Resources	Less than significant with mitigation	=	=	=

Resource Category	Proposed Project	No Project	Alternative 2	Alternative 3
Geology and Soils	Less than significant with mitigation	=	=	=
Hydrology and Water Quality	Less than significant	=	=	=
Mineral Resources	Less than significant	=	=	=
Wildfire	Less than significant	=	=	=
Energy	Less than significant	=	=	=

Notes: "-" indicates an impact that is less than the proposed Project (environmentally superior)
"+" indicates an impact that is greater than the proposed Project (environmentally inferior)
"=" indicates an impact that is equal to the proposed Project (neither environmentally superior nor inferior)

7.5 Environmentally Superior Alternative

Table 7.4-1 (Comparison of Alternatives to the Proposed Project) compares the significance of the potential impacts for the proposed Project with the alternatives considered in the preceding sections. Of the three alternatives, Alternative 2 (Dispersed Development) is the least environmentally impactful alternative, as it avoids significant and unavoidable impacts to historic resources and noise impacts are less than significant without the need for mitigation.

The proposed Project and Alternative 2 would mainly result in equivalent environmental impacts and require identical mitigation measures for potential environmental impacts to remain less than significant. Both the proposed Project and Alternative 2 would result in significant and unavoidable air quality impacts due to exceeding the North Coast Air Quality Management District's stationary sources emission thresholds for some toxic air contaminant emissions.

Alternative 2 would involve development dispersed throughout the City, however, would result in slightly less development and reduced population. Compared to the proposed Project, this development pattern would reduce impacts to cultural resources and noise. Alternative 2 does not propose the demolition of two historic structures in the Gateway Area, which is currently proposed under the Project. Under Alternative 2, if future projects propose demolition or renovation, General Plan Policies H-2 and H-5 would identify and encourage retention of potential historic landmarks and would prevent the premature demolition of structures while considering the potential for preservation if they are historically significant. Because Alternative 2 does not propose concentrated new development in Infill Opportunity Zones, mitigation would not be required to reduce noise impacts to sensitive uses near roadways and commercial/industrial facilities.

Compared to the proposed Project, Alternative 2 has slightly increased impact, though still less than significant, related to hazards and hazardous materials, wildfire, transportation, and hydrology. Alternative 2 would have higher wildfire risk due to increased development outside core urban City areas. Alternative 2 would not promote a balance of mixed uses to create neighborhoods that offer a car-free lifestyle and minimize vehicle trips. The City's land use diversity score, and therefore VMT rates, would not improve. Additionally, Alternative 2 has the potential to increase impervious surfaces slightly more than the proposed Project due to the dispersed development. Infill, promoted by the proposed Project, would occur on previously developed parcels that generally have a higher quantity of impervious surfaces. The dispersed

development pattern would be more likely to occur on undeveloped parcels, increasing impervious surface area throughout the City.

In some cases, Alternative 2 would have slightly less impact than the proposed Project. Generally, less development and population would require less water supply and wastewater treatment. However, the current utilities and service systems capacity and quantity are sufficient for both Alternative 2 and the Project, and a less than significant impact regarding utilities and service systems would occur.

Because Alternative 2 would result in an overall reduction in the level of impacts identified for the proposed Project, Alternative 2 has been identified as “environmentally superior” to the proposed Project.

7.6 References

n/a

8.0 Other CEQA Required Sections

8.1 Energy Use

To guarantee that energy implications are considered in project decisions, CEQA Guidelines Appendix F, *Energy Conservation*, requires that EIRs "include a discussion of the potential energy impacts of proposed projects, with particular emphasis on avoiding or reducing inefficient, wasteful and unnecessary consumption of energy." An evaluation of potential impacts related to the energy consumption of the Project and the applicability of state or local plans for renewable energy and energy efficiency is discussed in Section 6.2 (Energy).

8.2 Growth Inducement

The CEQA Guidelines require that an EIR evaluate the growth inducing impacts of a proposed project. The CEQA Guidelines describe growth-inducing impacts in the following manner:

> *"Discuss the ways in which the proposed project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. Included in this are projects which would remove obstacles to population growth (a major expansion of a waste water treatment plant might, for example, allow for more construction in service areas). Increases in the population may tax existing community service facilities, requiring construction of new facilities that could cause significant environmental effects. Also discuss the characteristic of some projects which may encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively. It must not be assumed that growth in any area is necessarily beneficial, detrimental, or of little significance to the environment." (CEQA Guidelines Section 15126.2[d]).*

Projects can have direct and/or indirect growth inducement potential. An example of direct growth inducement would be the construction of new housing. Examples of indirect growth inducement could include establishing substantial new permanent employment opportunities and removing obstacles to population growth (e.g., the expansion or improvement of utilities which allows for more growth within a service area). Growth inducement itself is not an environmental effect but may lead to an environmental effect(s). Environmental effects may include increased demand on other public services and infrastructure, increased noise and traffic, degradation or loss of plant or animal habitats, degradation of air and water quality, or conversion of open space land to urban development.

General Plan policies will guide future growth in the City through the year 2045. Implementation of the General Plan 2045 is not specifically intended to induce growth, but to manage and direct growth so that it maintains quality of life and achieves other important community goals. The General Plan 2045 includes policies to maintain an Urban Services Boundary, administer annexations, and preserve open space in and around the City.

The General Plan 2045 proposes no major infrastructure or public service extensions that are typically considered growth inducing. The growth that is projected is primarily infill, taking advantage of existing infrastructure and services. Therefore, the General Plan 2045 would not induce substantial economic or population growth in the surrounding areas, outside the City limits.

8.3 Significant and Unavoidable Impacts of the Proposed Project

Section 15126.2(c) of the CEQA Guidelines require that an EIR identify any significant environmental effects that cannot be avoided if the Project were implemented, including those that can be mitigated but not reduced to a level of insignificance.

Mitigation measures proposed by the City have been identified throughout Chapter 3 through Chapter 6 of this Draft EIR and would mitigate potentially significant project effects to less than significant. Mitigation measures also are summarized in Table 1.11-1. The following impacts would remain significant and unavoidable after feasible mitigation measures are applied:

- The Project would result in a cumulatively considerable net increase of criteria pollutant for which the Project region is non-attainment under an applicable federal or state ambient air quality standard.
- The Project would expose sensitive receptors to substantial pollutant concentrations.
- The Project would contribute to a cumulatively significant impact to air quality.
- The Project would cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5.
- The Project would contribute to a cumulatively significant impact to historical resources.

8.4 Significant Irreversible Environmental Changes

Section 15126.2(d) of the CEQA Guidelines requires that an EIR include a discussion of significant irreversible environmental changes that would result from project implementation. The CEQA Guidelines describe irreversible environmental changes in the following manner:

> *"Uses of nonrenewable resources during the initial and continued phases of the project may be irreversible since a large commitment of such resources makes removal or nonuse thereafter unlikely. Primary impacts and, particularly, secondary impacts (such as highway improvement which provides access to a previously inaccessible area) generally commit future generations to similar uses. Also irreversible damage can result from environmental accidents associated with the project. Irretrievable commitments of resources should be evaluated to assure that such current consumption is justified." (CEQA Guidelines Section 15126.2[d]).*

This Draft EIR identifies a number of potentially significant impacts, most of which can be mitigated by the policies, implementation measures, and other provisions in the General Plan 2045. The following represent the irreversible commitment of resources for the City's development. These include:

– Commitment of materials to construct residences, business, public facilities, transportation facilities, and other infrastructure;
– Consumption of water, energy and fuel;
– Commitment of public services and utilities;
– Release of materials into the air or waterways; and
– Demolition of historic resources.

Construction activities associated with future development accommodated under the General Plan 2045 would result in an irretrievable and irreversible commitment of non-renewable resources through the use of construction materials. This would include the use of fossil fuels (such as gasoline, diesel and oil), and the use of earth minerals and ores (such as concrete and steel). These and other changes listed above have been analyzed and, to the extent feasible, mitigation measures have been proposed to reduce potential impacts to a less than significant level. Consumption of these resources would occur with any development in the region and are not unique to the City or General Plan 2045.

Growth facilitated by the General Plan 2045 would require an irreversible commitment of police and fire protection, water supply, wastewater treatment, and solid waste disposal services. As discussed in Sections 3.10 (Public Services and Recreation) and 3.12 (Utilities and Service Systems), potential impacts to public services and utilities would be less than significant following implementation of policies included in General Plan 2045, as well as future environmental review that would be required for any future facilities needed to accommodate General Plan 2045. As discussed in Section 3.4 (Cultural Resources), implementation of the General Plan 2045 would impact historic resources in the Gateway Area that cannot be feasibly mitigated below significant thresholds.

Growth facilitated by the General Plan 2045 would incrementally increase regional air pollutant and greenhouse gas (GHG) emissions. As discussed in Section 3.3 (Air Quality) and Section 3.5 (Greenhouse Gas Emissions), implementation of the proposed plan policies, regional air pollution programs, and mitigation measures would reduce the air pollutant and GHG emissions associated with individual future development projects. Although individual projects may be less than significant, the total development anticipated by the General Plan 2045 would contribute to higher generation of toxic air contaminants and particulate matter (PM2.5). Additionally, as described in Section 3.6 (Hazards and Hazardous Conditions), hazardous materials releases during construction and implementation cannot feasibly be eliminated, potential risk of exposure to sensitive receptors cannot be reduced to zero, and no reasonably foreseeable upsets or accidents exist. Implementation of existing federal, state, and local regulations and General Plan 2045 policies reduce these potential risks to a less than significant level.

The General Plan 2045 includes goals, policies, and implementation measures that anticipate future changes to ensure that they will be effectively planned for and reflect this community's shared sense of values, such as protecting and enhancing open space, coastal resources, and design of the built environment. The General Plan 2045 addresses land use and environmental issues to the greatest extent feasible, while allowing growth and economic prosperity for the City. Associated development would physically change the environment in the Planning Area and would commit future generations to similar uses. This impact is considered a significant and unavoidable impact under CEQA.

Notice of Preparation

NOTICE OF PREPARATION
OF A
DRAFT ENVIRONMENTAL IMPACT REPORT
FOR
ARCATA GENERAL PLAN 2045 AND GATEWAY AREA PLAN

ANNOUNCEMENT:	Notice is hereby given that the City of Arcata as Lead Agency under the California Environmental Quality Act (CEQA), will prepare an Environmental Impact Report (EIR) to evaluate the environmental effects associated with the proposed "Arcata General Plan 2045" (Project). **This Project includes analysis of the Draft Gateway Area Plan as a new Element of the General Plan, and associated zoning amendments necessary to implement the General Plan.** The City is soliciting comments regarding the scope and content of the environmental information.
ANNOUNCEMENT DATE:	February 2, 2022
PROJECT TITLE:	Arcata General Plan 2045
PROJECT LOCATION:	• City of Arcata Planning Area (see Figure 1 below) • Gateway Area Plan Boundary (contained within the above) (see Figure 2 below)
LEAD AGENCY:	City of Arcata
LEAD AGENCY CONTACT PERSON:	David Loya, Director Community Development Department dloya@cityofarcata.org Phone: 707-825-2045 City of Arcata 736 F Street Arcata, CA 95521
NOP PUBLIC COMMENT PERIOD:	The Notice of Preparation (NOP) review period begins on Friday, February 4, 2022, and closes on Monday, March 7, 2022. Please submit written responses by 5:00 p.m. on March 7, 2022, to the address or email above.
SCOPING MEETING:	A virtual public scoping meeting will be conducted on February 24, 2022, beginning at 5:30 pm via zoom communications and may be accessed via https://us06web.zoom.us/j/85803996010?pwd=YkdvQzJxamlLVk9wT25ndCs5NjRvdz09.

PURPOSE OF THIS NOTICE OF PREPARATION

The City of Arcata (City) will serve as lead agency under California Environmental Quality Act (CEQA) and an Environmental Impact Report (EIR) will be prepared to analyze the proposed Project. The EIR will identify the potential for significant environmental effects to satisfy the requirements of CEQA [Public Resources Code Section 21000 et seq.].

In accordance with the California Code of Regulations Section 15082, the City has prepared this Notice of Preparation (NOP) to inform agencies and interested parties that an EIR will be prepared for the proposed Project. The purpose of this notice is:

(1) to serve as the notice to provide interested parties, including members of the public, potential responsible agencies, agencies involved in funding or approving the Project, agencies providing public services, (schools,

utilities, medical and emergency services), and trustee agencies responsible for natural resources affected by the Project, with sufficient information to provide meaningful responses as to the scope and content of the EIR; and

(2) to advise and solicit comments and suggestions from interested parties regarding the preparation of the EIR, environmental issues and alternatives to be addressed in the EIR, and any related issues.

PROJECT OVERVIEW

The Arcata General Plan is a planning document with text and diagrams that express the goals, objectives, and policies necessary to guide the community toward achieving its vision over a long-term planning period (typically approximately twenty years). City decision makers rely on the General Plan as the basis for making decisions on matters such as land use, transportation, open space and conservation, provision of public services, and environmental quality and safety. It is also a policy document that guides decisions related to protecting and enhancing what the community values most, such as open space, coastal resources, and protecting and enhancing the character of the community.

The City is preparing an update of its existing General Plan as well as preparing a "Gateway Area Plan," which will be a new Element of the General Plan as well as associated zoning amendments to implement the Gateway Area Plan. The Gateway Area Plan will provide additional specificity within the Gateway Area, which is an approximately 138-acre area entirely within City limits that is generally north of Samoa Blvd, west of K Street, and south of Alliance Rd (see Figure 2). A portion of the Gateway Area and City's Planning Area are located in the coastal zone (see Figures 1 and 2). The General Plan update, Gateway Area Plan and zoning updates are collectively the "Project."

PROJECT DESCRIPTION

The Project will update and amend the City's existing General Plan, including a new General Plan Element (the Gateway Area Plan) to encourage infill development in the Arcata Gateway Area, in accordance with State Bill (SB) 375 and California Government Code (CGC) Section 65302. Together these documents will be called the "Arcata General Plan 2045." The Arcata General Plan 2045 seeks to build upon but not substantially change the vision established in the Arcata 2020 General Plan (adopted in the year 2000). The Arcata General Plan 2045 will also update the goals, policies, and implementation programs that articulate the vision for the City's long-term physical and economic development, while preserving open space areas and enhancing the quality of life for Arcata residents. The Arcata General Plan 2045 is anticipated to be adopted in late 2022.

As a part of this Project, all existing General Plan Elements (other than the Housing Element) will receive minor focused updates to:

- Satisfy modern State mandates for General Plans that have been issued since the General Plan was last updated;
- Re-emphasize infill development to preserve greenbelts around the City;
- Adjust to climate-change and promote sustainability;
- Promote social justice and racial equity;
- Amend inconsistencies; and
- Ensure consistency and compliance with other City plans that have been adopted or revised in recent years, such as the 2019 Housing Element.

California Government Code, Section 65302, subdivision. (h)(1) requires an Environmental Justice element in the General Plans of certain communities. Arcata does not meet the thresholds for such an Element to be required because the City does not contain any Disadvantaged Communities as identified by the California Environmental Protection Agency Pursuant to Section 39711 of the Health and Safety Code. Instead, the City is electing to reflect social justice and racial equity values in all Elements of the General Plan. Since the Housing Element was updated and adopted in late 2019, the Housing Element will not be modified as a part of this Project.

In addition to the minor updates outlined above, the following General Plan Elements will receive additional, more comprehensive updates to accommodate more targeted infill policies and ensure consistency with the Gateway Area Plan:

- Land Use (modifications to land use map and development standards)
- Transportation and Circulation (modifications to proposed circulation systems)
- Public Facilities and Infrastructure (modifications to support utility upgrades in priority development areas)
- Parks and Recreation (replace existing adopted Element with the 2010 Parks and Recreation Master Plan, which will serve as the new Parks and Recreation Element)

Accordingly, the following summarizes the anticipated degree of changes for each Element:

- New Element
  - Gateway Area Plan
- Minor updates and consistency updates:
  - Introduction
  - Vision
  - Growth Management
  - Open Space Element
  - Resource Conservation and Management
  - Air Quality
  - Design
  - Historical Preservation
  - Public Safety
  - Noise
- Comprehensive updates
  - Land Use
  - Transportation and Circulation
  - Public Facilities and Infrastructure
  - Parks and Recreation
- No change
  - Housing Element

The new **Gateway Area Plan Element** will establish new policies, land use designations, and development standards within the "Gateway Area" which is an approximate 138-acre location entirely within City limits that is directly west of Arcata's downtown core and generally north of Samoa Blvd, west of K Street, and south of Alliance Ave (see Figure 2). The Gateway Area currently primarily consists of former industrial lands. Due to its proximity to the downtown and core infrastructure, the Gateway Area represents a priority opportunity area for future redevelopment and infill growth.

The **Land Use Element** will continue to include the general distribution and general location and extent of the uses of land for housing, business, industry, open space, agriculture, natural resources, recreation, enjoyment of scenic beauty, education, public buildings and grounds, solid and liquid waste disposal facilities, greenways, and other categories of public and private uses of land within the City and its Planning Area, which is unchanged from the 2020 General Plan adoption on 2000 (see Figure 1). The Land Use Element will continue to accommodate projections of population and economic growth using infill principles, including growth anticipated in the Gateway Area. The City's anticipated growth during the planning period is expected be contained within the present City boundary and concentrated largely within the Gateway Area Plan Boundary and other "Potential Infill Opportunity Zones" identified in the City's adopted 6th Cycle Housing Element in 2019 (Figure 3). Growth will be concentrated in and around the downtown area, the Gateway Area Plan Boundary, existing neighborhood commercial centers, and Humboldt State University. Targeted upzoning (or increases in the allowable uses and development standards) will be necessary in these priority development areas to meet

the City's 6th Cycle housing allocation, in addition to twenty-year growth projections. Outside of the Infill Opportunity Zones, the Land Use Map and development standards are anticipated to receive only minor changes from the Arcata General Plan 2020 (adopted in the year 2000).

The **Transportation and Circulation Element** will continue to include the general location and extent of existing and proposed major thoroughfares; vehicle, bike, and bus transportation routes; terminals; and other local public utilities and facilities, all correlated with the Land Use Element of the General Plan. To accommodate anticipated growth, the Transportation and Circulation Element will also be updated to include plans for a more balanced, multi-modal transportation network that meets the needs of all users of streets, roads and highways (including bicyclists, children, persons with disabilities, motorists, movers of commercial goods, pedestrians, users of public transportation, and seniors) for safe and convenient travel in a manner that is appropriate within the context of our community. The City's Pedestrian and Bike Master Plan (adopted 2010) will inform this update. Outside of the Gateway Area Plan Boundary, the Transportation and Circulation Element will receive only minor changes from the Arcata General Plan 2020, including:

- A new analysis of Vehicle Miles Traveled (VMT) and Level of Service (LOS) will be added to the Element;
- An update of the Street Functional Classifications Map;
- An update of the Existing and Projected Traffic Volumes and Intersection Levels of Service;
- An update of Existing and Projected Transit Ridership;
- An update of Existing Travel Demand Management;
- Enhancements to the goals and policies; and
- A modernization of implementation programs.

Likewise, the **Public Facilities and Infrastructure Element** will support growth in the identified Potential Infill Opportunity Zones and plan for upgrades to facilities such as the City's Wastewater Treatment Facility. This update will analyze necessary updates to development strategy based on recent planning documents, including the Humboldt County Association of Government's Regional Transportation Plan-VROOM 2022-2042, the City's Wastewater Treatment Improvements Project Facility Plan (2017), Wastewater Treatment Plant Rehabilitation Plan (2020), Infill Market Study (2021), and the City's Capital Improvement Program. The Public Facilities and Infrastructure Element update will leverage this analysis and identify infrastructure upgrades required to address population buildout over the planning period. This Element will consist of substantial changes from the Arcata General Plan 2020.

The new **Parks and Recreation Element** will draw heavily upon the Parks and Recreation Master Plan (adopted 2010) and upon goals and policies previously described in the Open Space Element. The Parks and Recreation Element will include an assessment of the current condition of parks and related facilities, analyze the existing and projected public demand for parks and recreation facilities, establish policies and guidelines for park planning and development, and identify funding sources for these initiatives. It will also include current demographic and needs data. This Element consists of substantial changes from the Arcata General Plan 2020, with the entire Element being replaced.

The **Design Element** and **Historical Preservation Element** identify detailed design policy in various neighborhoods throughout the City with particular emphasis on standards and review of the Arcata Plaza area, which constitutes the City's current downtown core. Updates to the Design Element are anticipated to be primarily limited to policy around Potential Infill Opportunity Zones and the development of objective design standards that can be applied for with new residential development designed at a higher density and intensity of use than what has historically been encouraged throughout these areas. The 2019-2027 Housing Element and Infill Market Study (2021) will inform the update of this Element. The changes to the Historic Preservation Element will be minor. These Elements will receive only minor changes from the Arcata General Plan 2020.

The **Public Safety Element** will continue to identify risks of fires, floods, droughts, earthquakes, tsunami, and landslides. An update of the Public Safety Element will comply with CGC Section 65302(g) and SB 375. Climate change adaptation

will be a principal focus of the Public Safety Element update. The Public Safety Element will acknowledge the context of other relevant plans at the regional and state level and align City goals and policies with these efforts. The City is currently included in the Humboldt County Local Hazard Mitigation Plan (adopted 2020) and County-wide Climate Action Plan (in progress). The Local Coastal Program update will address sea level rise. This Element received only minor changes from the Arcata General Plan 2020.

The **Open Space Element** will continue to include details regarding the preservation of natural resources, the managed production of resources, outdoor recreation, public health and safety, as well as tribal resources, within the context of related state and regional plans. The update of the Open Space Element will comply with CGC Sections 65302(e) and 65560 for the comprehensive and long-range preservation and conservation of open space land within the City. The Open Space Element will continue to include details regarding the preservation of natural resources, the managed production of resources, outdoor recreation, public health and safety, and tribal cultural resources, within the context of related state and regional plans. This Element will receive only minor changes from the Arcata General Plan 2020.

The **Resource Conservation and Management Element** will continue to address the conservation, development, and utilization of natural resources including water, forests, soils, rivers and other waters, harbors, fisheries, wildlife, minerals, and other natural resources. The Resource Conservation and Management Element update will consider the effect of infill development, as described in the Land Use Element, on other natural resources located on public lands. This Element received only minor changes from the Arcata General Plan 2020.

The **Growth Management Element** will reaffirm the Urban Growth Boundary for the City and will continue to bolster the policies and programs of the Open Space Element. The update of the Growth Management Element is to align the existing Element with the Local Coastal Program and updated Municipal Services Review per the Humboldt County Local Agency Formation Commission (LAFCo). The Growth Management Element amendments will emphasize infill development, including new policies to reaffirm an internal focus on future growth. This Element received only minor changes from the Arcata General Plan 2020.

The **Noise Element** will continue to provide a basis for comprehensive local programs to control and abate environmental noise and to protect citizens from excessive exposure. The update of the Noise Element will address the changes resulting from residential densification in Potential Infill Opportunity Zones, including more intense and diverse uses. This Element will receive only minor changes to the Arcata General Plan 2020.

The **Air Quality Element** will continue to address air pollution concerns and will bolster the policies and programs of the Air Quality Element. The update of the Air Quality Element will continue to have goals and objectives related to reducing air quality emissions from a variety of point and area sources, as well as mobile emissions. The Air Quality Element will continue to enforce the Regional Air Quality Standards enforced by the North Coast Unified Air Quality Management District. This Element received only minor changes from the Arcata General Plan 2020.

Zoning Amendments. The General Plan update will require zoning amendments to implement the new vision. Specifically, the Land Use Element will establish growth targets that will require new zoning to accommodate. Population growth is anticipated to be absorbed throughout the City primarily through infill. The City expects rezoning to accommodate new residential development, upzoning to allow higher densities in current residentially designated districts, and ordinances to address state law related to accessory dwelling units (second units) and small lot subdivision requirements (SB 9 – 2020).

EIR ANALYSIS

The City of Arcata, as the lead agency under CEQA, will prepare an EIR for the Arcata General Plan 2045 in accordance with CEQA. The Arcata General Plan 2045 is considered a “project” under CEQA and is therefore subject to CEQA review.

As a policy document, the General Plan provides guidance and sets standards for several areas of mandatory environmental review for later "projects" that would be undertaken by local government and the private sector. The EIR will evaluate potential environmental impacts associated with adoption and implementation of the Arcata General Plan 2045. The EIR will disclose potential impacts of the Arcata General Plan 2045, propose mitigation measures to avoid and/or reduce impacts deemed potentially significant, identify reasonable alternatives, and compare the environmental impacts of the alternatives to the proposed Project's impacts.

Pursuant to Section 15063(a) of the CEQA Guidelines, an Initial Study will not be prepared. The EIR will evaluate the full range of environmental issues contemplated under CEQA and the CEQA Guidelines, including the following resource categories: Aesthetics, Agricultural and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Energy, Geology and Soils, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Hydrology and Water Quality, Land Use, Mineral Resources, Noise, Population and Housing, Public Services, Recreation, Transportation and Circulation, Tribal Cultural Resources, Utilities and Service Systems, and Wildfire.

The following resource categories may have potentially significant impacts, and mitigation measures may be required to reduce potential significant impacts: Air Quality, Biological Resources, Historic and Cultural Resources, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Population and Housing, Transportation, and Utilities and Service Systems. The EIR will also evaluate potential cumulative impacts, growth inducement and other CEQA-required topics.

Scoping Meeting

A virtual scoping meeting will be conducted on February 24, 2022 beginning at 5:30 pm. The meeting is being conducted utilizing teleconferencing and electronic means consistent with State of California Executive Order N-29-20 dated March 17, 2020, regarding the COVID-19 pandemic. In accordance with Executive Order N-29-20, the public can observe and participate in the meeting by attending the virtual meeting that may be accessed at https://us06web.zoom.us/j/85803996010?pwd=YkdvQzJxamlLVk9wT25ndCs5NjRvdz09. Verbal comments regarding the scope of the proposed EIR will be accepted at the meeting. Members of the public may also provide public comment by sending comments to David Loya, Director of the Community Development Department by email at dloya@cityofarcata.org, with cc to comdev@cityofarcata.org by 5:00 p.m. on March 7, 2022. This NOP is available for review on the City's General Plan webpage at: https://www.cityofarcata.org/160/General-Plan.

Please contact Community Development Department Director David Loya at 707-825-2045 or dloya@cityofarcata.org with any questions regarding this notice, the scoping meeting or ways to comment on this NOP.

Arcata Gateway Plan-Agency Scoping Meeting

February 24, 2022

Attendees:

- Eric Loudenslager, Arcata Fire Protection District Board Director
- Bente Jansen, California Coastal Commission, bentejansen@coastal.ca.gov
- Colette Metz Santsche, Humboldt LAFCo, colettem@humboldtlafco.org
- Tamara L. Gedik, Supervising Analyst, California Coastal Commission Tamara.Gedik@coastal.ca.gov
- Larry Oetker, Humboldt Bay Harbor District loetker@humboldtbay.org
- Ana Canter, Bear River Band THPO Assistant and GIS coordinator anacanter@brb-nsn.gov
- Spencer Fine, Local Assistance and Market Development Branch –CalRecycle spencer.fine@calrecycle.gov
- Jesse Robertson, Caltrans District 1 Transportation Planning jesse.robertson@dot.ca.gov
- Tom Mattson, Director of Public Works, Humboldt County tmattson@co.humboldt.ca.us
- Greg O'Connell, California Department of Fish and Wildlife Gregory.OConnell@Wildlife.ca.gov

Summary of Comments Provided:

Oetker: Support for planning for regional growth, need to consider housing needs

Mattson: Recommend meeting with planning directors from other local jurisdictions to discuss regional growth and population projections-all the way from Trinidad to Fortuna. Concerns about our energy grid and energy impacts related to electrification of vehicles

Loudonslager: Concern with Gateway Area Plan for fire suppression and emergency medical services. High rise buildings pose challenges, need for upgraded equipment and there needs to be a plan for that.

Gedik: Consider WWTP capacity given growth projections; what is plan for that? Need for that over time…vulnerability of site over time-more information needed from the City for the permitting of Phase 2n AWTF Improvements.

Fine: AB 939 replaced with SB 1383, Climate Pollutant law- 50% diversion goal is now prescriptive and mandates certain requirements. Also recommend checking in with Air Board regarding SB 375.

Robertson: Formal letter forthcoming. What are best local opportunities to reduce VMTs 5 of top 10 strategies to reduce VMT are within the sphere of local government and related land use/transportation policy. Support for travel demand management, micro-mobility, and targeting certain land use densities (e.g. 9.1+ du/ac) as well as 125 jobs/ac. Trails and other transit connections that reduce trips using state highways system are supported by Caltrans-recommend communicating these updates with Caltrans and keeping lines of communication open, sharing maps and plans that show local linkages.

O'Connell: Consider Open Space, stream and wetland buffers, Sea Level Rise and habitat migrations-effects of GHGs from additional population (Loya: site-specific environmental review will still be required on identified parcels. LCP + GAP are planned to be packaged as separate approvals before the Coastal Commission.)

Santsche: MSR and SOI update in 2020. Will updated sphere be reflected in General Plan Update? Any other SOI updates? (Loya: likely to reduce SOI, focusing entirely on infill for the next 20-year planning period.)

Re: Arcata Gateway Area Plan

Dear Delo:

Thank you for giving us the opportunity to review the subject plans. The proposed Arcata Gateway Area Plan is within the same vicinity of PG&E's existing facilities. Should the City find that existing PG&E facilities need to be relocated as any part of the Arcata Gateway Area Plan, the City will need to submit an application to the Customer Connections Online to initiate the relocation process. Additionally, any facilities requiring relocation will need to be shown on a plan set by the city. The city can contact the BRSC below, or email DelineationMapRequests@pge.com, to obtain facility mapping to add to their plan sets. Once both of those steps are complete, the city may reach out to Land Agent Dave Kelly (Dave.Kelly@pge.com) to continue the relocation process.

Please contact the Building and Renovation Center (BRSC) for facility map requests by calling 1-877-743-7782 and PG&E's Service Planning department at www.pge.com/cco for any modification or relocation requests, or for any additional services you may require.

As a reminder, before any digging or excavation occurs, please contact Underground Service Alert (USA) by dialing 811 a minimum of 2 working days prior to commencing any work. This free and independent service will ensure that all existing underground utilities are identified and marked on-site.

If you have any questions regarding our response, please contact me at Justin.Newell@pge.com.

Sincerely,

Justin Newell

Hello Delo,

Thank you for providing that. PG&E's comments will be the same as the letter I provided 12/28. If the general plan requires any PG&E facilities to be relocated, please follow the instructions outlined in my letter.

We have no other comments at this time.

Thank you,

Good Morning Delo,

Unfortunately PG&E cannot access the NOP/EIR link. I have attached my last correspondence regarding the Arcata General Plan. It states who to contact should the general plan require the relocation of any PG&E facilities.

I am happy to look at the plan update if it could be sent to us outside of the link.

Thank you,

Subject: City of Arcata CEQA Notice of Preparation of Environmental Impact Report-Arcata General Plan 2045 and Gateway Area Plan

*****CAUTION: This email was sent from an EXTERNAL source. Think before clicking links or opening attachments.*****
Hello,

The City of Arcata is releasing a Notice of Preparation (NOP) of an Environmental Impact Report (EIR) for its General Plan Update, which will include the City's Gateway Area Plan as a new Element. An NOP signifies the formal start of the General Plan Update's environmental review process. A scoping meeting specifically for agencies receiving this email will be held Thursday, February 24th from 3-4:30 PM via zoom communications and can be accessed at https://us06web.zoom.us/j/84325039302?pwd=NWZxMVU4czNrS3A0RGtSSHdxRlZXZz09. Written comment may also be submitted to David Loya, Director of Community Development at dloya@cityofarcata.org, with cc to comdev@cityofarcata.org, or mail to City of Arcata, Community Development, 736 F Street, Arcata, CA 95521. The NOP review period begins on Friday, February 4, 2022, and closes on Monday, March 7, 2022 at 5:00 p.m. Please submit written responses by 5:00 p.m. on March 7, 2022 to be incorporated into the project's administrative record.

The Arcata General Plan shapes how the City of Arcata will look, function, provide services, and manage resources for the next 20 years. The General Plan is the City's "constitution" for physical development and change within the existing and future city boundaries. The City is preparing an update of its existing General Plan as well as preparing the "Gateway Area Plan" as a new proposed Element of the General Plan, as well as associated zoning amendments to implement the Gateway Area Plan. Please review the NOP for more information. The NOP can also be found online at https://www.cityofarcata.org/160/General-Plan and https://www.cityofarcata.org/928/Related-SIRP-Materials.

In accordance with the California Code of Regulations Section 15082, the City has prepared this NOP to inform agencies and interested parties that an EIR will be prepared for the proposed Project. The purpose of this notice is to:

1. Serve as the notice to provide interested parties, including members of the public, potential responsible agencies, agencies involved in funding or approving the Project, agencies providing public services, (schools, utilities, medical and emergency services), and trustee agencies responsible for natural resources affected by the Project, with sufficient information to provide meaningful responses as to the scope and content of the EIR; and
2. Advise and solicit comments and suggestions from interested parties regarding the preparation of the EIR, environmental issues and alternatives to be addressed in the EIR, and any related issues.

The NOP review period begins on Friday, February 4, 2022, and closes on Monday, March 7, 2022 at 5:00 p.m. Please submit written responses by 5:00 p.m. on March 7, 2022, to David Loya, Director of Community Development at dloya@cityofarcata.org, with cc to comdev@cityofarcata.org, or mail to City of Arcata, Community Development, 736 F Street, Arcata, CA 95521.

Please contact Community Development Director, David Loya, at 707-825-2045 or dloya@cityofarcata.org, with any questions regarding this notice, the upcoming scoping meeting, or ways to comment on this NOP.

Delo Freitas | Senior Planner
City of Arcata Community Development Department

Due to COVID 19, the City has implemented measures to limit in-person contact. We still strive to provide the full range of city services by phone, email, and web-based services. Since this is an evolving situation, please visit the City's COVID-19 website for updates.

NATIVE AMERICAN HERITAGE COMMISSION

Governor's Office of Planning & Research

Feb 11 2022

STATE CLEARING HOUSE

February 8, 2022

David Loya
City of Arcata
736 F Street
Arcata, CA 95521

Re: 2022020107, Arcata General Plan 2045 Project, Humboldt County

Dear Mr. Loya:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015. If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). Both SB 18 and AB 52 have tribal consultation requirements. If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

a. A brief description of the project.

b. The lead agency contact information.

c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).

d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

a. Alternatives to the project.

b. Recommended mitigation measures.

c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

a. Type of environmental review necessary.

b. Significance of the tribal cultural resources.

c. Significance of the project's impacts on tribal cultural resources.

d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

a. Whether the proposed project has a significant impact on an identified tribal cultural resource.

b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe. (Gov. Code §65352.3 (a)(2)).
2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.
3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:
    a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
    b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (http://ohp.parks.ca.gov/?page_id=1068) for an archaeological records search. The records search will determine:
    a. If part or all of the APE has been previously surveyed for cultural resources.
    b. If any known cultural resources have already been recorded on or adjacent to the APE.
    c. If the probability is low, moderate, or high that cultural resources are located in the APE.
    d. If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
    a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
    b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:

a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.

b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.

a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.

b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.

c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green
Cultural Resources Analyst

1-HUM-101/255
Arcata General Plan 2045
SCH# 2022020107

Mr. David Loya, Director
Community Development Department
City of Arcata
736 F Street
Arcata, CA 95521

Dear Mr. Loya:

Thank you for giving Caltrans the opportunity to review and comment on the Notice of Preparation for the Arcata General Plan 2045 Environmental Impact Report. The planning horizon is approximately twenty years, during which time City decision makers will rely on the General Plan as the basis for making decisions on matters such as land use, transportation, open space and conservation, provision of public services, and environmental quality and safety. The "Gateway Area Plan" will be a new Element of the General Plan as well as associated zoning amendments to implement the Gateway Area Plan. The Gateway Area Plan will provide additional specificity within the Gateway Area, which is an area of approximately 138 acres, located generally north from Samoa Blvd, largely west of K Street, and south of Alliance Rd. The General Plan update, Gateway Area Plan and zoning updates collectively comprise the "Project." We offer the following comments:

Vehicle Miles Traveled (VMT)
Caltrans has a responsibility to help California achieve a carbon-neutral future by the year 2045. The Caltrans Strategic Plan for 2020-2024 calls for Caltrans to enhance and connect the multimodal transportation network and to lead Climate Action. By the end of the General Plan Update's planning period, the State is seeking to achieve carbon neutrality. To meet the State's targets to reduce carbon emissions and energy consumption, we offer to partner with the City to plan for a more sustainable transportation system through a reduction in VMT and carbon consumption/emissions.

Emissions from the transportation sector make up the largest contributor to GHG emissions in the State. According to California Air Pollution Control Officers Association (CAPCOA), four or five of the ten most effective and efficient greenhouse gas reduction strategies have to do with the transportation system and are within the control of local governments. The following strategies are recommended as initial points of focus for future local government General Plan policies and Climate Action Plan development and include:

1) Promotion of smart growth, jobs/housing balance, transit-oriented development, and infill development through land use designations, zoning, and public-private partnerships.
2) Support for and funding of transit, bicycle, and pedestrian connections through transit and trail planning and regional cooperation.
4) Promotion of green procurement and alternative fuel vehicle use through municipal mandates and voluntary bid incentives.
5) Support for alternative fuel facilities and infrastructure through land use designations, zoning, and public-private partnerships.
10) Regional cooperation to find cross-regional efficiencies in GHG reduction investments and to plan for regional transit, energy generation, and waste recovery facilities.

The development of compact housing has been shown to result in lower VMT per household when compared to less dense housing. Affordable housing produces less VMT compared to market-rate housing. To the extent that future projects contribute to such housing, medium- or high-density residential developments can take credit for the VMT reduction compared to business-as-usual housing. Compared to measures that attempt to reduce VMT in traditional single-family residential neighborhoods, denser, more affordable housing is a powerful VMT-reduction tool.

Factors Influencing VMT:

- Density of housing relative to typical or existing
- Affordability of new housing
- The level of contribution committed by project mitigation
- Location of the housing project

Ways to measure VMT Reduction:

For housing projects that result in higher densities, CAPCOA estimates a -0.22 reduction in household VMT for every percentage increase in density. To qualify as a VMT reducer, density must be higher than typical densities. CAPCOA sets the starting point at 9.1 dwelling units per acre. Lower density developments would not reduce VMT. CAPCOA caps the reduction at 21.5 units/acre, equivalent to a 30 percent reduction in household VMT.

Please note that the source material from CAPCOA considers density at the project level. However, if a very large housing project increases density in a larger geography, such as a TAZ or Census block group, it would be fair to consider the increase across the full geography, adding a VMT reduction for the existing homes to the calculation for the project itself.

For the purposes of lowering the City's carbon footprint and reducing harmful GHG emissions that result from inefficient land uses, we recommend establishing a minimum Citywide residential density of 9.1 units per acre.

Mixed Use/Employment Densities

To maximize the potential benefits of higher density residential development on VMT reduction goals, trip lengths can be shortened by establishing a greater mix of land uses. Locating higher density housing in close proximity to commercial uses where goods, services and employment are abundant can help to reduce trip length and the amount of energy consumed for transportation. CAPCOA (pages 73-75) sets 145 jobs/acre as a floor for realizing VMT benefits, and a maximum reduction of 30 percent from employment density. Reductions can be calculated using a (job) density-to-VMT elasticity of -0.07. This method must be applied to typical commute VMT for the development, a number determined through a traffic and parking study or may be available from the regional travel demand model or other sources of local travel data. If typical commute VMT is not available, it could be calculated by referring to the Institute of Transportation Engineers' (ITE) Trip Generation Manual and multiply the trips by trip lengths from a big-data tool.

Travel Demand Management (TDM)

Travel demand management can complement transportation infrastructure by influencing the travel mode that people choose when traveling to work, school, the grocery store, etc. Travel modes include transit, ridesharing, walking, biking, and telework. TDM programs can help make the most of our transportation and physical infrastructure so that options to driving are naturally encouraged and our systems are better balanced. TDM measures that may help to reduce VMT include transit and micro-mobility pass discounts, carpool matching and incentives, parking pricing, bike facilities at workplaces, vanpools, guaranteed-ride-home service for non-driving employees, education, and information on travel options other than the single-occupancy-vehicle (SOV). "Modernizing Mitigation" (2018) from the State Smart Transportation Initiative, describes VMT-focused TDM in more detail: <https://ssti.us/modernizing-mitigation/ >.

<u>Factors to consider</u>:

Senate Bill (SB) 743-relevant TDM measures should be designed to replace car trips with other modes or by increasing vehicle occupancy in motor vehicle trips (e.g., carpooling). TDM measures could work in tandem with workplace and residential density measures to reduce distances traveled.

We encourage the City to coordinate with the Humboldt County Association of Governments (HCAOG), the Regional Transportation Planning Agency for Humboldt County, to plan, program, and implement TDM measures that are suitable for the north coast context. Other collaborators could include local governments, employers, college campuses, transit systems (e.g. with free or discounted transit passes), and residential landlords (e.g. with priced parking).

Ways to measure impacts:
Determining the VMT effect from increased transit service can be done with two calculations:

- Ridership. Where service was established through applications for New Starts, Small Starts or state capital funding, the original ridership estimates may already be available in the form of passenger-miles-traveled. If none of these applications are available, the transit provider would need to help make an estimate.
- VMT. Converting transit ridership into VMT is thoroughly discussed in "An Update on Public Transportation's Impacts on Greenhouse Gas Emissions" (TCRP, 2021). To summarize, a passenger-mile on transit directly replaces 0.329 VMT, a number which takes into account that not all transit trips would have been taken by car. This value can be coupled with the land-use multiplier effect to compound the overall savings in VMT by up to two miles of reduction for every one passenger-mile traveled.

Public Transportation/Mass Transit
The transportation element will benefit from a clear definition of sustainability in the context of local transit service and conditions. The Federal Transit Administration (FTA) defines sustainable transit as enhancing the quality of life, meeting ambient air quality standards, reducing the need for more road construction, lower contribution to stormwater run-off, reducing fuel use and providing critical services for all members of society. Ultimately, sustainable transportation means designing public transit services that are attractive to the people who want to use them.

Useful links: <https://www.transit.dot.gov/regulations-and-programs/environmental-programs/transit-and-sustainability>,
<https://www.kittelson.com/ideas/3-ways-to-improve-public-transportation-sustainability/>,
<https://www.transportation.gov/mission/health/Expand-Public-Transportation-Systems-and-Offer-Incentives>,
<https://www.nytimes.com/2015/05/07/upshot/transportation-emerges-as-crucial-to-escaping-poverty.html>.

To promote and prioritize high quality transit that aligns with the City of Arcata's land use, housing, and economic development policies, we suggest that the City General Plan 2045 include the following:

- Consider zoning changes to increase density around existing transit corridors.
- Establish an inventory of transit supportive infrastructure/assets on the State Highway System.
    - Coordinate transit stops, transit centers and routes with bicycle and pedestrian infrastructure to create first and last mile connections.
    - Locations may include conventional highways and freeway interchange transit stops, connections to intermodal transit stations, mobility hubs, park and ride lots, regional and interregional transfer points,

- Assemble a toolbox of best practices, common standards, and types of infrastructure to consider on projects for the State Highway System. Consider a Complete Streets Elements Toolbox.
  - Potentially to include transit accessibility improvements, bus boarding islands with bikeways, highway crossing needs at transit stops, queue jump lanes, transit signal prioritization, bus shelters and other bus stop infrastructure improvements.
- A prioritization methodology for transit supportive infrastructure improvements at specific locations with potential funding opportunities.
- Integration with Statewide and Regional documents and plans, including the California Intercity Bus Study, Caltrans Race and Equity Action Plan…
  - Involve transit providers early in General Plan processes to ensure their alignment with community priorities.
  - Incorporate California planning priorities such as VMT reduction, GHG reduction, active transportation, equity and complete streets goals in City transportation and transit planning. This is accomplished by offering residents viable non-automobile travel choices (bike, ped and transit).
- Recommendations for transit performance objectives for City, regional, and interregional service.
- Aim to increase transit ridership by involving developer/residential and employer programs through general plan visions and goals that incentivize and reward public transit usage. This could be in the form of reduced rent, subsidies, reimbursements, or pre-tax payroll reductions.

High quality public transportation can make communities more equitable by increasing access to critical destinations such as employment, healthcare, and vital social services for low-income individuals and communities.

Local road networks/connectivity
Though highways were originally conceived as intercity or rural-serving facilities, today in most places they facilitate mostly local and intraregional travel. The large volume of short-distance traffic is both a problem – it undercuts highways' original purpose, for example by delaying intercity or farm-to-market freight in traffic – and an opportunity. In many cases local travelers use the State Highway System (SHS) for short trips because local networks are incomplete or disconnected. Creating better-connected, multimodal networks off the SHS offers options for travelers to make more direct trips, sometimes by non-auto modes, reducing not only VMT but pressures to add expensive highway capacity. The planning literature cites "intersection density" as a measure of connectivity, and one that indicates lower VMT. Assisting owner-operators of local networks could thus reduce the need for highway capacity and mitigation and may provide mitigation opportunities where needed as well.

<u>Factors to consider</u>:
- Origins and destinations of travelers in a corridor or on a facility.
- Gaps and other identified needs in the local modal networks.

Ways to measure impacts:

- Needs and gaps can be demonstrated through the use of big data, to examine origins and destinations of travelers, and circuity of routing. Where travelers are diverting significantly from direct routes, or where they are nearly all driving despite origins and destination that are close by, improvements in the auto and active transportation networks are worth considering.
- Accessibility tools can measure gaps in the multimodal systems as well, comparing existing accessibility to ideal accessibility where origins and destinations are linked directly.
- Local network improvements could help to reduce the need for capacity increasing improvements on the SHS and are more likely to be screened out of an analysis for induced VMT.

Traffic Operations and Transportation Safety

Caltrans has a vision to eliminate fatalities and serious injuries on California's roadways by 2050 and provide safer outcomes for all communities. We encourage the City to help realize this vision by committing to the following:

- Adopt a safety-first mindset that prioritizes road safety.
- Prioritize the elimination of fatal and serious injury crashes through existing safety improvement programs along with development and implementation of new programs to enhance the safe use of our roadways.
- Eliminating race-, age-, ability- and mode-based disparities in road safety outcomes.

We recommend that the City include a discussion about traffic safety and traffic safety goals in the Transportation and Circulation Element of the General Plan/Project. If the City is not already actively engaged in monitoring progress toward zero deaths, we recommend including an examination of Actual Collision Rates to Average Collision Rates where data is available to help establish priorities for addressing safety.

We encourage the City to include a section in the Transportation and Circulation Element that identifies any future planned, programmed, or potential projects that may benefit traffic safety or related traffic operation improvements.

With the projected increase in population over the time frame of the plan update, we request to review the City's traffic volumes at buildout.

We suggest including a section in the Transportation and Circulation Element that examines signal warrants for any locations expected to be impacted with a significant increase in travel demand. The need for any capital projects, including new intersection traffic control measures, are likely of interest to the Region and the State especially when discretionary funding will be pursued.

Parking Management

Parking management is considered to have a significant influence on Vehicle Miles Traveled. Parking management may be most effective when integrated with multifamily residential or employment land uses, in the form of parking fees or capacity limitations. When coupled with higher density housing or employment, it may be possible to achieve VMT benefits from parking management outside of specific land uses, though the calculations would be more complex. If the City enforces parking minimums for any land use types, etc., and would require exceptions for major capacity limitations.

Factors to consider:
- Standard parking-demand rates (assuming unlimited free parking).
- Type and degree of parking management (extent of capacity limitation, amount of fees).

Ways to measure impacts:
- CAPCOA promotes the use of the "ITE Parking Generation Manual" to reduce VMT by as much as 13.7 percent for limiting free parking for residential land uses if abundant free parking is not otherwise available in the vicinity.
- The use of parking fees or charges at residential land uses can help to reduce VMT by as much as 15.7 percent. For more details, see CAPCOA, pp. 126-9.

CAPCOA's "Quantifying Greenhouse Gas Mitigation Measures" and "Model Policies for Greenhouse Gases in General Plans " can be found online: <http://www.capcoa.org/documents/>.

We welcome the opportunity to assist the City with goals to plan and build a safe, efficient, and sustainable transportation system for City of Arcata residents now and for the future. Please contact me with questions or for further assistance at: (707) 684-6879 or by email at: <jesse.robertson@dot.ca.gov>.

Sincerely,

Jesse G. Robertson

ARCATA FIRE DISTRICT
OFFICE OF THE FIRE CHIEF

MEMORANDUM

Date: February 24, 2022
To: David Loya, Director, City of Arcata Community Development Department
From: Justin McDonald, Fire Chief
RE: Fire District Response to the City of Arcata Notice of Preparation of an EIR for the Arcata General Plan 2045 and Gateway Area Plan

---

The Arcata Fire Protection District (District) received a February 2, 2022 Notice of Preparation (NOP) of a Draft Environmental Impact Report (EIR) for the Arcata General Plan 2045 and the Gateway Area Plan. The NOP solicited suggestions on analyses and alternatives to be addressed in the EIR. This letter transmits to the City of Arcata recommendations from the Fire District regarding analyses in the EIR that are needed to comprehensively assess the necessary response force required for fire suppression, emergency medical services, and hazards associated with the Arcata General Plan 2045 and Gateway Area Plan.

The draft Gateway Area Plan anticipates an increase in 3500 residential units and unspecified increases in retail and business spaces over the next 20 years. Further, the Gateway Area Plan anticipates buildings of six-, seven-, and eight-stories, these buildings based on their height, would likely fall into the high rise category. Additionally, the Gateway Area Plan anticipates substantial modification of existing roadways in the plan area.

The AFPD concludes that the additional residential units and population anticipated in the Gateway Area Plan is likely to exceed the capacity of the District to ensure safe and effective response to fulfill our obligations. Moreover, the current capacities of the District do not include fire suppression in mid-rise and high-rise buildings. Issues that need addressing include water supply (sufficient water to put out a fire), traffic flows and patterns (space to quickly move fire & EMS vehicles into the Gateway Area), access to buildings, and equipment and staff with appropriate skills/training for high-rise fire suppression.

Analysis of these issues needs to be a component of the EIR, with the EIR providing a recommendation on appropriate staffing and equipment, and analyzing the costs of any anticipated required increases. Since the EIR has the option of including analysis of alternatives, it would be beneficial to conduct the analysis so it compares requirements with alternative height buildings.

Best practices would be to produce a Community Risk Assessment and Standard of Cover (CRA-SOC) report based on nationally recognized guidelines and criteria, for example National Fire Protection Association (NFPA) Standards and Insurance Services Office (ISO) schedules. These analyses and a Standard of Cover could be produced by several consultants that specialize in fire and EMS consulting. The

EIR Scoping Comments

Community

Public Scoping meeting notes

March 10, 2022

- 15 community participants, including two organizations (HCAOG and NorCal for Health)
- Two staff (Loya, Freitas) and Misha Schwarz representing GHD.

Summary of Comments provided:

- Questions about City growth projections--how that aligns with Cal Poly Humboldt projections related to our area. Are we tracking actual growth based on our Housing Element Annual Progress Report?
- What is the maximum capacity of our wastewater system? How do we accommodate additional users to the system?
- How will future growth in different locations throughout the City impact existing residential neighborhoods?
- Will an Environmental Impact Report (EIR) be prepared for both the General Plan and the Gateway Area Plan together?
- How do all of the updates to various General Plan Elements fit together? What about a climate element? An environmental justice element? How do all these updates fit together and what is the timeline?
- Is Gateway Area in Tsunami Zone? Earthquake hazard zone?
- Will the Humboldt County Climate Action Plan be analyzed with the General Plan Update CEQA review? Will it be analyzed alongside the EIR?
- How do we should ensure we have adequate service capacity and room for new CalPoly Humboldt students?
- Will wetlands in the Gateway area be impacted? Will there be a detailed map of wetlands provided?
- What alternatives to the area plan will be considered as part of the EIR process?
- Will the proposed updates to the road structure create hazards due to traffic? What will be the projected growth impacts to circulation?

RE: Notice of Preparation of a Draft Environmental Impact Report for Arcata General Plan 2045 and Gateway Area Plan

Director Loya:

Thank you for the opportunity to respond to the Notice of Preparation (NOP) of a Draft Environmental Impact Report (EIR) for the Arcata General Plan 2045 and Gateway Area Plan. As you know, we are in strong support of the Gateway Area Plan, and we look forward to supporting various improvements in the broader General Plan update as well. However, we do believe that there are a number of issues critical to both the success of the plans and their environmental impacts which must be fully addressed in the EIR prior to plan adoption. Therefore, and pursuant to the procedures of the California Environmental Quality Act (CEQA), this letter offers comments on the potential scope and contents of the future EIR.

We request full consideration of the following topics, and answers to the following questions, in the EIR:

- **Climate crisis.** How will the General Plan and Gateway Area Plan affect local greenhouse gas (GHG) emission levels? If Arcata's population is projected to increase, which we understand to be the case, how will the plans affect the *per capita* GHG emissions of current and future residents?
- **Sea level rise.** When will rising sea levels and attendant flooding affect areas within the City limits, and particularly the Gateway area, under a variety of assumptions reflecting the reasonable range of possible future conditions? How will the General Plan and the Gateway Area Plan address these risks through shoreline defense, managed retreat, and/or patterns of future development?
- **Consistency with other local plans.** The City of Arcata falls under the jurisdiction of the Regional Transportation Plan 2022-2042 (also called "VROOM: Variety in Rural Options of Mobility") prepared by the Humboldt County Association of Governments and the Comprehensive Action Plan for Energy 2019 Update (also called "RePower Humboldt") prepared by the Redwood Coast Energy Authority. How will the General Plan and the Gateway Area Plan ensure consistency with these plans and progress toward their various goals and targets, including but not limited to the Regional Transportation Plan's Safe and Sustainable Transportation Targets?
- **Environmental justice and equity.** Many areas of Arcata have household incomes less than 80% of the statewide median income, and at least some of these areas are likely disproportionately burdened by pollution due to their locations relative to highways and legacy pollution sources. Therefore, we believe that Arcata is required to incorporate an Environmental Justice Element into its General Plan pursuant to SB 1000. What impacts will the General Plan and the Gateway Area Plan have on disadvantaged communities' pollution exposure, physical activity/road safety, public facilities, housing and population, access to safe and affordable housing, and other aspects covered by both SB 1000 and CEQA?
- **Wastewater treatment.** How will the General Plan and the Gateway Area Plan affect the City's current wastewater treatment system and future plans for adapting, upgrading, and/or relocating wastewater treatment facilities? How will the plans affect the water quality of effluent from the City's wastewater treatment facilities and of stormwater runoff into Humboldt Bay and other local bodies of water?
- **Seismic activity and soil liquefaction.** How will the General Plan and the Gateway Area Plan affect risks to local life and safety, as well as environmental risks, from seismic activity and attendant soil liquefaction?
- **Transportation safety.** How will the General Plan and the Gateway Area Plan affect the risk of injury and death for users of the City's transportation system, particularly its most vulnerable users - those walking, biking or rolling on local streets and roads?
- **Vehicle miles traveled.** How will the General Plan and Gateway Area Plan affect local vehicle miles traveled (VMT)? If Arcata's population is projected to increase, which we understand to be the case, how will the plans affect the *per capita* VMT emissions of current and future residents?
- **Wild and working lands.** How will the General Plan and the Gateway Area Plan affect wild and working lands, including forests, farmlands, wetlands and riparian areas, both

within City limits and outside of them? In particular, how will the plans affect conversion and/or protection of these lands?

- **Green building.** How will the General Plan and the Gateway Area Plan affect the energy use of local buildings and the GHG emissions from those buildings? How will the plans affect the amount of distributed generation of electricity from installations on or around local buildings and address any reduction in such generation from, for example, shading of existing solar panels?

Thank you for your consideration.

To: COM DEV
Subject: CEQA Environmental Impact Report Questions Gateway Area Project City of Arcata
Date: Sunday, March 06, 2022 10:11:58 PM

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

California Environmental Quality Act & Environmental Impact Report. The study is based on standard checklists covering topics such as air quality, traffic, and noise. The environmental effects of a project will cause substantial adverse effects on human beings, either directly or indirectly. The EIR shall also analyze any significant environmental effects the project might cause or risk exacerbating by bringing development and people into the area affected. The Noise Element is required by California cities and counties (Government Code Section 65302) It falls under the California General Plan Guidelines. Local governments must analyze and quantify noise levels, and the extent of noise exposure, through actual measurements. Under Government code section 65302(f) Noise Element Requirement primary arterial and major streets such H and 16th streets, G street, K street, to be monitored and noise research be done such as Average daily level of activity (traffic volume per days of the week, and seasonal variations. Distribution of activity over day and night time periods, day of the week, and seasonal variations. Average noise level emitted by the source.

Will the City of Arcata CEQA Environmental Impact Reporting be conducting a study on the Noise Element on the thousands of cars that will be increasing the air, noise pollution for residents on H and 16th,G,K streets and part of the Environmental Justice in local use planning (SB10001) ? The City of Arcata is not currently in compliance with the noise element. What actions are they going to take now and in the future to comply with the laws of the State of California? Will the City of Arcata be conducting a study of the wastewater discharge of 3,500 units into the Arcata Bay? Do we know what the current wastewater effects on the environment in Arcata Bay? What will the costs of the existing users be though fees such as infrastructure, fire, police, water and wastewater services?How will the City of Arcata be conducting a storm water prevention program when the streets are covered with parked cars in the Gateway Area Plan. This is currently a problem when a street sweeper cannot clean the streets because of parked cars. Tons of trash in the streets are washed down the storm drains each year into wetlands, rivers, and the ocean. Does the City of Arcata have enough off street parking for 3,5000 units in the Gateway Area Plan and parking for economic activity in the area? The majority of people living in the Gateway area will need a car to drive to a job somewhere in Humboldt. Why did the City of Arcata Gateway Plan not address having a large section of the area for future jobs/industry? H street in Arcata is not a safe street to cross for pedestrians, and in the future there will be a large Cal Poly HSU student body using the 18th street pedestrian bridge and thousands of additional cars. How is the City of Arcata going to make this safe for everyone on H and G streets? The Circulation system of traffic flow using the H street and G street for exiting and entering 101 North freeway is a disaster. The quality of life for people living on these busy streets in the future will be unbearable with the increase in air pollution and noise. This is a violation of SB1000 Environmental Justice in local planning. How is the City of Arcata going to prevent Gentrification from happening?Example People in Wynwood Miami, an area that had over 70 art galleries, museums,and art studios had their rents increase to the point that most of them had to leave the area. All that remained were bars and restaurants that brought a lot of traffic, parking problems and trash to the area.

Why does the City of Arcata simply plan the future housing developments in an area of the city that has zero chance of sea level rise and a tsunami zone? The City of Arcata should keep the Gateway Plan Area a place for jobs and light industry and build the future housing on safe high ground and not risk the new housing being wiped out by a tsunami and sea level rise.

The National Oceanic and Atmospheric Administration (NOAA) Tsunami Hazard Mapping shows most of the Arcata Gateway Area Plan in a Tsunami Zone. Why would the City of Arcata risk the lives of people constructing 3,500 new residential units in a Tsunami Zone?

The Great East Japan Earthquake and tsunami resulted in over 18,000 dead on March 11, 2011. The magnitude 9.1 earthquake struck off the north coast of Honshu on the Japan Trench. A tsunami wave 133 feet in height that was generated by the earthquake arrived at the coast within 30 minutes, topping seawalls and disabling three nuclear reactors within days. In the Sendi area the waves traveled at 435 mph and up to 6 miles inland. Initially, the earthquake caused the sinking of part of Honsh's pacific coast up to 3 feet. In north eastern Japan a 250 mile stretch of coastline dropped vertically by 2 ft allowing the tsunami to travel farther and faster onto land. Housing that was built in areas that were safe, ended up in the tsunami zone. Soil liquefaction was evident in areas of reclaimed land.

Northern California coast is the most earthquake and tsunami prone area of the continental United States.

Is the City of Arcata using the research and data from the Great East Japan Earthquake and Tsunami to be used in the data for the Gateway Area Project Risk/Analysis?

estimated cost of the study would be around $60,000 and would likely take several months to complete.

To conclude, I can say without a doubt that that any future development of this magnitude, with the development of this plan will be an impact on our already understaffed organization and potentially to the north bay region’s fire service. Unfortunately, at this point, I do not have enough information regarding the Gateway Area Plan to properly make recommendations on the mitigation of the direct and indirect impacts this project will have on my organization.

Hi Director Loya

Gateway Project EIR

- Noise impacts on surrounding residences
  - Please refer to Noise Element of Arcata's General Plan - see Table N-1 with decibel limits for new projects and retrofits and referenced in policy N-2D
  - Building design (height, balconies, common areas, number/size of windows)
    - Any openings / penetrations may increase ambient noise, especially in evening hours.
    - Taller buildings may allow for further unimpeded noise projection affecting residence further away from project area.
    - Potential to reflect/amplify road noise from nearby freeway?
    - Effect on interior noise when taller buildings are unimpeded from incoming noise

- Impact on migratory birds
  - The Gateway project may inadvertently increase risk to migratory birds due to proximity of nearby marsh areas
    - *The potential impact on migratory birds should be reviewed as part of the EIR*
  - For reference, please refer to the document "Bird Safe Building Guidelines" issued by the Minnesota Audubon Society for recommendations to reduce bird deaths caused by collisions with buildings
    - Building Design (height/lighting)
      - Low to mid rise buildings is where most of the bird collisions occur
      - Concerns related to lighting on taller buildings (relative to surrounding areas) confusing birds at night.
      - Migratory birds frequently travel at night
      - Risk is increased in areas prone to fog and low clouds
      - Risk of collision during day may be effected by type glass used (Low E, Etched or Fritted glass reduce risk)
      - Please see the Audubon document for suggestions on on lighting, window glass and other aspects of building design
    - Building location
      - Risk to birds may be increased if buildings are located at/near southern end of project zone (closest to marsh and wetlands)

- Wastewater plant capacity
  - Does existing plant location have sufficient space/capability to handle expansion necessary

to meet full project needs
    - At minimum is expansion even feasible?
        - Maximum increase of approximately 2000 fixtures after phase 4 of improvements.
    - Future location for plant if current plant is undersized?

- Construction impacts on nearby coastal zone wetlands (in western and southern areas of the project zone)
    - Distance from wetlands necessary to mitigate impact
    - Overall issue of construction within coastal zone.
    - Effects of run off during and after construction.

Thanks
James Becker

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Subject: RE: Identification of Wetland on the L st Corridor

I recommend that specific wetlands be mapped and impact mitigation be legally required in the future for individual developments

---

Subject: Identification of Wetland on the L st Corridor

This is a section of the Gateway's Figures 6 existing creeks page 58. This section boarders between 10 th to the north, Samoa to the South, Q St to the west and the L st corridor to the east.

I chose this because of what appears to be a lot of riparian/ wetland.

First Lst south of 7 th contains the linear ditch that is identified in an attached document.

There is strip between Wings north property line and Tom Perot's south line. The line between Tom Perot's and Fed Ex appears to be some wetlands with some old established trees. The space south of FedEx and to the west of Tom Perots and Wing inflatables has a number of wetlands wetland including The Old Schmidbauer Log Pond.

> I recommend that known ESHAs (environmentally sensitive habitat areas)should be mapped in the plan.
>
> > It would be appropriate for the gateway plan (area plan or specific plan) to identify known natural areas and

sensitive habitat like the L st wetland , the Schmidbauer log pond , jolly giant creek corridor and create a " wetland - creek combining zone" or other open space identifier and include the include required municipal code setbacks because those features are constraints.

Any particular development must address wetlands
There is a no net loss of wetlands policy that cannot be waived. So no mater what the zoning is changed to, the Wetland protection measures must be adhered to .

The document that identifies the drainage on L st as a State jurisdictional wetlands.
Also it Identifies in the Revegetation Plan: Although the site visit with DFW biologist resulted in no evidence of northern red-legged frogs actively breeding within the ditches, there is some habitat for amphibians. Revegetation Plan shall preserve some open and less shaded habitat and shall include planting with shorter-stature native plants like Juncus effuses. Is the DWF original report still available?
Thanks
James Becker

STAFF REPORT
Zoning Administrator
March 17, 2016

TO: **Zoning Administrator**
FROM: **Alyson Hunter, Senior Planner**
DATE: **February 29, 2016**
SUBJECT: **Consider approval of a Coastal Development Permit for:** City of Arcata Drainage Ditch Maintenance, Between L Street and Samoa Blvd; APNs 021-191-003, 021-201-004, File Number 156-171-CDP.

STAFF RECOMMENDATION: Staff recommends that the Zoning Administrator (ZA) consider the following:

1. Staff Recommendation: (1) Receive a staff report; (2) Open the public hearing; and (3) Approve the project as conditioned and adopt the Class 1 (§15301 – Existing Facilities) and Class 4 (§15304 – Minor Alterations to Land) CEQA Categorical Exemptions as proposed.

INTRODUCTION: The proposed project is to maintain an existing drainage ditch within the Coastal zone. The ditch is located between the southern terminus of L Street and Samoa Blvd, west of 5th, 6th and 7th Streets.

DISCUSSION: Work will include removing sediment and vegetation with a backhoe and the removal of approximately 200-300 linear feet of old failing storm drain pipe which will daylight the drainage feature. The work will incorporate low impact development (LID) features. Implementation of the project will eliminate localized flooding. All work will take place during the dry weather season when no water is present. Standard Best Management Practices will be incorporated. The property is planned and zoned Industrial Commercial (I-C).

Although the project contains State jurisdictional wetlands, the project is to maintain an existing drainage feature to provide flood control, and is therefore consistent with Sections 30233(4) and 30236 of the California Coastal Act and Section IV-4(a) of Arcata's Certified Local Coastal Program. Because impacts will be temporary, no mitigation is proposed. The Dept. of Fish & Wildlife (DFW) determined, through project review and a site visit with City Staff on February 22, 2016, that the project does not require a Lake or Streambed Alteration Agreement from that office.

ENVIRONMENTAL REVIEW: The project can be considered categorically exempt from environmental review under Class 1, Section 15301 (Existing Facilities); Class 4, Section 15304 (Minor Alterations to Land) of the State CEQA Guidelines.

ARCATA

CITY OF ARCATA
Draft - **ACTION OF THE ZONING ADMINISTRATOR**

ACTION: Following a public hearing conducted on March 17, 2016, the Zoning Administrator approved the Coastal Development Permit for stormwater drainage ditch maintenance located between L Street and Samoa Blvd, west of the western terminus of 5th, 6th and 7th Streets, and based on Conditions of Approval.

Project: Work will include removing sediment and vegetation with a backhoe. Additionally, approximately 200-300 linear feet of the old failing storm drain pipe will be removed to incorporate low impact development (LID) stormwater features. Implementation of the project will eliminate localized flooding. Sediment and vegetation removal will take place during the dry weather season, and removal of the pipes will take place when no water is present. Standard Best Management Practices will be incorporated. The property is planned and zoned Industrial Commercial (I-C).

Although the project contains State jurisdictional wetlands, the project is to maintain an existing drainage feature to provide flood control, and is therefore consistent with Sections 30233(4) and 30236 of the California Coastal Act and Section IV-4(a) of Arcata's Certified Local Coastal Program. Because impacts will be temporary, no mitigation is proposed. The Dept. of Fish & Wildlife (DFW) determined, through project review and a site visit with City Staff on February 22, 2016, that the project does not require a Lake or Streambed Alteration Agreement from that office.

Application Type: Coastal Development Permit

Location: Between L Street and Samoa Blvd, west of the western terminus of 5th, 6th and 7th Streets

Property Owner / Applicant: North Coast Railroad Authority (NCRA)/ City of Arcata

File Number: 156-171-CDP **Zoning:** n/a (Railroad ROW) **General Plan:** n/a (Railroad ROW)

Coastal Status: In the Coastal Zone.

Environmental: The project can be considered categorically exempt from environmental review under Class 1, Section 15301 (Existing Facilities); Class 4, Section 15304 (Minor Alterations to Land) of the State CEQA Guidelines.

Permit Expiration and Activation. This permit shall expire within 24 months from the date of its approval unless said permit is activated. This permit may be extended only as permitted by Arcata Land Use Code (LUC) §9.79.070 Permit Time Limits, Extensions and Expiration, or its equivalent.

Appeals. The actions described herein may be appealed as outlined in Arcata's Land Use Code. Appeals shall be filed with the City Clerk within ten (10) working days following the date of this Action. Appeals shall be submitted on the prescribed form, state the reasons for the appeal, and include the filing fee set by the City Council. Appeal period ends at 5:00 pm on March 31, 2016.

Effective Date: This permit becomes effective on the next working day after the appeal period.

Date Approved: March 17, 2016

ATTEST: _____
Larry P. Oetker,
Community Development Director

FINDINGS AND CONDITIONS OF APPROVAL OF THE ZONING ADMINISTRATOR
File Number: 156-171-CDP
(APNs 021-191-003, 021-201-004, located between L Street and Samoa Blvd)

I. FINDINGS.

A. Per Section 1-0408.4 (Findings) of the City's Certified Local Coastal Plan (LCP), a Coastal Development Plan may only be granted if the development conforms with the certified LCP. In addition, for development between the nearest public road and the sea or the shoreline of any body of water located with the coastal zone shall includes a specific finding that the development is in conformity with the public access and public recreation policies of Chapter 3 of the Coastal Act. [As amended by Ordinance 1246]

The project is for the maintenance of an existing City drainage ditch adjacent to the City's Rail with Trail. Maintenance includes day-lighting a portion of the ditch through the removal of 200-300 feet of pipe as well as general vegetation removal and activities to improve stormwater flow. The ditch is located within the Coastal Zone. The site is not between the first public road and the sea nor will it impede public access or recreation opportunities relating to the coast.

II. CONDITIONS OF APPROVAL

A. AUTHORIZED DEVELOPMENT: Approval is granted for:

The removal of 200-300 feet of pipe and general ditch maintenance of the existing drainage facility located between the southern terminus of L Street and Samoa Blvd. This authorized development is conditioned as follows.

The property owner/applicant is responsible for having read and understood these Conditions of Approval and shall have these conditions attached to all building/grading permits or other contracts associated with the authorized development.

B. PROJECT SPECIFIC CONDITIONS:

ARCATA FIRE DISTRICT

1. n/a

BUILDING DEPARTMENT

2. **Grading Permit.** A Grading Permit shall be issued by the City's Building Official prior to the commencement of maintenance activities.

3. **Pacific Gas & Electric Notification.** At least 72 hours prior to commencement of digging, City Staff shall contact Kevin Pelascini, PG&E Gas Supervisor, at 499-5356, to schedule a PG&E inspector to be onsite as needed.

COMMUNITY DEVELOPMENT DEPARTMENT

4. **Revegetation Plan.** Although the site visit with DFW biologist resulted in no evidence of northern red-legged frogs actively breeding within the ditches, there is some habitat for amphibians. Revegetation Plan shall preserve some open and less shaded habitat and shall include planting with shorter-stature native plants like *Juncus effuses* or *patens*.

ENVIRONMENTAL SERVICES

5. n/a

ENGINEERING DEPARTMENT

6. n/a

C. GENERAL PERMIT CONDITIONS:

IMPORTANT INFORMATION REGARDING STANDARD CONDITIONS: The property owner/applicant is responsible for having read and understood the following information:

1. **Minor Modifications**. Minor deviations from approved plans may be approved by the Director of the Community Development Department.

2. **Construction Hours.** The General Plan *Noise Element* Policy N-5d, limits the operation of tools or equipment used in construction, drilling, repair, alteration or demolition to the hours between 8 a.m. and 7 p.m. Monday through Friday, and between 9 a.m. and 7 p.m. on Saturdays. No heavy equipment related construction activities shall be allowed on Sundays or holidays.

3. **Dust Control during Construction**:

    1. Water all active construction areas twice per day and use erosion control measures to prevent water runoff containing silt and debris from entering the storm drain system.
    2. Cover trucks hauling soil, sand, and other loose material.
    3. Pave, water, or apply non-toxic soil stabilizers on unpaved access roads and parking areas.
    4. Sweep paved access roads and parking areas daily.
    5. Sweep streets daily if visible material is carried onto adjacent public streets.

4. **Discovery of Prehistoric or Archaeological Resources.** If cultural resources are encountered during construction activities, the contractor on site shall cease all work in the immediate area and within a 50 foot buffer of the discovery location. A qualified archaeologist, as well as the Tribal Historic Preservation Officers for the Bear River Band Rohnerville Rancheria, Blue Lake Rancheria, and Wiyot Tribe are to be contacted to evaluate the discovery and, in consultation with the applicant and lead agency, develop a treatment plan in any instance where significant impacts cannot be avoided. Prehistoric materials may include obsidian or chert flakes, tools, locally darkened midden soils, groundstone artifacts, shellfish or faunal remains, and human burials. If human remains are found, California Health and Safety Code 7050.5 requires that the County Coroner be contacted immediately at 707-445-7242. If the Coroner determines the remains to be Native American, the Native American Heritage Commission will then be contacted by the Coroner to determine appropriate treatment of the remains pursuant to PRC 5097.98. Violators shall be prosecuted in accordance with PRC Section 5097.99.

5. **Expiration and Activation of Permit**. This permit shall expire within 24 months from the date of its approval unless said permit is activated. "Activated" shall mean when grading/soil disturbing or construction activities authorized by this permit have commenced. This permit may not be extended except as permitted by Arcata Land Use Code (LUC) §9.79.070 Permit Time Limits, Extensions and Expiration, or its equivalent.

6. **APPEALS.** The actions described herein may be appealed per the provisions of Arcata Land Use Code (LUC) Chapter 9.76 Appeals. Appeals shall be filed with the Department or City Clerk, as applicable, within ten (10) business days following the date of the HDRC action that is being appealed per LUC §9.76.030. Appeals shall be submitted on the prescribed form and shall state the reasons for the appeal. The filing fee set by the City Council shall accompany appeals. The appeal period ends 5:00 pm on March 31, 2016.

EFFECTIVE DATE OF THIS ACTION: This permit becomes effective on the next working day after the appeal period.

Subject:	Comments for preparation for the Gateway Plan EIR
Date:	Monday, March 07, 2022 5:00:16 PM

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

According to Sibley Guides and the Audubon Society, currently the greatest threats to avian life are collisions with windows and glazing built in and adjacent to natural habitat. Considering with Gateway Plan you are asking for approval to allow developers to erect windowed walls along Jolly Giant Creek, McDaniel Slough, and directly adjacent to the Marsh and Bird Sanctuary, you need to mitigate for this factor. In addition to fatalities from window collision, lighting upper stories contributes to migratory bird confusion. This potentially leads to exhaustion and increased chance of predation.

To satisfy community concern and groups like Redwood Region **Audubon Society and Friends of the Arcata Marsh** you will need to incorporate the Audobon Bird-Safe Building Guidelines (or similar, not written by developers) and monitor the plan area for the presence of migratory birds (during migration season).

The other consideration for the EIR is the ratio of EV charging stations to units built. Currently the plan has no requirements for EV charging as conditions for approval. It essentially relies on developers to make the choices that will bring this community closer to netzero emissions. Therefore Gateway Plan is likely to have a devastating effect on carbon emission levels for the City of Arcata and the cancer-causing pollution associated with those emissions (among other dangers to respiratory and reproductive systems) . Gateway Plan is moving this community to greater fossil fuel emissions, not to mention moving in a similar direction with super-sizing the infrastructure towards sea-level instead of looking to higher ground.

Gateway Plan uses lofty bureaucratic transportation goals to claim that it is an environmentally responsible plan. When those hopes go unrealized, it will ultimately degrade the environment and put the inhabitants of our local ecosystems at risk. It does this by encouraging building in some of the lowest elevations in Arcata that are in and adjacent to migratory bird routes, and increases fossil fuel emissions making it harder to reach netzero emissions.

Please respond to this email to confirm it was actually read, and please ask for clarification if there is something that wasn't made clear.

Comments on City of Arcata GPU, Gateway Area Plan Element

General support for: infill [higher density] over sprawl [larger residential lots]; connectivity [Cal Poly Humboldt-plaza-creamery and all GAP]; transportation routes and structures that make it safer, easier, faster to move around using non-motorized means [walk, uni- bi- tri-cycle, skateboard]; mixed use over traditional residential separate from commercial; parks, natural vegetation along creeks; 20 year master plan over piecemeal development.

Questions/Concerns/Suggestions

Building heights/multiple story setbacks/incentives for more stories:

- 5 story maximum with one exception [one bldg. in Barrel district with a 6th story for a restaurant with 360 degree view]; the tallest building in the GAP now is the tallest cement bldg. that was part of the old creamery and it appears to be about 5 stories tall;
- Multiple story setbacks should start with the second story on some bldgs and with the third story on others; these can be staggered to increase sunlight and spatial feeling for residents; the setback area could be designed for rooftop gardening;
- Incentives for more stories need to be substantial e.g. mixed types of units within one bldg [some SROs, studios, 1, 2, 3 bedroom apartments with a mix in each story]; adequate EV chargers to service all residents in the bldg; net zero precipitation runoff; energy storage for solar; solar micro-grid development in the Barrel district; incorporate a distributed waste water system so that waste water is not added to the existing marsh system. When the above incentives are more costly for developers, reduce permit fees.

Establish procedures to maintain low cost rents/ownership for all units in GAP.

Zoning/code requirements: electrification of all units [thermal heat pumps and hot water heat pumps that use natural refrigerants because they have the lowest GWP, e.g. carbon dioxide], rooftop solar maximized on all units, insulation of external walls and roofs that exceeds Title 24 requirements, sound deadening insulation for internal walls.

Sea Level Rise (SLR): What are the plans for flooding of creeks which will become more frequent with more atmospheric rivers in conjunction with SLR? What are the plans to handle emerging ground water [SLR pushes up fresh water in the soil]? With the current increasing rate of global GHG emissions, SLR will reach 8 ft probably sooner than expected and will be lapping at the Barrel district edge on Samoa Blvd. What are the plans to handle this? Evacuation routes for earthquakes or tsunamis for 2,000-3,000 more units housing 4,000-6,000 more people?

8. User Changes to Default Data

Screen	Justification
Operations: Hearths	No woodstoves or gas stoves
Characteristics: Project Details	Within City Limits
Land Use	2.36 persons per household. Default Lot Acreage and 39,500 ksf non-residential. Assumed 50/50 split btwn General Office and Retail.1.6 acre Community Square, assumed 90% landscaped. Landscape Area for Residential, Commercial, Retail and Parking unknown.

1.3. User-Selected Emission Reduction Measures by Emissions Sector

Sector	#	Measure Title
Transportation	T-27	Implement Transit-Supportive Roadway Treatments
Transportation	T-34*	Provide Bike Parking
Transportation	T-37*	Dedicate Land for Bike Trails
Energy	E-1	Buildings Exceed 2019 Title 24 Building Envelope Energy Efficiency Standards
Energy	E-12-A	Install Alternative Type of Water Heater in Place of Gas Storage Tank Heater in Residences
Energy	E-12-B	Install Electric Space Heater in Place of Natural Gas Heaters in Residences
Energy	E-13	Install Electric Ranges in Place of Gas Ranges
Energy	E-15	Require All-Electric Development
Energy	E-24*	Provide Battery Storage
Energy	E-25*	Install Electric Heat Pumps
Water	W-7	Adopt a Water Conservation Strategy
Waste	S-4*	Recycle Demolished Construction Material
Natural Lands	N-5*	Establish a Local Farmer's Market
Area Sources	E-14	Limit Wood Burning Devices and Natural Gas/Propane Fireplaces in Residential Development

* Qualitative or supporting measure. Emission reductions not included in the mitigated emissions results.

Appendix A	Review Procedure and Criteria for accepting “Potentially Historic Resources” into the record (Adopted by HLC July 27, 2022)

I. Introduction

The **Gateway Area Historic Resources Inventory** considers "notable" and potentially significant historical resources within the proposed Gateway Area based on findings, available research, and "windshield level" field reconnaissance observations. This study includes a summary of the City's existing historic resource preservation framework (survey and evaluation history, General Plan and zoning ordinance), survey methodology and results, findings, recommendations, and available resources.

Gateway Area historic resource identification and preservation is integrated within the City's existing preservation framework. The Gateway Area historic resources designation eligibility and recommendations may be further evaluated and refined by the City in accordance with adopted review criteria. Available incentives and opportunities to encourage and highlight preservation and the protection of historic public and private properties through coordination with City departments, non-profit organizations and other associations are also included.

This inventory was prepared by Gerry Takano, an independent preservation consultant, formerly president of TBA West, Inc., a firm providing architectural and planning services, for 12 years. He has served as architect/planner for the Western Regional Office of the National Trust for Historic Preservation in San Francisco, overseeing programs, strategic direction and advocacy for the preservation of historic resources in the Western U.S. The primary focus of his work is historic preservation, planning, urban design, governmental compliance, guidelines, and historic resource assessments.

Mr. Takano received his B.A. in Architecture from Syracuse University and graduated from the Harvard University Post Graduate Special Program in Preservation. His Humboldt County experience includes Town of Samoa & Town of Scotia historic district design guidelines.

II. Executive Summary

This Study's Gateway Area recommendations, intended as public information, identify potential historic resources in the Gateway Area, explain the survey methodology, and consider what may be involved when Gateway Area historic resources are proposed for changes or development. This Study is intended to function as a guide for future development in the Gateway Area by identifying buildings important to the community's preservation ethos, and ensuring these buildings receive adequate

review as part of the City entitlement process. Conversely, this Study can serve to simplify development review for buildings within the Gateway Area that were determined to not have significance as a potential historic resource.

The Gateway Area Plan is a proposed new Element of the Arcata General Plan. The Arcata General Plan's existing Design and Historic Preservation Elements, though also not mandated by state planning law, guide the Gateway Area's community appearance and character. Policies have been codified addressing community-wide design features and criteria pertinent and essential for the preservation of Arcata's historic resources. These policies define subsequent regulations and codes to accommodate preservation of Potentially Significant Historic Resources within the Gateway and other areas. In cases when owners may desire to add their property onto the "potentially significant historic resource" list, procedures are set forth and linked to the City of Arcata's regulations. If an owners' intent is to develop, modify or demolish their historic resource within the Gateway Area, Arcata processes and protections are in place.

Key recommendations for the Gateway Plan's protection and preservation of Potentially Significant Historic Resources, though not limited to, are as follows:

1. Provide a Gateway Area master list of designated local historic landmarks and potentially significant historical resources.
2. Evaluate historic resource-specific procedures, including historic resource criteria for accepting potentially historic resources into the record.
3. Integrate with proposed Gateway Area policies and existing City regulatory procedures and codes. If funding becomes available, provide additional City staffing to address historic preservation procedures and to increase awareness, promotion, and guidance.
4. Interface with Gateway Area's "form-based planning and tiering" incentives such as transfer of development rights (TDR), Mills Act, Historic Building Code and other preservation opportunities.
5. Strengthening preservation in Arcata and the Gateway Area may require changes within City procedures and will require support from the Mayor, Council, and City Departments.

III. Methodology and Findings

This Study includes two steps of review for determining the significance of potentially historic resources. Step one included a broader review of existing literature as well as

a reconnaissance level survey undertaken by Gerry Takano and two additional out-of-area staff; step two involved refinements to the list based on review undertaken by local preservation experts seated on the Historic Landmark Committee's standing survey subcommittee.

The survey's review of "potentially historic resources" centered around the application of four criteria of significance of Noteworthy Structures, drawn from the City's Historical Preservation Element (General Plan 2020). As noted in the Historical Preservation Element, Noteworthy structures are those which may not have complete documentation as to their historical or architectural merit, but which have notable characteristics.

This historic resources inventory utilized both a literature review and a reconnaissance-level architectural survey to determine potential significance, with an emphasis on architectural characteristics visible from the public right of way (additional detail on survey and study methodology is outlined in greater detail below). Properties that clearly met the outlined criteria were included, as well as properties that were subject to interpretation, requiring further discussion and analysis by the survey subcommittee of the City's Historic Landmarks Committee. In order to be included in the original survey list, structures were required to exhibit one of the following attributes:

1. Representative of a particular architectural style.
2. Representative of a period in the city's historical development.
3. Associated with social history of the city.
4. Of unusual or special design character.

The Study's initial list included 54 buildings, eight of which are existing Landmark status properties. The remaining 46 buildings were reviewed and refined further in step two, summarized below and discussed in further detail in Appendix A.

1. 453 F Street
2. 493 G Street
3. 467 G Street
4. 494 H Street
5. 415 I Street
6. 513 I Street
7. 545 I Street
8. 589 I Street
9. 511 J Street
10. 609 J Street
11. 885 K Street
12. 879 K Street
13. 824 L Street
14. 1200 M Street
15. 1215 M Street
16. 1220 M Street
17. 1244 M Street
18. 1265 M Street
19. 1088 N Street
20. 1062 N Street
21. 1060 O Street
22. 885 5th Street
23. 767 5th Street
24. 1073 5th Street

25. 1093 5th Street
26. 1093 5th Street A
27. 1009 6th Street
28. 1188 7th Street
29. 1031 6th Street
30. 1047 6th Street
31. 1112 7th Street
32. 1136 7th Street
33. 1162 7th Street
34. 1288 9th Street
35. 1380 9th Street
36. 1251 9th Street
37. 1352 10th Street
38. 1168 10th Street
39. 1335 10th Street
40. 1422 10th Street
41. 1498 10th Street
42. 1499 10th Street
43. 1340 10th Street
44. 1285 11th Street
45. 1164 11th Street
46. 1144 11th Street
47. 1116 11th Street
48. 1459 11th Street
49. 1296 11th Street
50. 1102 12th Street
51. 1189 12th Street
52. 900~940 Samoa Blvd.
53. 990 Samoa Blvd.
54. Northwestern Pacific Railroad Company Railway Line

The eight sites already protected with local, state, or national landmark status include:

1. 453 F Street
2. 493 G Street
3. 494 H Street
4. 513 I Street
5. 609 J Street
6. 885 K Street
7. 824 L Street
8. 1188 7th Street

Step One of The Study's methodology included the following:

- Draft Gateway Area Plan review with particular attention to proposed form-based zoning, land use, areas for future development and parameters related to the historic preservation component (reviewed Dec. 2021 Draft). Also, analyze "streamlining" procedures, Chapter 9 Design and Architectural Standards and Chapter 10 Historic Resources section.

- Investigated ways to integrate "historic resource" findings and provisions within the intent of the Gateway Area Plan, including parcel development, tiers, historic resource requirements, guidelines, incentives, and application/review procedures.

- Conducted reconnaissance level survey February 23-24, 2022 with on-site street level photographs and verification of designated, potential (as previously identified) and new sites. Provided basic architectural descriptions, identification of architectural style, resource modifications, integrity and a preliminary evaluation of significance.

- Reviewed existing studies, including the City's existing historic resource preservation framework, surveys, evaluation history, and definitions. Assessed the previously proposed "Approach for City Historic Preservation", Neighborhood Conservation Area and other documents. Reviewed the City's memorandum on the "Approach for City Historic Survey" and existing historic studies including the Suzie Van Kirk survey (1979).

- Review and incorporate relevant Arcata Historic Context Study information, March 2012.

- Gathered information from Arcata preservation "stakeholders" and contacts including Humboldt County Historical Society, Cal Poly Humboldt, City of Arcata Historic Landmarks Committee, and others.

- Prepared preliminary draft Gateway Area Potentially Significant Historic Resources inventory and recommendations based on existing information and the Reconnaissance Level survey, which considered State and local context and Gateway Area themes.

- Drafted database and analysis summary chart to identify designated and potential Gateway Area "historic resources".

- Reviewed how proposed form-based planning relates to "historic resources" preservation, such as in-fill development, alternative construction methods, materials, transfer of development rights, etc.

- Considered the role of design reviews, the Planning Commission, Historic Landmarks Committee, Community Development Department and the City of Arcata in the process.

- Provided ways to consider Historic Preservation Guidelines and Standards and utilize appropriate Preservation benefits for the Gateway Area, including resource links for economic and other incentives such as the Mills Act tax abatement.

Background. Existing resources provided important context and background for Step one of the Study and survey process, as outlined below.

As of 1998, there are three designated National Register sites including the Arcata Hotel (on the Plaza), the Whaley House (14th and H Streets), and the Schorlig House (1050 12th Street). The Jacoby Storehouse is listed in the State of California's registered Historical Landmarks. None of these are located in the Gateway Area.

Local level historic landmarks are distinguished as Arcata structures or sites with special character or special historic, architectural, or aesthetic interest or value. These criteria are appropriate for the Gateway Area. Potentially Significant Historic Resources, consistent with the City list, are protected from demolition and inappropriate alterations. Local level listing Criteria, including the Gateway Area, are:

- The building or site is particularly representative of a distinct architectural period, type, style, or way of life.
- The building is of a type or style which was once common but is now rare.
- The building is at least 50 years old.
- The building or site is connected with a person or event important to local history.
- The architect or builder is famous or well-recognized.
- The building's style, construction method, or materials are unusual or significant.
- The overall effect of the design or building details are beautiful or unusual.
- The building contains original materials or workmanship of high or unusual value.

In July 2022, the Historic Landmarks Committee adopted review procedures and criteria for the formally accepting potentially historic resources into the record (see Attachment A).

Per the current **Historical Preservation Element**, Section H-2a, the City shall maintain a citywide "Noteworthy Structures" list , including the Gateway Area.
The Gateway Area historical buildings inventory is consistent with the four periods of residential building styles as stated in the City of Arcata's historic preservation policy. Industrial, commercial and other styles have been adapted to these periods *(see: https://www.cityofarcata.org/175/Historic-Preservation)*:

- Settlement (1850 - 1885)
- Transitional (1900 - 1910)
- Victorian (1885 - 1900)
- Craftsman (1910 - 1930)

The Historic Landmarks Committee determined styles that fall under a larger ""Modern" style type (1930 – present) should be included in the survey if determined to

have sufficient integrity and significance, even though the Van Kirk 1979 report does not cover sites after 1930. Although this category is not included in the current adopted General Plan Element, it is proposed to be included in the General Plan 2045 Update.

Historical and cultural patterns of development for the Gateway area are defined within The **City of Arcata Historic Context Statement** by Guerra & McBane March 2012, addresses historical themes and concepts of building, structures, objects and sites as assessed and identifies historical significance as defined in the US National Register, state and local preservation programs. and local historic property registration programs. Several themes for Arcata, all to some degree appropriate for the Gateway area, span prehistory to the modern period and are designed to reflect the diversity of the peoples of the United States. The thematic framework, adopted in 1936, was conceived in terms of the "stages of American progress" and focused mainly on the achievements of military and political figures.

In 1991 the US Congress revised the thematic framework to incorporate three historical building blocks: People, Time, and Place. People, the primary agents of change, includes a variety of people who have populated Arcata's past with consideration of the variables of race, ethnicity, class, and gender. The local and regional experience became important in order to build an appreciation for our national story as key concepts overlapped to shape varied histories. Themes also relevant to the Gateway Area include:

- **Social institutions and movement themes** for Arcata include diverse formal and informal structures such as schools or voluntary associations through which people express values and live their lives. Americans generate temporary movements and create enduring institutions in order to define, sustain, or reform these values. Both the diverse motivations people act on and the strategies they employ are critical concerns of social history.

  This category also encompasses temporary movements that influenced American history but did not produce permanent institutions such as the reform movement of the WCTU, clubs and organizations, reform movements, religious institutions and recreational activities. Themes, expressing unique culture and people's values beliefs about themselves and the world they inhabit, includes educational and intellectual currents, visual and performing art, literature, mass media, architecture, landscape architecture, and urban design, popular and traditional culture. Shaping the political landscape encompasses tribal, local, state, and federal political and governmental institutions that create public

policy and those groups that seek to shape both policies and institutions. Developing the American economy theme reflects the ways Americans have worked, including slavery, servitude, and non-wage as well as paid labor. It also reflects the ways they have materially sustained themselves by the processes of extraction, agriculture, production, distribution, and consumption of goods and services. In examining the diverse working experiences of the American people, this theme encompasses the activities of farmers, workers, entrepreneurs, and managers, as well as the technology around them.

- **Technology**, as a theme, is the application of human ingenuity to modification of the environment in both modern and traditional cultures, such as 19th century innovations in logging technology or the City's innovative wastewater treatment system and the Arcata Marsh Project.

- **Transforming the Environment** theme examines the variable and changing relationships between people and their environment. The environment is where people live, the place that supports and sustains life, including cities, suburbs, towns, countryside, forest, wilderness, and water bodies. The use and development of the physical setting is rooted in evolving perceptions and attitudes. While conservation represents a portion of this theme, the focus is on recognizing the interplay between human activity and the environment.

IV. Historic Landmarks Committee Review

Review by the Historic Landmarks Committee was intended to refine the list down to only the best and most representative examples of unlisted, potentially historic resources within the Gateway Area. As the identification of a building as "potentially historic" is a non-voluntary action of the City, staff and decision makers chose to set a high threshold for inclusion.
It is important to note that sites captured in step one but removed in step two could still voluntarily apply for Landmark status if desired, by providing evidence of potential significance for City review.

Step Two of The Study's methodology included the following:

- Subcommittee review on May 13, 2022. Developed and applied draft refined review criteria with a focus on integrity and rarity of the resource type. 27 unlisted sites removed from inventory, and five sites identified as warranting further discussion by whole subcommittee.

- Full Committee review on July 27, 2022. Included review of both the subcommittee's recommended sites as well as the subcommittee's proposed review criteria for list refinement.
- Full committee review of additional sites brought forward by members of the public was undertaken August 18, 2022. No additional sites were added.
- Final recommendation to the Planning Commission included both adoption of the review criteria and 11 currently unlisted potentially historic resources, exhibiting the following styles. The seven properties already protected by historic landmark overlays were also included as part of the committee's recommended inventory and include three Settlement period buildings.
    - Victorian
    - Transitional
    - Craftsman
    - Modern (included one "Early Modern Style" property)

The Study's initial list was refined to 18 new buildings alongside the eight existing Landmark status properties. These resulting 26 sites are recommended to be subject to applicable Citywide preservation policy, as well as the "Historical Resources" section of the Gateway Area Plan. Please note the Northwestern Pacific Railway Line has previously been determined to be potentially historic by the California Department of Transportation.

V. Compliance and Interface with the Gateway Area Plan Policies

The character of Arcata is derived from the architectural styles of its buildings, particularly of older historical residences and commercial buildings near the City's center. Currently, most buildings are small in scale and only a few buildings are three stories or more in height.

Arcata Gateway Historic Resources treatment is defined in the Gateway Area Plan goals and policies. In accordance with the Plan's Design and Architectural Standards

section, the Gateway Plan Area design character of new developments and historic resources capitalizes on a mixture of building forms and types that reflect Arcata's evolving economic activity and conditions, as many Plan Area properties are former industrial lands associated with lumber processing.

Some of these properties have been redeveloped or adaptively reused, while others are in various stages of underutilization and disrepair. The eastern boundary of the Plan Area is three blocks from the Arcata Plaza, with the form and character of buildings in this area reflecting their proximity to Arcata's central core. More specifically, Gateway Area Plan existing design character includes the following:

Block Pattern: Arcata's grid block pattern extends into the eastern portion of the Plan Area. This block pattern is interrupted on western side of the Plan Area, particularly in areas south of 8th Street and north of 11th Street.

Site Layout. Buildings are located on sites in a range of configurations, including structures built directly adjacent to property lines and sidewalks, building setback 10-15 feet from the sidewalk behind landscaping, and building located deep within properties with little relationship to the street. Some primary building entrances are oriented towards the street, while others are inward-facing.

Building Heights and Intensity: Most buildings are one story, with some two-story buildings. The Creamery Building tower is the tallest structure in the Plan Area (over 50 feet). Some lots are either vacant or contain little habitable space. The floor area ratio (FAR) of individual properties is generally less than 1.0.

Building Character: The overall character of buildings reflects the function for which the building was originally constructed. For many of the older non-residential buildings, this is a utilitarian light-industrial character. For buildings that have been adaptively reused, the original character remains though the use has changed. The Plan Area contains several distinctive landmark structures such as the Creamery Building and Portuguese Hall.

Parking Placement and Design: On-site parking, where provided, can be found to the side or behind buildings, or in front of buildings as last option. Most on-site parking area is hardscape, and permeable wherever possible.

Facade Design. Industrial and heavy-commercial buildings typically incorporate minimal architectural detailing. Older residential structure feature stylistic features

typical of their period. Street-facing building frontage design are varied, ranging from residential porches, commercial storefronts, truck loading bays, to vinyl-clad blank walls.

Infill Development. The concept of infill development is central to the Gateway Area vision. The application can also be applied to appropriate historic resource sites. “Infill development” refers to building within unused and underutilized lands of the Gateway Area and existing development patterns. Infill development is critical to accommodating growth and redesigning our cities to be environmentally and socially sustainable.

Recommendation related to identifying current Arcata Preservation Plans, Policies and Ordinance Inconsistencies and Variability.
Along with Gateway Area Plan implementation, it is highly recommended that all existing City of Arcata policies, plans and ordinances related to Arcata’s historic preservation of potentially significant resources be re-reviewed and revised for consistency in order to accommodate public and staff utilization. Definitions of relevant terms must also be coordinated, updated and reviewed regularly. An attorney with knowledge of preservation law is highly recommended.

Document Gateway Area “Potentially Significant Historic Resources,” including the Arcata Context Statement and resources formally designated by ordinance as local historic landmarks.

Gateway Plan Historic Resources The Gateway Historic Resources list provides guidance to property owners, developers, decision-makers, staff, and the public for treatment of “potentially significant historic resources”. Applicable guidelines and standards ensure that Gateway Area changes are made in accordance to existing preservation plans, policies and ordinances (codes) to streamline design and development proposal reviews subject to City decisions and approvals.

Exterior modifications, alterations and proposed demolition to sites currently on the Gateway Area list of “potentially significant historic resources”, including properties on the Local, State or National Registers, require review by the City of Arcata. This also includes review of new construction and infill projects deemed to have possible impacts on identified historic resource(s).

VI. Historic Resource Treatment Program

Working with the City of Arcata Planning Department staff, property owners should establish a reasonable building treatment strategy for maintenance of existing historic elements, repair of deteriorated materials, replacement of missing features and construction of new additions, essentially to maintain the resource in good condition. Appropriate treatment for character-defining features of a historic resource is that the highest degree of integrity should ideally be maintained. Preservation treatments, based on National recommendations include:

- **Treatment 1:** Preserve If a feature is intact and in good condition, maintain it as such.
- **Treatment 2:** Repair If the feature is deteriorated or damaged, repair it to its original condition.
- **Treatment 3:** Replace If it is not feasible to repair the feature, then replace it in kind, (e.g., materials, detail, finish). Replace only that portion which is beyond repair.
- **Treatment 4:** Reconstruct If the feature is missing entirely, reconstruct it from appropriate evidence, or a simplified interpretation may be considered. Also, if a portion of a feature is missing, it can also be reconstructed.
- **Treatment 5:** Compatible Alteration If a new feature (one that did not exist previously) or addition is necessary, design it in such a way as to minimize the impact on original features. It is also important to distinguish new features on a historic building from original historic elements, even if in subtle ways.

Additions, compatible with the main building and relate to the building in mass, scale, character and form, should appear subordinate to the main structure. Roof forms should be compatible and additions should not damage or obscure architecturally important features.

A degree of flexibility in making alterations to help sustain the property, such a retrofit for seismic improvement, is allowable. Such decisions are based on the significance of the property, its location, and how the alteration will affect the integrity of the resource. In consideration of how the change will affect the overall character of the resource, the following treatments should also be discussed with the City of Arcata and/or qualified consultants.

Industrial Resource Facades. An industrial rehabilitation project should preserve character-defining elements as best as possible. These can include storefront original features, transoms, industrial metal sash and operable wood windows, canopy structures, siding/ sheathing and roof forms. Repair an altered building facade to its

original design or use a simplified interpretation of similar components in the area to continue the character and appropriate proportions. An addition should be compatible in scale, materials and character with the main building. An addition should relate to the building in mass, scale and form. Alterations should not damage or obscure architecturally important features. Additions should be set back from primary, character-defining facades.

VI. Potential Incentives for Historic Resources

The City of Arcata is appreciative of property owners who enhance the Gateway Area by preserving, revitalizing and caring for historic resources. Because the preservation effort involves a dedicated economic commitment and attention to a standard of realistic treatment, incentives may be available. Please consult the Arcata Planning Department staff for more details and ways to participate in these efforts, including but not limited to:

Federal Incentives Federal Historic Preservation Tax Incentives. The Preservation Tax Incentives reward private investment in rehabilitating historic properties such as offices, rental housing and retail stores. A tax credit differs from an income tax deduction. An income tax deduction lowers the amount of income subject to taxation. A tax credit, however, lowers the amount of tax owed. Tax credits are awarded for the certified rehabilitation of qualifying historic structures.

California Incentives State Historical Building Code. Revitalization of historic resources are often incompatible with standard building codes. Alterations required to bring them up to code can be costly and extensive, often even harming the historic integrity of the resource. Allowing historic structures to comply with codes that are more flexible or designed specifically for historic properties can often result in higher quality preservation projects. The State Historical Building Code allows a community to approve reasonable alternatives to standard building and mechanical requirements for buildings officially on the Notable and Significant Historic Resources List as having historic value. The SHBC is a performance code rather than a prescriptive code to provide a framework within which unique solutions may be custom tailored to the specific problems related to each historic resource. Also, standard building code, requiring full upgrading of the facility, do not exist for qualified historic buildings.

Grants to Certified Local Governments. The City of Arcata could consider establishment of an Arcata Certified Local Government (CLG). A CLG is a local government whose historic preservation program has been certified by the Office of

Historic Preservation and the National Park Service to strengthen the federal/state/local partnership. the Historic Preservation Fund (HPF), a line item in the federal budget, provides an annual grant to each state historic preservation office. At least ten percent of the state's annual HPF allocation is passed through to CLGs on a competitive basis. HPF grants are awarded to CLGs on a 60/40 (federal/local) matching basis. It is worth noting that Community Development Block Grant (CDBG) funds, discussed elsewhere in this document, are federal funds that may be used as local match for federal grants such as CLG grants Further Information:
California's CLG Program: https://ohp.parks.ca.gov/?page_id=21239
National CLG Program: https://www.nps.gov/subjects/clg/index.htm

Mills Act. The Mills Act is a California Property Tax Abatement to provide property tax relief in preserving designated historic resources in Arcata, California. The Mills Act program allows for the voluntary creation of a contract between a private property owner and the city or county to provide a reduction in property taxes. The property tax relief is calculated by the county assessor using the capitalization of income method to reflect the Mills Act restrictions placed on the property. Mills Act properties are subject to annual reassessments by County Assessors which may result in slight increases in property taxes each year. Further Information: contact the Arcata Planning Department and visit www.ohp.parks.ca.gov/default.asp?page_id=21412 OHP Technical Assistance Series #12 Other Incentives Tax .

Deduction for Facade Easements. A facade easement is a charitable tax deduction available to owners of historic buildings for donating a facade easement to a nonprofit, publicly supported organization. In return for a deduction on federal income taxes, property owners authorize the nonprofit organization to review exterior alterations to the building.

TDR and TFAR programs. Transfer of Development Rights (TDR) and Transfer of Floor Area Rights (TFAR) are economic incentive programs that help direct new development away from sensitive areas, including parcels identified as Notable and Significant Historic Resources. TDR is a market-based tool that redirects development from historically or ecologically sensitive areas to more appropriate areas. Essentially, TDR and TFAR programs help relieve market pressures from low and medium rise historic buildings by permanently removing their development potential. These types of programs make historic preservation more financially viable. All TDR programs involve "senders," who voluntarily sell the development rights of a "sending parcel" to a "receiving parcel."

Appendix A
Adopted July 27, 2022

Review Procedure and Criteria for accepting "Potentially Historic Resources" into the record and for inclusion in the General Plan, as appropriate

Staff requests the committee formally adopt the following method for formally accepting sites into the record as containing potentially historic resources. The ongoing process for review will be as follows:

1. Approve sites with unanimous vote of the full Committee, approving the addition of each site.
2. Support the stance that non-voluntary identification of a building, structure, object, or site, or district as potentially significant must require a higher threshold of significance than voluntary listing as a local landmark property.
3. Adhere to previously identified sites where research has already been undertaken by a historic resources professional through a formal survey process.
4. Adhere to historic styles identified in the Susie Van Kirk's survey and Arcata's General Plan, which are limited to: Settlement, Craftsman, Victorian, and Transitional styles.
5. Adhere to the criteria outlined below for evaluation.

In order to be eligible for listing, a structure should have at least one of the following attributes, with a focus on design and architectural character. In addition to the requirement of fitting one or more of the following four criteria, the site must meet the thresholds set for age, rarity, condition, integrity, and significance, as described below.

1. *Representative of a particular architectural style identified in the City's Historical Preservation Element (Settlement, Victorian, Transitional, Craftsman).*
2. *Representative of a period in the city's historical development as identified in the City's Context Statement.*
3. *Associated with social history of the city as identified in the City's Context Statement.*
4. *Of unusual or special design character.*

In addition to the above criteria, eligibility for enacting historic protections shall also involve examining the property's age, significance, abundance, condition, and integrity.

Age and abundance: Is the property 50 years of age or greater? If so, is it either 1) a truly excellent and representative example of a common type of structure typical of one of Arcata's protected architectural eras (Settlement, Victorian, Transitional, Craftsman), or 2) a truly excellent example of a unique or unusual architectural style not commonly represented in the City of Arcata?

Condition and Integrity: Is the property old enough to be considered historic (generally at least 50 years old) and does it still look much the way it did in the past? Does it retain sufficient integrity, defined as both its similarity to its original construction and its retained ability to convey its significance, considering aspects of location, design, setting, workmanship, materials, feeling, and association?

Quality of Significance/Distinguishing Characteristics: Is the property associated with an important historic context as identified in the City's Historical Preservation Element or in the City's Historic Context Statement? For example, is the site associated with persons, events, activities, or developments that were important in the past? Does the site have the potential to yield significant information through archeological investigation about Arcata's past, or contain other characteristics that set it apart from similar resources?

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GHD Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

San Francisco, CA 94111
Contact: Matt Tolley

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by GHD Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA

Project: 11228577.5.3.5 - Arcata, CA

Coordinates:

Latitude:	40.870322 40° 52' 13" North
Longitude:	-124.091789 -124° 5' 30" West
UTM Zone:	Zone 10 North
UTM X Meters:	407998.33

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ..... State Response Sites

Lists of state and tribal leaking storage tanks

INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST ..... Underground Storage Tank Listing
INDIAN UST ..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

VCP ..... Voluntary Cleanup Program Properties
INDIAN VCP ..... Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

BROWNFIELDS ..... Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT ..... Waste Management Unit Database
SWRCY ..... Recycler Database
HAULERS ..... Registered Waste Tire Haulers Listing
INDIAN ODI ..... Report on the Status of Open Dumps on Indian Lands

Exclusive Recovered Govt. Archives

RGA LF ---- Recovered Government Archive Solid Waste Facilities List
RGA LUST ---- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 3 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 58 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 22 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 26 SWEEPS UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 37 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 52 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Violations:

Site ID:	101359
Site Name:	Cahill Spirit - Gas Station
Violation Date:	02-28-2019
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	OBSERVATION: Three year testing of overfill prevention not performed. CORRECTIVE ACTION: Conduct testing within 30 days and submit verification.

Citation:	23 CCR 16 2643(b)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2643(b)(1)
Violation Description:	Failure of the automatic tank gauging (ATG) system to perform valid 0.2 gallon-per-hour leak tests or generate hard-copy test reports at least once every 30 days.
Violation Notes:	Returned to compliance on 03/05/2019. OBSERVATION: Owner/Operator did not conduct the 0.2 gph automatic tank gauging test on a single wall tank and/or use the automatic tank gauge to generate and print a hard copy of the 0.2 gph test at least once every 30 days. Several months were lacking a passing test for one or more USTs, all due to insufficient fuel levels to run the ATG test; none for Jan 2019. CORRECTIVE ACTION: Conduct the 0.2 gph automatic tank gauging test on a single wall tank and generate a hard copy of the test results at least once every 30 days. Ensure a passing test is printed for each month.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Latitude: 40.871764
Longitude: -124.095677
Case Type: Cleanup Program Site
Case Worker: ZZZ
Local Agency: HUMBOLDT COUNTY LOP
RB Case Number: 1NHU655
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Dioxin / Furans, Pentachlorophenol (PCP), Diesel, Other Petroleum, Waste Oil / Motor / Hydraulic / Lubricating
Site History: From 1947 to 1965 this property was a lumber mill. In 1965 the mill burned down and the property was only used for lumber storage until 1979. George Schmidbauer purchased the site in 1979. Currently the property contains a housing development along the northeast side of the property, a large commercial building, a daycare center in the former mill offices and an automotive repair facility in the former machine shop. Environmental investigations at the mill have only been conducted on the northern half of the mill property. The southern half of the mill property which contained the main mill building with a green chain, a tepee burner, a diesel engine for water supply and a log pond have not been investigated and continue to be an open clean up site (Schmidbauer Arcata Mill South). Additional investigation and possible cleanup will be required to close the southern portion of the mill property. Site Investigations Environmental investigations of soil and groundwater at the mill began in 1997 and identified a lumber dip tank, wood drying area and petroleum underground storage tanks (USTs)as the sources of soil and groundwater impacts. Numerous soil, groundwater and stormwater samples have been collected at this site. Groundwater has been monitored since 2001. Chemicals of concern included pentachlorophenol (PCP), tetrachlorophenol (TCP), dioxins, total petroleum hydrocarbons as diesel (TPHd) and motor oil (TPHmo). Remedial Actions In 1997, two petroleum USTs associated with the wood shop building were removed and impacted soils were over excavated. Insitu ozone and perozone remediation was conducted in the dip tank and former drying area from 2004 to 2008. Two vitrified clay pipes were identified as potential preferential pathways allowing the shallow groundwater to move off site to the storm drain. These were

SCHMIDBAUER ARCATA MILL (Continued) **S108213196**

capped in place and this stopped the releases to the storm drain. Current Conditions Remediation at the site has lowered concentrations of PCP and TCP in soil and groundwater. Impacts are now limited to a small well defined area. The final RAP proposes natural attenuation with administrative controls including a deed restriction which limits uses in the restricted area to commercial/industrial, prohibits excavation without NCRWQCB notification, and prohibits borings or use of groundwater for water supply. The deed restriction will include a soil and groundwater monitoring plan which is designed to limits worker exposure in the restricted area during redevelopment of the property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
- Site ID: 92908
- Site Name: Apex Auto
- Violation Date: 01-21-2015
- Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
- Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
- Violation Notes: Returned to compliance on 02/18/2015. OBSERVATION: The 55 gallon drum of oily absorbent did not have a label. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Label the container and ensure that all hazardous waste containers are marked with all the required information. Send DEH the "self certification return to compliance" form within 30 days.
- Violation Division: Humboldt County Division of Environmental Health
- Violation Program: HW
- Violation Source: CERS,

- Site ID: 92908
- Site Name: Apex Auto
- Violation Date: 01-21-2015
- Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
- Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
- Violation Notes: Returned to compliance on 02/02/2015. OBSERVATION: Annual training documentation regarding emergency/spill response and safe chemical handling for all applicable employees was not available. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan. Send DEH a copy of the the sign in sheet by February 22.

Violations:
Site ID: 172114
Site Name: Wing Inflatables, Inc.

WING INFLATABLES, INC. (Continued) **S123098091**

Violation Date:	10-19-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 11/09/2017. Did not observe haz waste disposal manifests for last two years of spent MEK/solvent waste. Submit documented proof of disposal for all haz waste generated at facility within last two years to DEH within 30 days along with a "Self certification of return to compliance" form.

Violation Program:	HW
Violation Source:	CERS,
Site ID:	172114
Site Name:	Wing Inflatables, Inc.
Violation Date:	12-03-2015
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 01/20/2016. OBSERVATION: Annual hazardous materials and Emergency Response Plan training for all applicable employees was not conducted. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan within 30 days.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	172114
Site Name:	Wing Inflatables, Inc.
Violation Date:	11-15-2019
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 12/09/2019. OBSERVATION: A 55 gallon drum of waste MEK located in the waste storage area was observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	52460
Site Name:	North Bay Automotive
Violation Date:	05-07-2015
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 07/17/2015. OBSERVATION: Annual training documentation for all applicable employees was not conducted. CORRECTIVE ACTION: Submit a training sign in sheet to the CUPA within 30 days demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan.

Region: STATE
Facility Status: **Open - Assessment & Interim Remedial Action**
Status Date: 12/23/2010
Global Id: T10000002709
Lead Agency: NORTH COAST RWQCB (REGION 1)
Lead Agency Case Number: Not reported
Latitude: 40.870528
Longitude: -124.092514
Case Type: Cleanup Program Site
Case Worker: TNM
Local Agency: Not reported
RB Case Number: 1NHU060
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Diesel, Gasoline
Site History: The site is a former bulk petroleum storage facility that received, stored, and dispensed a wide variety of petroleum products between approximately 1921 and 1972. Historical releases ofpetroleum hydrocarbons have occurred impacting soil and groundwater. Soil and groundwater investigation activities have been completed at the site since 1987, with remedial soil excavation in October 2012.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Program:	HW
Violation Source:	CERS,
Site ID:	45360
Site Name:	Rock Solid 4x4
Violation Date:	09-11-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/17/2017. Observed 3-5 gallon buckets full of waste oily solids and not labeled. Operator is going to dispose of this waste at local haz waste drop off in McKinleyville. When you do this submit a copy of the receipt along with "Self Certification of Return to Compliance" form to DEH. Additionally complete the label on the waste oil tank (currently missing generator name and info, accumulation start date, and epa id number). Label this container within 30 days and submit "Self Certification of Return to Compliance" form to DEH.
Violation Division:	Humboldt County Division of Environmental Health

Violation Notes:	Returned to compliance on 09/04/2014. OBSERVATION: At the time of

NEELY AUTOMOTIVE (Continued) **S123097678**

inspection, it could not be demonstrated that employees who handle hazardous waste were properly trained. The generator must ensure that all employees who handle hazardous waste are thoroughly familiar with proper waste handling and emergency procedures. CORRECTIVE ACTION: Provide training to all employees who handle hazardous waste and submit a copy of the training records to the CUPA by October 4, 2014.

Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 137626
Site Name: Neely Automotive
Violation Date: 09-04-2014
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 09/04/2014. OBSERVATION: The business failed to ensure that appropriate personnel receive initial and annual training regarding emergency/spill response and safe chemical handling. CORRECTIVE ACTION: Submit documentation to the CUPA by October 4, 2014 demonstrating appropriate personnel have received initial and annual training regarding emergency/spill response and safe chemical handling..

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency:	HUMBOLDT COUNTY LOP
File Location:	Not reported
Local Case Number:	12152
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	The former Isackson Ford Motors had two 2,000-gallon gasoline tanks and one 400 gallon waste oil tank.The waste oil tank was exposed, cut in half, cleaned and closed in place on February 25, 1988 under a closure permit approved by the Humboldt County Public Health Department (HCPHD). The two gasoline tanks were removed on October 3, 1989. Several soil borings and two monitoring wells were installed and sampled, and the HCPHD closed the case in 1997.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 07/17/2014. OBSERVATION: Two 55 gallon drums of waste oil did not have labels on them. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Label these containers and ensure that all hazardous waste containers are marked with all the required information within 14 days.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 52111
Site Name: NHUHSD - Arcata High School
Violation Date: 02-02-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to label stationary hazardous waste tanks as "hazardous waste" and mark with an accumulation start date.
Violation Notes: Returned to compliance on 02/26/2018. Observed incomplete labels on Waste oil and Waste antifreeze drums in auto shop. Additionally, no label on small waste solvent/paint thinner container in wood shop. The mobile waste oil containers were missing "Used oil : Drain daily" verbage, as well. All containers of hazardous waste must be labeled with generator name and information, including EPA ID number, hazardous and physical characteristics of the waste, and accumulation start date, Obtain labels for containers missing labels and completely fill out the incomplete labels on the waste oil and waste antifreeze drums within 30 days and submit a signed "Self Certification of Return to Compliance" form to DEH.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 52111
Site Name: NHUHSD - Arcata High School
Violation Date: 12-11-2014
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/11/2014. OBSERVATION: The 55 gallon container of waste oil did not have a label. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6)

NHUHSD - ARCATA HIGH SCHOOL (Continued) **S123102826**

accumulation start date. CORRECTIVE ACTION: Label the container within 14 days and ensure that all hazardous waste containers are marked with all the required information. Send DEH the"Self Certification Return to Compliance" form within the 14 day timeframe.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 52111
Site Name: NHUHSD - Arcata High School
Violation Date: 12-11-2014
Citation: HSC 6.5 25250.19(c) - California Health and Safety Code, Chapter 6.5, Section(s) 25250.19(c)
Violation Description: Failure to retain paperwork documenting disposal of used oil for three years.
Violation Notes: Returned to compliance on 01/21/2015. OBSERVATION: Copies of hazardous waste disposal records for were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Waste oil and used oil filters are being taken to the NHUHSD bus garage but not being documented. Document all hazardous waste drop offs in the future and keep records for the last three years and maintain them on site.

Site Name: NHUHSD - Arcata High School
Violation Date: 12-11-2014
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 01/08/2015. OBSERVATION: Emergency/spill response and safe chemical handling training documentation for all applicable employees was not available. CORRECTIVE ACTION: Submit documentation to the DEH demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan within 30 days.
Violation Division: Humboldt County Division of Environmental Health

CERS HAZ WASTE:

Name:	ARCATA BODY SHOP
Address:	823 Q ST
City,State,Zip:	ARCATA, CA 95521
Site ID:	6480
CERS ID:	10330585
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	6480
Site Name:	Arcata Body Shop
Violation Date:	01-05-2015
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 01/08/2015. OBSERVATION: Inspector observed an unmarked 55 gallon drum in the side yard. Any person who generates a waste shall determine if the waste is a hazardous waste. CORRECTIVE ACTION: Make a hazardous waste determination for the 55 gallon drum within 30 days and if hazardous, manage it according to the Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed by February 7, 2015.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	6480
Site Name:	Arcata Body Shop
Violation Date:	01-05-2015
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/08/2015. OBSERVATION: 5 gallon bucket of waste paint thinner cakes did not have a label. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Label the container within 14 days and ensure that all hazardous waste containers are marked with all the required information. Send DEH the "Self certification return to compliance" form within 14 days.

Address: 1330 Q ST
City,State,Zip: ARCATA, CA 95521
Site ID: 391012
CERS ID: 10154143
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 391012
Site Name: Cypress Grove Chevre, Inc.
Violation Date: 12-12-2017
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 12/19/2017. Observed three waste oil filters stored outside of a closed container on top of a 55 gall waste oil drum. All waste filters must be stored inside a closed container and labeled with the words "Used oil filters" and the date. Obtain a container and label for the oil filters and submit a "Self Certification of Return to Compliance" form to DEH within 30 days.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 391012
Site Name: Cypress Grove Chevre, Inc.
Violation Date: 10-20-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 10/28/2015. OBSERVATION: The Emergency Response Plan and procedures are incomplete. CORRECTIVE ACTION: Complete the emergency response plan template and procedures to include all required content and submit electronically in the California Environmental Reporting System (CERS) within 30 days.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 391012
Site Name: Cypress Grove Chevre, Inc.
Violation Date: 10-20-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 11/17/2015. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page for -Avoid II, Rm 033 chemical room to the CUPA. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS) within 30 days.

Violation Program: HMRRP
Violation Source: CERS,

Site ID: 391012
Site Name: Cypress Grove Chevre, Inc.
Violation Date: 12-12-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 12/19/2017. Observed 2-30 gallon containers of formula 75 (boiler chemical) and a 55 gallon drum of glycol stored in the boiler room. This is above the threshold reporting requirement for a hazardous material (55 gallons) and must be reported on the haz mat inventory on CERS within 30 days. Update your haz mat inventory to reflect these two chemicals stored onsite and submit a "Self Certification of Return to Compliance" form to DEH.

Lead Agency:	NORTH COAST RWQCB (REGION 1)
Lead Agency Case Number:	Not reported
Latitude:	40.868333
Longitude:	-124.08865
Case Type:	Cleanup Program Site
Case Worker:	ZZZ
Local Agency:	Not reported
RB Case Number:	1NHU975
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Arsenic, Diesel
Site History:	FORMER PARKING LOT FOR CAR SALES. CURRENT PARKING LOT FOR COMMERCIAL CUSTOMERS. NO SOURCES FOR CONTAMINATION HAVE BEEN IDENTIFIED IN HISTORICAL OPERATIONS. A PHSE II ENVIRONMENTAL SITE ASSESSMENT WAS PERFORMED DUE TO THE PROXIMITY OF SEVERAL ADJACENT CONTAMINATED SITES. FOUR SOIL AND THREE GROUNDWATER SAMPLES WERE COLLECTED FROM THREE BORINGS DRILLED AT THE SITE. ONE SOIL SAMPLE CONTAINTAINED DIESEL AT 160 PARTS PER MILLION. NO CONTAMINANTS WERE IDENTIFIED IN GROUNDWATER.

Waste Description: SILVER

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D027
Waste Description: 1,4-DICHLOROBENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P085
Waste Description: DIPHOSPHORAMIDE, OCTAMETHYL- (OR) OCTAMETHYLPYROPHOSPHORAMIDE

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U031

CVS PHARMACY #9482 (Continued) **1000978341**

Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200

CVS PHARMACY #9482 (Continued) **1000978341**

Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U204
Waste Description: SELENIOUS ACID (OR) SELENIUM DIOXIDE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

SAFEWAY 0793 (Continued) **1016148144**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Point of Reference:	Entrance Point of a Facility or Station
Highlights:	Former Use: The site has been vacant since the structures were burned in 2001. The former struction on parcel PAN:021-102-004 was believed to have been constructed in the 1930s as an office building. This building also contained various business operations including insurance and dairy offices. In the 1970s and early 1980s this building contained a dry cleaning operation. At the time of the fire in 2001 the building was occupied by NEC and used as an office and library. NEC had resided in the building since 1982 and owned only that parcel. NEC purchased the two additional adjacent property parcels (APN:021-102-005 and 021-102-006) in 2002. The former structure that was on parcels APN:021-102-005 and 021-102-006 was believed to have been built in the 1890s as a "Union Hall Building". It contained various fraternal and business operations until the 1930s, when the building was converted to a tavern with two bowling

NORTHCOAST ENVIRONMENTAL CENTER (NEC) (Continued) **1009569572**

alleys and upstairs apartments. Prior to the 2001 fire the building was operated as a night club and aprtment residences. Another building on neighboring parcel APN:021-102-003 was also destroyed in the fire and dated from the 1940s. That building had been operated as an automotive paint supply business. The burned structures and related debris were removed following the fire. While excavating a concrete pad on the former NEC office property, a 750-gallon UST was discovered. The tank was removed in 2003. Soil from the excavation was stockpiled near the northwestern corner and covered. During the sampling in September 2005, the START noted that the pile is still there and covered with plastic. Excess soil from this investigation was added to the stockpiled soil.

US BROWNFIELDS:

Name:	250 E STREET
Address:	250 E STREET
City,State,Zip:	ARCATA, CA 95521
Recipient Name:	Humboldt County
Grant Type:	Assessment
Property Number:	021-122-007
Parcel size:	1.17
Latitude:	40.8631291
Longitude:	-124.0855059
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	The property is the site of a former rental equipment operation and automotive repair facility. It was recently purcahsed by the City of Arcata and has been subdivided in hopes of developing a portion of the parcel for affordable housing. A 20 bed transitional housing facility is planned. Former Use: The property is a flat partially developed parcel in the city of Arcata. It has historicaly been used for automotive repair and as a rental equipment business. The property has a history of UST and AST releases. The phase II came back clean.

CERS HAZ WASTE:

Name:	GENERAL MACHINE FABRICATIONS
Address:	1795 ALLIANCE RD
City,State,Zip:	ARCATA, CA 95521
Site ID:	119140
CERS ID:	10330855
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	119140
Site Name:	General Machine Fabrications
Violation Date:	05-09-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 05/24/2017. Waste oil drums are missing haz waste labels. Operator communicated an issue with maintaining the labels at the haz waste storage location. Inspector has permitted keeping the label for waste oil in the shed with the jet spray cleaner. Complete haz waste label for waste oil and maintain in the shed from this point on. Send in a return to compliance form when this is complete.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	119140
Site Name:	General Machine Fabrications
Violation Date:	05-09-2017
Citation:	HSC 6.5 25123.3(h)(1)(c) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)(c)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal of acute/extremely hazardous waste after the first 1-kilogram threshold amount was accumulated within a 90 day period.
Violation Notes:	Returned to compliance on 05/24/2017. Observed the last manifest for waste oil pickup to be 5/13/15. Observed approximately one 30 gallon and two 15 gallon drums of waste oil. All are full with the exception of one 15 gallon drum being half full. This is past the 270 day accumulation time limit for onsite storage of haz waste. Have your waste picked up using a licensed haz waste hauler and submit a copy of manifest receipt to DEH along with a "Self certification of Return to Compliance" form.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	119140

GENERAL MACHINE FABRICATIONS (Continued) **S123103314**

Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/07/2015. OBSERVATION: Waste oil and oily solids did not have hazardous waste labels. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Label these containers within 7 days and send DEH the "self certification return to compliance " form. Ensure that all hazardous waste containers are marked with all the required information.

Case Worker:	ZZZ
Local Agency:	Not reported
RB Case Number:	1NHU972
File Location:	Regional Board
Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Diesel, Gasoline, Other Petroleum
Site History:	In January 2009 a discharge of Total Petroleum Hydrocarbons (TPH) as gasoline, diesel, and motor oil was discovered in the basement of the Humboldt Brewery building during remodeling. Initial site assessment documented the presence of TPH as gasoline up to 37 parts per million (ppm), diesel at 130 ppm, and motor oil at 150 ppm in soil. A grab groundwater sample indicated the presence of TPH as gasoline at 91 parts per billion (ppb), diesel at 550 ppb, and motor oil at 240 ppb. Approximately 144 cubic yards of contaminated soil was excavated and removed from the basement of the building. A confirmation soil sample indicated Diesel at 7.3 ppm and Motor Oil at 18 ppm. Four temporary groundwater sampling points were installed for groundwater collection and analysis. Groundwater samples did not indicate the presence of analytes with the exception of one groundwater sample which indicated Tetrachloroethene (PCE) at 4.5 ppb. As PCE is a chemical not associated with the businesses formerly located at the property, it is suspected that the finding of PCE is related to adjacent contaminated sites.

Violations:
Site ID: 99346
Site Name: BO & T - Uniontown Union Gas
Violation Date: 02-21-2017
Citation: 23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 03/17/2017. Designated UST Operator Compliance documents submitted on CERS are outdated. Submit new Designated UST Operator Compliance documents on CERS within 30 days and include Tyler White on certification. Additionally, tank integrity testing is listed as a monitoring method and is not observed to be accurate. CSLD at 0.2 gph testing is historically what facility does to comply with Title 23 CCR's 2643. Update tank monitoring plan for both regular and premium tanks on CERS to include accurate tank monitoring information with in 30 days and submit "Self Certification of Return to Compliance" to DEH.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 99346
Site Name: BO & T - Uniontown Union Gas
Violation Date: 02-21-2017
Citation: 23 CCR 16 2643(b)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2643(b)(5)
Violation Description: Failure of the continuous in-tank leak detection (CITLD) system to function properly.
Violation Notes: Returned to compliance on 03/17/2017. Did not observe evidence of CSLD (0.2 gph test) having been conducted since June of 2016. Single wall tanks must conduct CSLD testing monthly in place of double-wall tank monitoring. Submit CSLD test for the months of February and March, along with a "Self Certification of Return to Compliance" form to DEH within 30 days.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 02/22/2018. Annual refresher training is outdated (1/11/17). ALl employees must be trained after new hire and annually as a refresher. DO indicated training is next week. Submit copies of training to DEH along with a signed "Self Certification of return to Compliance" form within 30 days.

Violation Date:	01-27-2020
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 02/21/2020. Owner operator did not sign acknowledgment of compliance issues section of the Visual Inspection Report. Observed Brandon Pomrehn did not provide ICC certification number on the Visual Inspection Report or on CERs. Within 30 days, submit a copy of a Visual Inspection Report signed by owner/operator. Update CERs with all DO on Owners Statement of Designated UST Operator Compliance Form

Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/17/2017. Observed two 55-gallon drums at facility with unknown contents and no labeling. It was determined that one of the drums holds oily water from spill buckets/sumps. Additionally observed a 55-gallon drum with a haz waste label but the start date was 2010 and the wrong epa id number for this facility (EPA ID for this address is cal000297030). Observed another 55 gallon drum with unknown waste contents, possibly waste oil, with a haz waste label with no information filled out. Additionally observed several cans of paint and thinner that appeared to be waste products with no haz waste labeling, including no accumulation start date. All containers of hazardous waste must be labeled as such with the following info: Generator name and info including epa id, hazardous properties and characteristics, and accumulation start date. Maintain haz waste labels for the facility and correctly and accurately label all hazardous wastes within 30 days. Submit pictures to DEH along with a "Self [Truncated]

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 02/15/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Overfill equipment tested once every three years CORRECTIVE ACTION: Conduct testing of the overfill equipment within 30 days and send a copy of the inspection report to DEH.

Evaluations: No Evaluations Found

CPS-SLIC:
Name: GHERA PROPERTY
Address: 987 H STREET
City,State,Zip: ARCATA, CA 95221
Region: STATE
Facility Status: **Open - Assessment & Interim Remedial Action**
Status Date: 07/14/2017
Global Id: T0602393218
Lead Agency: NORTH COAST RWQCB (REGION 1)
Lead Agency Case Number: Not reported
Latitude: 40.8697426424342
Longitude: -124.086742559525
Case Type: Cleanup Program Site
Case Worker: CSH
Local Agency: HUMBOLDT COUNTY LOP
RB Case Number: 1NHU522
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Under Investigation
Potential Contaminants of Concern: * Solvents, Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History: Not reported

Name: MAIL HAUL INC.
Address: 1800 Q ST
City,State,Zip: ARCATA, CA 95521
Site ID: 59289
CERS ID: 10021963
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 59289
Site Name: Mail Haul Inc.
Violation Date: 01-29-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 01/29/2018. Observed over 55 gallons of waste antifreeze and a 55 gallon drum of oily solids stored onsite but are not listed on the haz mat inventory. ALl threshold quantities of hazardous materials (and 100% increase or more of previously reported hazardous materials) must be listed on the haz mat inventory. This was corrected at time of inspection.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 59289
Site Name: Mail Haul Inc.
Violation Date: 01-29-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 02/20/2018. No documentation of employee training retained onsite in regards to hazardous materials handling and emergency response procedures. All employees must be trained after new-hire and annually as a refresher. Hold a training with all employees who work with hazardous materials and submit documentation of proof of training to DEH along with a signed "Self Certification of

MAIL HAUL INC. (Continued) **S123102902**

	Return to Compliance" form within 30 days.

Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	59289
Site Name:	Mail Haul Inc.
Violation Date:	01-16-2020
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 02/26/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste off-site for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles). Inspector observed one 55 gallon drum of waste oily absorbent over the 270 day time frame. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected within 45 days.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	59289
Site Name:	Mail Haul Inc.
Violation Date:	01-29-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/29/2018. Observed waste antifreeze and waste diesel/water containers missing hazardous waste labels. ALl containers holding hazardous waste must be labeled with generator name and info, hazardous and physical properties of the waste, and the accumulation start date. This was corrected at time of inspection.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	59289
Site Name:	Mail Haul Inc.
Violation Date:	01-29-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during

MAIL HAUL INC. (Continued) **S123102902**

storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 02/20/2018. Observed a 15 gallon waste antifreeze drum to be missing a lid. All containers of haz waste must be kept securely closed except when adding or removing waste. Obtain a lid for this container within 30 days and submit a signed "Self Certification of Return to Compliance" form to DEH.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 59289
Site Name: Mail Haul Inc.
Violation Date: 01-29-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. Site Name:	HPI #21
Violation Date:	09-26-2017
Citation:	HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)
Violation Description:	Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes:	Returned to compliance on 09/29/2017. OBSERVATION: The secondary containment test results indicate a failure at the Regular fuel piping between dispensers 5/6 and 7/8 as well as failure of UDC 1/2. All secondary containment for the UST system must be tight. CORRECTIVE ACTION: Hire a properly licensed, trained, and certified contractor to repair or replace the failed component(s) and contact the CUPA for reinspection within 60 days.

Violation Date:	02-28-2017
Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees

HPI #21 (Continued) **S127020244**

have been properly trained.

Violation Notes: Returned to compliance on 02/28/2017. OBSERVATION: The designated operator failed to document all the alarms from the attached alarm history on the designated operator monthly inspection report(s) and failed to check that they were responded to appropriately. The missing alarms include: 6/4/2016, 7/13/2016 and 1/1/2017 for T1 regular overfill. During the monthly inspection, the designated operator shall review the alarm history for the previous month, check that each alarm was documented and responded to appropriately, and attach a copy of the alarm history with documentation taken in response to any alarms to the monthly report. CORRECTIVE ACTION: Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports.

Case Worker: TNM
RB Case Number: 1THU211
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History: The site s been a gas station since 1928.The original three underground storage tanks (USTs) were closed and left buried in place in 1963; one was later removed in 2001, but the other two were left alone due to nearby subsurface utilities.A waste oil UST was removed in 1989, and in 1996 two gasoline and one diesel USTs were removed, along with 480 cubic yards of impacted soil. A passive skimmer removed floating free product from onsite wells between 2001 and 2001. A dual phase extraction system operated from 2008 to 2010 and removed almost 2,000 pounds of gasoline from soil beneath the site.

PACIFIC BELL (Continued) **1000251821**

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 11/21/2019. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles). Two 55 gallon drums of waste absorbent in the truck shop and one 55 gallon drum of waste absorbent in the oil room are over the accumulation time period. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected within 30 days.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	392283
Site Name:	Eureka Ready Mix - Glendale Dr
Violation Date:	08-30-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 09/25/2017. Observed two waste antifreeze containers to be missing the bung hole tops. All containers must remain closed except when adding or removing the waste. Obtain secure lids for these containers within 30 days and submit a "self Certification of return to Compliance" form to DEH.
Violation Division:	Humboldt County Division of Environmental Health
Violation Program:	HW

EUREKA READY MIX - GLENDALE DR (Continued) **S123100614**

Site ID:	392283
Site Name:	Eureka Ready Mix - Glendale Dr
Violation Date:	08-30-2017
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 09/25/2017. Observed two 55 gallon drums of waste antifreeze with accumulation start date 10/20/15. This is past the 270 day accumulation time limit for onsite haz waste storage without a permit. Have this waste picked up using a licensed waste hauler within 30 days and submit a copy of the receipt with a "Self Certification of Return to Compliance" form to DEH.

Violation Source:	CERS,

Site ID:	392283
Site Name:	Eureka Ready Mix - Glendale Dr
Violation Date:	06-05-2015
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 07/01/2015. OBSERVATION: 55 gallon drum of waste absorbent has exceeded the 270 day timeframe. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA by July 6,2015.

PHILLY CHEESE STEAK SHOP/FORMER CHEVRON (Continued) **S111293373**

Local Case Number: Not reported
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel, Waste Oil / Motor / Hydraulic / Lubricating
Site History: A fueling facility operated at the site from 1948 until about 1957. No information on the number, contents, or removal of the underground storage tanks (USTs) is available. In 1996, petroleum impacted soil was found while constructing a restaurant, and in 2011 impacted groundwater was found at the adjacent property to the west.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan Amendment
Completed Date: 09/11/2013
Comments: DTSC and the North Coast Regional Water Quality Control Board (Water Board) reviewed the request to modify Monitoring and Reporting Program No. R1-2011-0074. The Water Board and DTSC concurred with the justification provided in the request for ceasing semiannual sampling. It was decided that two semiannual sampling events would be performed in 2015, and the results of the sampling would be included in the Third Five Year Review Report due to be submitted in April 2016. The Water Board rescinded Monitoring and Reporting Program No. R1-2011-0074.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 05/07/2015
Comments: A financial responsibility review was conducted by DTSC, and no violations were found. Simpson was found to be in compliance with their financial assurance responsibilities, and no response was required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 02/12/2018
Comments: A financial responsibility review was conducted by DTSC, and no violations were found. Simpson was found to be in compliance with their financial assurance responsibilities, and no response was required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 01/28/1999
Comments: The Operation and Maintenance Agreement requires the implementation of the DTSC-approved Operation and Maintenance Plan that is included as an exhibit. Under the Plan, six groundwater monitoring wells surrounding the area where soil was excavated and groundwater was extracted require quarterly monitoring. Monitoring is to continue until four successive quarters indicate that no contaminants are present at concentrations greater than the Maximum Contaminants

SIMPSON REDWOOD CO. (Continued) **S102564437**

Levels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 09/25/1997
Comments: A second amendment to the Voluntary Cleanup Agreement that adds the Simpson Common Paymaster Company as a project proponent. It also included an updated scope of work, revised cost estimate, and an updated schedule.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 02/18/1999
Comments: DTSC certified that that all appropriate removal/remedial actions have been completed. Groundwater monitoring is required as a part of operation and maintenance activities, in compliance with the Operations and Maintenance Agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 11/07/1997
Comments: Based on the Initial Study findings, DTSC concluded no significant environmental impacts would occur from Final Removal Action Workplan implementation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 04/21/1997
Comments: This Amendment to the Voluntary Cleanup Agreement, dated February 5, 1997, provides an updated schedule and revised cost estimate.

Completed Area Name: PROJECT WIDE

Completed Date: 02/05/1997
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 01/16/2007
Comments: DTSC sent comments requiring continued quarterly groundwater monitoring as well as the addition of ethane and ethane biodegradation products of volatile organic compounds, including vinyl chloride, to the analytical suite for the quarterly groundwater monitoring. The North Coast Regional Water Quality Control Board had provided Simpson Timber Company with Monitoring and Reporting Program No. R1-2006-0118, which incorporated all the comments sent by DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 09/12/2008

SIMPSON REDWOOD CO. (Continued) **S102564437**

Comments: The report presents the results of groundwater monitoring activities for the second quarter 2008. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/23/2008
Comments: The report presents the results of groundwater monitoring activities for the first quarter 2008. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2006-0118. Concentrations of dichloroethene and vinyl chloride in groundwater indicated that the biodegradation process is stalling and may need reevaluation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 10/21/2008
Comments: The report presents the results of groundwater monitoring activities for the third quarter 2008. The groundwater monitoring was performed in accordance with Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/16/2009
Comments: The report presents the results of groundwater monitoring activities for the fourth quarter 2008. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site. DTSC noted in its approval letter that there is an absence of data suggesting that natural attenuation is occurring at the Site, and DTSC indicated concern that the current groundwater monitoring program is not set up appropriately to demonstrate stability of the plume for the monitored natural attenuation program being implemented. It was recommended that the selected remedy should be reevaluated if volatile organic compound concentrations did not show signs of declining by the end of 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 05/28/2009
Comments: The report presents the results of groundwater monitoring activities for the first quarter 2009. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is

SIMPSON REDWOOD CO. (Continued) **S102564437**

occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 07/15/2009
Comments: The report presents the results of groundwater monitoring activities for the second quarter 2009. The groundwater monitoring was performed in accordance with Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site; however, the chemicals of concern remain elevated above Site cleanup goals.

Completed Area Name: PROJECT WIDE

SIMPSON REDWOOD CO. (Continued) **S102564437**

Completed Document Type: Operation and Maintenance Report
Completed Date: 08/09/2013
Comments: The 2013 Annual Groundwater Monitoring Report presents the results of groundwater monitoring conducted in October 2012 and April 2013, which was performed in accordance with Regional Water Quality Control Board Monitoring and Reporting Program No. R1-2011-0074.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 10/05/2018
Comments: The Third Five-Year Review Report evaluates the implementation, performance, and protectiveness of the monitored natural attenuation remedy at the Site. The Report concludes that the remedy has functioned as intended, that the exposure assumptions remain valid, and that no new information has come to light that calls into question the protectiveness of the remedy. The Report also concludes that the remedy is protective of human health and the environment. DTSC concurred with these conclusions, but did not concur with the recommendation that all monitoring and reporting for the Site be discontinued. DTSC will require additional groundwater monitoring to continue at the Site until the cleanup levels have been met.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/09/2015
Comments: Annual DTSC oversight cost estimate letter to Simpson Timber Company for fiscal year 2015/2016 (July 1, 2015 - June 30, 2016).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 07/06/2005
Comments: The Five Year Review Report outlines the work conducted at the site, including investigations and remediation activities. It evaluates whether the past remediation has been effective, and proposes recommendations for future activities at the Site to address groundwater contamination. The Five Year Review Report concluded that protection of human health and the environment has been achieved in all areas of the site, except the southern lunchroom area, through the removal and disposal of debris, contaminated soil and groundwater. Two additional monitoring wells (MW-7 and MW-8) were installed in January 2004 in the former south lunchroom area. DTSC concurred with the Five Year Review Report's recommendation to implement a monitored natural attenuation program with sampling on a quarterly basis for one year. After one year, the additional information will be evaluated and used to determine if contaminant concentrations in groundwater are being effectively reduced and if water quality objectives can be achieved in a reasonable timeframe.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 02/13/1999
Comments: The Removal Action Workplan Implementation Report documents the excavation and off-site disposal of approximately 8,600 cubic yards

SIMPSON REDWOOD CO. (Continued) **S102564437**

of soil. Some soil was stockpiled on the Site for future reuse and allowed to aerate to further reduce the concentrations of petroleum hydrocarbons. Approximately 1.2 million gallons of water was removed and treated through a transportable treatment unit before being discharged to the Greater Eureka Area (Elk River) Waste Water Treatment Plant. Groundwater will continue be to be monitored as part of the Operations and Maintenance Agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 11/07/1997
Comments: The Removal Action Workplan provides a site description, summary of investigation activities and results, describes the nature and extent of contamination, identifies and evaluates removal action alternatives, and recommends a removal action alternative to minimize or eliminate the potential for human receptors to be exposed to Site contaminants. The alternative chosen was excavation and off-site disposal of soil and extraction and treatment of groundwater. Groundwater monitoring was to continue at the Site as long as the contaminant concentrations exceed the maximum contaminant levels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/28/1997
Comments: The Simpson Timber Company Arcata Remanufacturing Plant operated at the Site from 1952 to 1989. Fuel petroleum hydrocarbons, paints, solvents, and Woodlife, a product containing 3 to 5 percent pentachlorophenol were used in plant operatlions. The Preliminary Endangerment Assessment (PEA) was performed to determine if past practices resulted in the release of hazardous materials that could pose a threat to public health or the environment. Twenty-two potential areas of investigation were identified, and an additional area was investigated in response to sampling conducted. Contaminated soil was excavated from seven areas where there was evidence of release. Petroleum hydrocarbons in the form of motor oil and diesel, acetone and cis-1,2-dichloroethene, pentachlorophenol (PCP), and polychlorinated biphenyls were among the chemicals found in soil samples. PCP, cis-1,2-dichloroethene, benzene, toluene, ethyl benzene, and xylenes were also detected in groundwater samples. The PEA recommended further action at the Site, and that a Removal Action Workplan should be developed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 06/29/2011
Comments: The Second Five Year Review Report was prepared pursuant to Section 2.5 of the Operations and Maintenance Agreement for the Site. It outlines the work that has been conducted at the Site to date, including the investigations and remediation activities. The Addendum to the Second Five Year Review Report recommends changes to the groundwater monitoring program, reducing the frequency from quarterly to semiannually. The Report concluded that protection to human health and the environment has been achieved in all areas of the Site, except for the southern lunchroom area, where volatile organic

SIMPSON REDWOOD CO. (Continued) **S102564437**

compounds at low concentrations remain in groundwater but are believed to be naturally attenuating. DTSC approved the Report as completed on June 29, 2011, when considered as a whole document with the Addendum to the Second Five Year Review Report.

Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan Amendment
Completed Date: 09/11/2013
Comments: DTSC and the North Coast Regional Water Quality Control Board (Water Board) reviewed the request to modify Monitoring and Reporting Program No. R1-2011-0074. The Water Board and DTSC concurred with the justification provided in the request for ceasing semiannual sampling. It was decided that two semiannual sampling events would be performed in 2015, and the results of the sampling would be included in the Third Five Year Review Report due to be submitted in April 2016. The Water Board rescinded Monitoring and Reporting Program No. R1-2011-0074.

Completed Document Type: Operation and Maintenance Report
Completed Date: 10/21/2008
Comments: The report presents the results of groundwater monitoring activities for the third quarter 2008. The groundwater monitoring was performed in accordance with Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/16/2009
Comments: The report presents the results of groundwater monitoring activities for the fourth quarter 2008. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site. DTSC noted in its approval letter that there is an absence of data suggesting that natural attenuation is occurring at the Site, and DTSC indicated concern that the current groundwater monitoring program is not set up appropriately to demonstrate stability of the plume for the monitored natural attenuation program being implemented. It was recommended that the selected remedy should be reevaluated if volatile organic compound concentrations did not show signs of declining by the end of 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 05/28/2009
Comments: The report presents the results of groundwater monitoring activities for the first quarter 2009. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 07/15/2009
Comments: The report presents the results of groundwater monitoring activities for the second quarter 2009. The groundwater monitoring was performed in accordance with Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site; however, the chemicals of concern remain elevated above Site cleanup goals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 12/03/2010
Comments: The report presents the results of groundwater monitoring activities for the third quarter 2009. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 12/20/2010
Comments: The report presents the results of groundwater monitoring activities for the fourth quarter 2009. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site. DTSC reiterated the previous comment that laboratory chain-of-custody documents include the sample preservation temperature.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 01/11/2011
Comments: The report presents the results of groundwater monitoring activities for the first quarter 2010. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site. The report recommends that the groundwater sampling frequency change from quarterly to annually, but notes that the DTSC response to this recommendation is anticipated in response the Five Year Review Report submitted to DTSC on January 29, 2010.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 04/11/2011
Comments: The report presents the results of groundwater monitoring activities for the fourth quarter 2010. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North

SIMPSON REDWOOD CO. (Continued) **S102564437**

Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site. Responses to DTSC comments on the second five-year review report were included as Section 5.0 of the groundwater monitoring report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/13/2011
Comments: This is the last report where quarterly sampling reports are provided under Monitoring and Reporting Program No. R1-2008-0034. A new semiannual groundwater monitoring program is to be established for the Site, in which sampling occurs in April and October, and the new monitoring program is to begin in October 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 01/12/2011
Comments: The report presents the results of groundwater monitoring activities for the second quarter 2010. The groundwater monitoring was performed in accordance with the Regional Water Quality Control Board, North Coast Region, Monitoring and Reporting Program No. R1-2008-0034. The report concluded that natural degradation of contaminants is occurring at the site. The report notes the Five Year Review Report submitted to DTSC on January 29, 2010 includes the recommendation to change from quarterly to annual groundwater monitoring.

groundwater monitoring conducted in October 2012 and April 2013, which was performed in accordance with Regional Water Quality Control Board Monitoring and Reporting Program No. R1-2011-0074.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 10/05/2018
Comments: The Third Five-Year Review Report evaluates the implementation, performance, and protectiveness of the monitored natural attenuation remedy at the Site. The Report concludes that the remedy has functioned as intended, that the exposure assumptions remain valid, and that no new information has come to light that calls into question the protectiveness of the remedy. The Report also concludes that the remedy is protective of human health and the environment. DTSC concurred with these conclusions, but did not concur with the recommendation that all monitoring and reporting for the Site be discontinued. DTSC will require additional groundwater monitoring to continue at the Site until the cleanup levels have been met.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/09/2015
Comments: Annual DTSC oversight cost estimate letter to Simpson Timber Company for fiscal year 2015/2016 (July 1, 2015 - June 30, 2016).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 07/06/2005
Comments: The Five Year Review Report outlines the work conducted at the site, including investigations and remediation activities. It evaluates whether the past remediation has been effective, and proposes recommendations for future activities at the Site to address groundwater contamination. The Five Year Review Report concluded that protection of human health and the environment has been achieved in all areas of the site, except the southern lunchroom area, through the removal and disposal of debris, contaminated soil and groundwater. Two additional monitoring wells (MW-7 and MW-8) were installed in January 2004 in the former south lunchroom area. DTSC concurred with the Five Year Review Report's recommendation to implement a monitored natural attenuation program with sampling on a quarterly basis for one year. After one year, the additional information will be evaluated and used to determine if contaminant concentrations in groundwater are being effectively reduced and if water quality objectives can be achieved in a reasonable timeframe.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 02/13/1999
Comments: The Removal Action Workplan Implementation Report documents the excavation and off-site disposal of approximately 8,600 cubic yards of soil. Some soil was stockpiled on the Site for future reuse and allowed to aerate to further reduce the concentrations of petroleum hydrocarbons. Approximately 1.2 million gallons of water was removed

SIMPSON REDWOOD CO. (Continued) **S102564437**

and treated through a transportable treatment unit before being discharged to the Greater Eureka Area (Elk River) Waste Water Treatment Plant. Groundwater will continue be to be monitored as part of the Operations and Maintenance Agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 11/07/1997
Comments: The Removal Action Workplan provides a site description, summary of investigation activities and results, describes the nature and extent of contamination, identifies and evaluates removal action alternatives, and recommends a removal action alternative to minimize or eliminate the potential for human receptors to be exposed to Site contaminants. The alternative chosen was excavation and off-site disposal of soil and extraction and treatment of groundwater. Groundwater monitoring was to continue at the Site as long as the contaminant concentrations exceed the maximum contaminant levels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/28/1997
Comments: The Simpson Timber Company Arcata Remanufacturing Plant operated at the Site from 1952 to 1989. Fuel petroleum hydrocarbons, paints, solvents, and Woodlife, a product containing 3 to 5 percent pentachlorophenol were used in plant operatlions. The Preliminary Endangerment Assessment (PEA) was performed to determine if past practices resulted in the release of hazardous materials that could pose a threat to public health or the environment. Twenty-two potential areas of investigation were identified, and an additional area was investigated in response to sampling conducted. Contaminated soil was excavated from seven areas where there was evidence of release. Petroleum hydrocarbons in the form of motor oil and diesel, acetone and cis-1,2-dichloroethene, pentachlorophenol (PCP), and polychlorinated biphenyls were among the chemicals found in soil samples. PCP, cis-1,2-dichloroethene, benzene, toluene, ethyl benzene, and xylenes were also detected in groundwater samples. The PEA recommended further action at the Site, and that a Removal Action Workplan should be developed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 06/29/2011
Comments: The Second Five Year Review Report was prepared pursuant to Section 2.5 of the Operations and Maintenance Agreement for the Site. It outlines the work that has been conducted at the Site to date, including the investigations and remediation activities. The Addendum to the Second Five Year Review Report recommends changes to the groundwater monitoring program, reducing the frequency from quarterly to semiannually. The Report concluded that protection to human health and the environment has been achieved in all areas of the Site, except for the southern lunchroom area, where volatile organic compounds at low concentrations remain in groundwater but are believed to be naturally attenuating. DTSC approved the Report as completed on June 29, 2011, when considered as a whole document with

SIMPSON REDWOOD CO. (Continued) **S102564437**

the Addendum to the Second Five Year Review Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Next Scheduled EDR Contact: 05/09/2022
Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/11/2021
Date Data Arrived at EDR: 11/12/2021
Date Made Active in Reports: 02/01/2022
Number of Days to Update: 81

Source: Department of Energy & Environmental Protection
Telephone: 860-424-3375
Last EDR Contact: 02/11/2022
Next Scheduled EDR Contact: 05/23/2022
Data Release Frequency: No Update Planned

NJ MANIFEST: Manifest Information
Hazardous waste manifest information.

Date of Government Version: 12/31/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

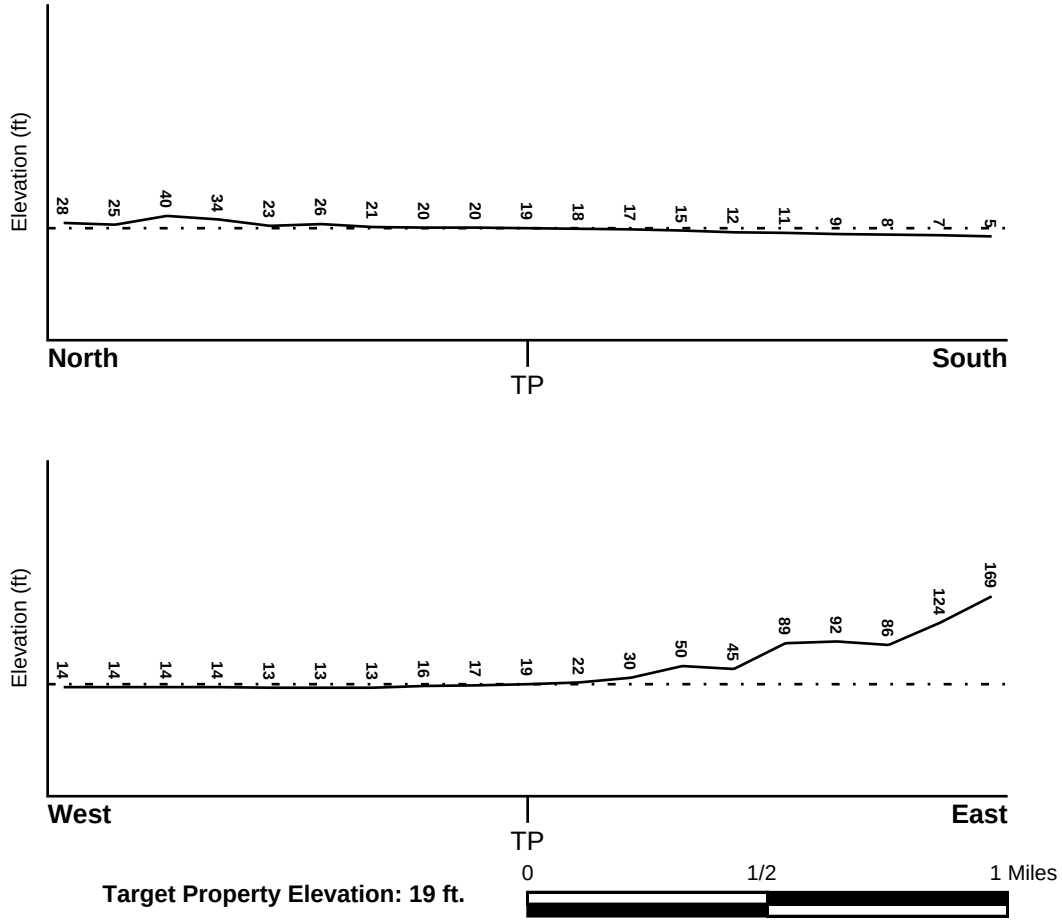
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 19 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
0600610004D	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ARCATA SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	FERNDALE
Soil Surface Texture:	silt loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	21 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
2	21 inches	61 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
3	61 inches	80 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Surficial Soil Types: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam
stratified
silty clay loam
sand
silt loam
coarse sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Noise Study Technical Memo

Technical Memorandum

July 28, 2023

To	David Loya, Delo Freitas	**Tel**	(707) 822-2918
		Email	Misha.Schwarz@ghd.com
From	Ben Wiseman, Mike Masschaele, Sam East, Misha Schwarz	**Ref. No.**	11228577 MEM-2
Subject	City of Arcata General Plan Update – Noise Study Technical Memo		

1. Introduction

GHD was retained by the City of Arcata (City) to prepare a Noise Study Technical Memorandum (Study) in support of the Noise Element of the Arcata General Plan Update. This Study assesses the effects of proposed development within the City, including the Gateway Area and other Infill Areas (Development Areas), on the noise environment in the City of Arcata. The following discussion describes the general characteristics of sound and the categories of audible noise, followed by the regulatory framework related to noise issues at the City, State, and Federal levels. Potential noise impacts associated with implementation of proposed development are evaluated, and mitigation measures are recommended as necessary. The following evaluation is based on both spatial and quantitative analyses and examines the effects that the locations of the Development Areas will have on the exposure of existing or future residential uses due to noise levels (e.g., transportation, temporary construction, and operations of commercial/light industrial facilities) or ground borne vibration. The boundaries of the Development Areas are shown on Figure 1.

To provide the basis for this evaluation, Section 2 of this Study describes the noise setting and the Federal, State, and Local regulatory background that will apply to noise within the City; Section 3 describes the existing noise environment within the Gateway Area; and Section 4 consists of impact evaluations to establish the thresholds of significance, evaluates potential noise-related impacts, and describes the significance of impacts in accordance with California Environmental Quality Act (CEQA) requirements.

2. Noise & Vibration – Environmental and Regulatory Setting

2.1 Fundamentals of Acoustics

Noise may be defined as objectionable or disturbing sound caused by its pitch or its loudness. Pitch is the height or depth of a tone or sound, depending on the relative frequency of the vibrations by which it is produced. Generally, higher-pitched sounds are perceived as louder to humans than sounds with a lower pitch having the same sound pressure level. Loudness is the intensity of sound waves combined with the reception characteristics of the human ear.

Noises vary widely in their scope, source, and volume, ranging from individual occurrences such as leaf blowers, to the intermittent disturbances of overhead aircraft, to the constant noise generated by traffic on freeways or mechanical equipment associated with an industrial facility. Noise is primarily a concern for sensitive receptors such as residences, schools, churches, parks, and hospitals.

In addition to the concepts of pitch and loudness, there are several noise measurement metrics which describe noise in a particular location. A decibel (dB) is a unit of measurement in acoustics which indicates the relative amplitude of a sound compared to a reference sound level. The generally accepted reference sound pressure is 20 µPa, which is used throughout this Study. The zero on the decibel scale corresponds to approximately the lowest sound level that the healthy, unimpaired human ear can detect. Sound levels in dB are calculated on a logarithmic scale. An increase of 10 dB represents a ten-fold increase in acoustic energy, while 20 dB is 100 times more intense, 30 dB is 1,000 times more intense, and so on. There is a relationship between the subjective noisiness or loudness of a sound and its dB level. Each 10 dB increase in sound level is perceived as approximately a doubling of loudness over a wide range of intensities.

The following table provides a brief summary of how changes in measured dB levels are perceived by the human ear.

Table 1 Human Perceptibility of Changes in Sound Level (Bies & Hansen 2009)

Change in Measured Sound Level (dB)	Change in Perceived Loudness
+3 dB	Threshold of human perceptibility to sound level change
+5 dB	Clearly noticeable change in noise level
+10 dB	Twice as loud
+20 dB	Much louder (any previously audible sources are completely masked by the louder source at this point)

Sound levels are often expressed in terms of A-weighted decibel levels (dBA), A-weighted sound levels are intended to more accurately represent the sound level experienced by the human ear. Since humans do not perceive sounds in all frequency ranges equally, the A-weighted correction artificially suppresses the impact of low frequency (31.5 – 125 Hz) sound in favor of middle and higher range frequency more easily perceived by humans (250 – 8000 Hz). Unless otherwise stated, sound levels presented and discussed in this Study are subject to A-weighting.

For non-transportation and stationary noise sources, the typical sound level descriptor used to quantify exposure are the 1-hour time-equivalent sound level (Leq 1-hr) and the Lmax sound level. The Leq sound level descriptor accounts for sound pressure level fluctuations from moment to moment by averaging the louder and quieter moments over a time period (e.g., one hour) to determine an equivalent continuous sound pressure level. The Lmax descriptor is the highest sound pressure level experienced/measured over the course of a sound level measurement period.

Since the sensitivity of noise receptors to noise increases during the evening and at night, and because excessive noise interferes with the ability to sleep, 24-hour descriptors have been developed that incorporate artificial noise penalties added to quiet-time noise events. The Day/Night Average Sound Level (Ldn) represents the average A-weighted sound pressure level during a 24-hour day, obtained after addition of 10 decibels to levels assessed in the night between 10:00 PM and 7:00 AM. Community Noise Equivalent Level (CNEL) is an average A-weighted noise level during a 24-hour day, obtained after addition of 5 decibels to levels assessed in the evening between 7:00 PM and 10:00 PM as well as 10 decibels to levels assessed in the night between 10:00 PM and 7:00 AM. For the purposes of this Study, all evaluated/calculated transportation noise levels will be presented in terms of Ldn.

Generally, sound energy from localized or point sound sources spreads out spherically as it travels away from the source, resulting in sound pressure level reductions of approximately 6 dB per doubling of distance from the

source. Sound energy from a line source (e.g., traffic on a highway) spreads out cylindrically, resulting in sound pressure level reductions of approximately 3 dB per doubling of distance from the source. Environmental factors also affect the transmission of sound, including ground absorption, atmospheric absorption, temperature gradients, wind, and screening by physical obstructions.

According to the Governor's Office of Planning and Research, maximum exterior noise levels of 60 dBA are considered "normally acceptable" for unshielded residential development.

Noise levels from 60 to 70 dBA fall within the "conditionally unacceptable" range, and those in the 70 to 75 dBA range are considered "normally unacceptable."

For reference, the California Department of Transportation (Caltrans) publishes the following table of typical noise levels to provide context for regulatory limits and acceptable levels.

Table 2 Typical Noise Levels of Everyday Settings (Caltrans 2023)

Common Outdoor Activities	Noise Level (dBA)
Instant perforation of eardrum	160
	150
Military Jet Takeoff	140
Threshold of Pain	130
From rows of rock concert	120
	110
Earphones at maximum level	100
	90
Vacuum cleaner	80
Busy street traffic	70
Normal conversation	60
	50
	40
	30
Whisper	20
Rustling leaves	10
Threshold of hearing	0

2.2 Fundamentals of Ground-borne Vibration

Ground vibration consists of rapidly fluctuating motions or waves with an average motion of zero. Several methods are typically used to quantify the amplitude of vibration including Peak Particle Velocity (PPV) and Root Mean Square (RMS) velocity. PPV is defined as the maximum instantaneous positive or negative peak of the vibration wave. RMS velocity is defined as the square root of the average of the squared amplitude of the signal, usually measured in decibels relative to one micro-inch per second (in/sec) and reported in velocity decibels (VdB). PPV and VdB vibration velocity amplitudes are typically used in analysis to evaluate the effect of vibration on buildings and people in the vicinity of construction activities.

Construction activities can cause vibration that varies in intensity depending on several factors. The use of pile-driving and vibratory compaction equipment typically generates the highest construction-related ground borne vibration levels. Because of the impulsive nature of such activities, the PPV descriptor has been used routinely to measure and assess ground borne vibration due to construction and almost exclusively to assess the potential of vibration to induce structural damage. The RMS descriptor is more commonly used to assess

human perception to vibration. Table 3 below summarizes various vibration levels and various associated thresholds:

Table 3 Typical Levels of Ground Borne Vibration (FTA 2018)

Human/Structural Response	RMS Vibration Velocity Level (VdB relative to 10^{-6} in/s)	Typical Sources (50 ft from source)
Threshold for risk of minor cosmetic damage for fragile buildings	100	Blasting from construction projects
		Bulldozers and other heavy tracked construction equipment
Difficulty with tasks such as reading a computer screen	90	
		Commuter rail (upper range)
Residential annoyance, infrequent events (e.g., commuter rail)	80	Rapid transit (upper range)
Residential annoyance, frequent events (e.g., rapid transit)		Commuter rail (typical); bus or truck over bump
	70	Rapid transit (typical)
Limit for vibration sensitive equipment; approximate threshold for human perception of vibration		Bus or truck (typical)
	60	
		Typical background vibration
	50	

The potential for structural damage due to ground borne vibration is dependent on the level of the vibration, the type of structure, and the integrity of the structure. Reinforced concrete structures are less susceptible to damage due to vibration; while older, timber structures are significantly more susceptible to damage by vibration. For reference, Table 4 below summarizes construction vibration damage criteria used by the Federal Transit Administration:

Table 4 Construction Vibration Damage Criteria (FTA 2018)

Building / Structure Category	PPV (in/s)
Reinforced-concrete, steel or timber (no plaster)	0.5
Engineered concrete and masonry (no plaster)	0.3
Non-engineered timber and masonry buildings	0.2
Buildings extremely susceptible to vibration damage	0.12

2.3 Federal Regulatory Framework

The adverse impacts of noise were officially recognized by the federal government in the **Noise Control Act of 1972 (42 U.S. Code, § 4901-4918)**, which serves three purposes:

– Promulgating noise emission standards for interstate commerce,
– Assisting state and local abatement efforts; and
– Promoting noise education and research.

The Office of Noise Abatement and Control (ONAC) was initially tasked with implementing the Noise Control Act. However, the ONAC has since been eliminated, leaving the development of federal noise policies and programs to other federal agencies and interagency committees. For example, the Occupational Safety and Health Administration (OSHA) agency prohibits exposure of workers to excessive sound levels. The U.S. Department of Transportation (DOT) assumed a significant role in noise control through its various operating agencies, such as with the Federal Aviation Administration (FAA), which regulates noise generated by aircraft and airports. Surface transportation system noise is regulated by a host of agencies, including the Federal Transit Administration (FTA), which requires that all rail systems receiving federal funding be constructed and operated in accordance with its regulations and specifications. The Federal Railroad Administration (FRA) sets forth and enforces safety standards, including noise emissions within railroad locomotive cabs. Transit noise is regulated by the FTA, while freeways that are part of the interstate highway system are regulated by the Federal Highway Administration (FHWA). The FHWA has adopted and promulgated noise abatement criteria for highway construction projects. The federal government encourages local jurisdictions to use their land use regulatory authority to site new development to minimize potential noise impacts.

2.3.1 Federal Highway Administration (FHWA) Standards

Title 23, Part 772 sets procedures for the abatement of highway traffic noise and construction noise. Title 23 is implemented by the Department of Transportation Federal Highway Administration. The purpose of this regulation is to provide procedures for noise studies and noise abatement measures to help protect the public health and welfare, to supply noise abatement criteria, and to establish requirements for information to be given to local officials for use in the planning and design of highways. All highway projects which are developed in conformance with this regulation shall be deemed to be in conformance with the DOT Federal Highway Administration Noise Standards. Title 23 establishes a 67 dBA standard to federal highway projects [23 CFR Chapter 1, Part 772, Section 772.19].

2.3.2 Federal Transit Administration (FTA) Standards

For federally funded mass transit projects, the FTA standards preempt County/regional standards. The vibration standards listed in the FTA Transit Noise and Vibration Impact Assessment Manual (FTA 2018) are currently relied upon for vibration assessment and exposure limits.

2.4 State Regulatory Framework

California Senate Bill 860, which became effective January 1, 1976, directed the California Office of Noise Control within the State Department of Health Services to prepare “Guidelines for the Preparation and Content of Noise Elements of the General Plan.” One purpose of these guidelines was to provide sufficient information concerning the noise environment in the community so that noise could be considered in the land use planning process. As part of this publication, Land Use Compatibility Standards were developed in four categories: Normally Acceptable, Conditionally Acceptable, Normally Unacceptable, and Clearly Unacceptable. These categories were based on earlier work done by the U.S. Department of Housing and Urban Development (HUD). The interpretation of the four categories is as follows:

- **Normally Acceptable**: Specified land use is satisfactory without special insulation
- **Conditionally Acceptable**: New development requires detailed analysis of noise insulation requirements
- **Normally Unacceptable**: New development is discouraged and requires a detailed analysis of insulation features
- **Clearly Unacceptable**: New development should not be undertaken

The State of California has developed a Land Use Compatibility Matrix for community noise environments that further defines the four categories of acceptance and assigns Ldn/CNEL values to them.

In addition, the State Building Code (Title 24, California Code of Regulations, Part 2) establishes uniform minimum noise insulation performance standards to protect persons within new hotels, motels, dormitories, long-term care facilities, apartment houses, and residential units other than detached single family residences from the effects of excessive noise, including, but not limited to, hearing loss or impairment and interference with speech and sleep. Residential structures to be located where the CNEL or Ldn is 60 dBA or greater are required to provide sound insulation to limit the interior CNEL/Ldn to a maximum of 45 dBA. An acoustic, or noise, analysis report prepared by an experienced acoustical engineer is required for the issuance of a building permit for these structures. Conversely, land use changes that result in increased noise levels at residences of 60 dBA or greater must be considered in the evaluation of impacts to ambient noise levels. Table IV.E-2, *Land Use Compatibility for Community Noise Environments*; and Table IV.E-3, *Normally Acceptable Noise Levels for Residential Land Use*, depict noise levels for a variety of uses.

2.5 Local Regulatory Framework

The Gateway Area is within the City of Arcata and therefore, this Study includes the existing City of Arcata General Plan regulatory requirements.

2.5.1 City of Arcata Land Use Code

The City of Arcata Land Use Code (Title 9 of the Municipal Code) addresses noise throughout the City in Title III – Planning and Project Design Standards, section 9.30.050 “Noise Standards” (City of Arcata 2019) as follows:

> “A. Purpose. This Section implements the policies of the Noise Element of the General Plan, and provides standards for noise mitigation that are intended to protect the community health, safety, and general welfare by limiting exposure to the unhealthful effects of noise.
>
> B. Applicability. No use, activity, or process shall exceed the maximum allowable noise levels established by this Section, except for the following noise sources:
>
> 1. Emergencies. Public safety warning devices (e.g., ambulance, fire, and police sirens), sound for alerting persons to the existence of an emergency, or the performance of authorized emergency work;
>
> 2. State or Federal preempted activities. Any activity regulated by State or Federal law;
>
> 3. Public health and safety activities. Construction, maintenance, and/or repair operations by public agencies and/or utility companies or their contractors that are serving public interests, and/or protecting the public health, safety, and general welfare;
>
> 4. Parks. Public agency sanctioned recreational activities and programs conducted in public parks; and
>
> 5. Solid waste collection. The authorized collection of solid waste.
>
> C. Definitions. Definitions of the technical terms used in this Section may be found in Article 10 (Glossary) under "Noise."
>
> D. Noise source standards.
>
> 1. Stationary and transportation source noise level limitations. No use, activity, or process within the City shall generate noise in excess of the levels identified by [Table 5] and [Table 6], as the noise is measured at the property line of a noise sensitive land use identified in [Table 5] and [Table 6].
>
> a. If the measured ambient noise level exceeds the applicable noise level standard in any category shown in the tables, the applicable standards shall be adjusted to equal the ambient noise level.

b. If the noise source being evaluated is continuous and cannot reasonably be discontinued or stopped to allow measurement of the ambient noise level, the noise level measured while the source is in operation shall be compared directly to the applicable noise level standards identified in the tables.

Notwithstanding the above requirements, no person shall allow or cause the generation of any noise of a type, volume, pitch, tone, repetition, or duration that would be found to be a nuisance by a reasonable person beyond the boundaries of the property where the noise is generated.

Table 5 Maximum Allowable Stationary Noise Level by Receiving Land Use (Table 3-2 of the Municipal Code)

Noise Level Descriptor	Maximum Exterior Noise Level			Maximum Interior Noise Level		
	7 am – 7 pm	7 – 10 pm	10 pm – 7 am	7 am – 7 pm	7 – 10 pm	10 pm – 7 am
Dwellings, Transient Lodging, Hospitals, Extended Care, and Similar Uses						
Hourly Leq	55 dB	50 dB	45 dB	45 dB	40 dB	35 dB
Maximum	75 dB	75 dB	70 dB	65 dB	65 dB	60 dB
Meeting Facilities, Auditoriums, Theaters, Libraries, Schools, and Similar Uses						
Hourly Leq	55 dB	55 dB	n/a	40 dB	40 dB	n/a
Maximum	75 dB	75 dB	n/a	60 dB	60 dB	n/a

Notes:

(1) The City can impose noise level standards up to 5 dB less than those specified above based upon determination of existing low ambient noise levels in the vicinity of the project site.
(2) These noise level standards do not apply to residential units established in conjunction with industrial or commercial uses (e.g., caretaker dwellings).
(3) The standards will be applied at the outdoor activity areas of the receiving land use, and at the building facade for upper floor receivers which do not have an outdoor activity area facing the noise source. Where no outdoor activity area is identified, the City has the option to apply only the interior noise level performance standards.

Table 6 Maximum Allowable Transportation Noise Exposure (Table 3-3 of the Municipal Code)

Noise Sensitive Land Use	Outdoor Activity Areas (1)	Interior Spaces	
	dBA Ldn	dBA Ldn	dBA Leq (2)
Residential	60 (3)	45	n/a
Transient Lodging	60 (4)	45	n/a
Hospitals, extended care	60 (3)	45	n/a
Theater, auditorium	n/a	n/a	35
Meeting facility, public or private	60 (3)	n/a	40
Offices	n/a	n/a	45
School, library, museum	n/a	n/a	45
Playground, park	70	n/a	n/a

Notes:

(1) Where the location of outdoor activity areas is unknown, the exterior noise level standard shall be applied to the property line of the receiving land use.
(2) As determined for a typical worst-case hour during periods of use.
(3) Where it is not possible to reduce noise in outdoor activity areas to 60 dB Ldn/CNEL or less using a practical application of the best-available noise reduction measures, an exterior noise level of up to 65 dB Ldn/CNEL may be allowed provided that available exterior noise level reduction measures have been implemented and interior noise levels are in compliance with this table.

(4) In the case of hotel/motel facilities or other transient lodging, outdoor activity areas such as pool areas may not be included in the project design. In these cases, only the interior noise level criterion will apply.

2. Limitation on hours of construction. In order to allow construction schedules to take advantage of the weather and normal daylight hours, and to ensure that nearby residents as well as nonresidential activities are not disturbed by the early morning or late night activities, construction site tool and equipment noise shall be limited in compliance with [Table 7] or as required by conditions of approval.

Table 7 Allowable Hours of Construction (Table 3-4 of the Municipal Code)

Day	Allowable Hours
Monday through Friday	8:00 a.m. to 7:00 p.m.
Saturday	9:00 a.m. to 7:00 p.m.
Sunday, Holidays	* No heavy equipment-related construction activities allowed

All stationary and construction equipment shall be maintained in good working order, and fitted with factory approved muffler system.

3. Intrusive noise. When intrusive noise sources have been identified through project review, the review authority shall require that the detrimental effects (sleep interference or the potential for annoyance) be disclosed to neighboring receptor properties.

4. Rhythmic, recurring, or impulsive noise sources. When noise sources have been identified to be rhythmic, reoccurring, or impulsive in nature or comprised mainly of music or speech, they may comply with applicable noise level criteria and still be annoying to individuals. When these types of noise sources have been identified, they may be subject to additional mitigation or mediation, and shall be subject to the criteria in [Table 6], with a -5 dB penalty applied to the criteria.

E. Standards for sensitive receptors. New noise sensitive land uses as identified in [Table 6] shall not be allowed where the noise level from existing non-transportation noise generators will exceed the noise level standards in [Table 5], or where projected levels of transportation noise will exceed the levels specified in [Table 6], unless effective noise mitigation measures are incorporated into project design to maintain outdoor and indoor noise levels on the receptor site in compliance with [Tables 5], and [6].

1. New noise-sensitive uses. New construction and retrofits at existing buildings shall include appropriate insulation, glazing, and other sound attenuation measures so that they comply with standards in [Table 6].

2. Mitigation required. Noise that may affect a proposed noise sensitive land use shall be mitigated to not exceed the noise level standards in [Table 5] at the property line of any noise-sensitive land use identified in [Table 6]. Appropriate mitigation measures include:

a. Noise attenuation measures, and stationary noise source controls shall include the use of barriers, setbacks, site design, baffles, enclosures, silencers, and improved facade construction techniques.

b. Where noise mitigation measures are required, mitigation shall occur primarily through site planning and project design, where feasible. The use of noise barriers shall be considered a means of achieving the noise standards only after all other practical design-related noise mitigation measures have been integrated into the project.

F. Acoustical analysis. Where the Director determines that a proposed project is a noise sensitive land use (such as hospitals, schools, and health care facilities), or may generate noise in excess of any

limit established by [Tables 5] or [6], and/or where the use may generate noise in outdoor areas in excess of 60 dBA, the planning permit application for the use shall include an acoustical analysis, which shall:

1. Be the financial responsibility of the applicant;

2. Be prepared by a qualified person experienced in the fields of environmental noise assessment and architectural acoustics;

3. Include noise level measurements, with sufficient sampling periods and locations, to adequately describe local conditions and the predominant noise sources;

4. Estimate existing and projected cumulative (20-year) noise levels in terms of Ldn or CNEL and/or the standards of [Table 5], and compare those levels to the requirements of this Section and the policies of the Noise Element;

5. Recommend appropriate mitigation to achieve compliance with this Section and the policies and standards of the Noise Element, giving preference to proper site planning and design over mitigation measures which require the construction of noise barriers or structural modifications to buildings that contain noise-sensitive land uses;

6. Estimate noise exposure after prescribed mitigation measures are implemented; and

7. Describe a post-project assessment program that may be used to evaluate the effectiveness of the proposed mitigation measures.

G. Noise measurement. Exterior noise levels shall be measured at the property line of the noise sensitive land use receiving the noise. Noise measurement shall be made with a sound level meter using the 'A' weighted scale at slow meter response. Fast meter response shall be used only for an impulsive noise.

The City of Arcata Municipal Code addresses noise in the Downtown Plaza Area in Title IV – Public Welfare, Morals and Conduct, Chapter 3 (City of Arcata 1996). While Chapter 3 does not apply directly to the Gateway Area, the requirements are provided below for reference:

"Section 4320 Exterior Noise in General

A. No person shall make, cause, suffer or permit to be made any noises or sounds at any location within the Downtown Plaza area which causes the average sound level when measured on any other property to exceed:

1. 60 dBA between the hours of 10:00 p.m. and 7:00 a.m. or 65 dBA between the hours of 7:00 a.m. and 10:00 p.m. for a cumulative period of more than 10 minutes in any hour; or

2. the standard expressed in item 1 above plus five dB for a cumulative period of five minutes in any hour; or

3. the standard expressed in item 1 above plus 15 dB for any period of time; or

4. the ambient noise level, for a period of five or more minutes.

B. If the measured ambient noise level exceeds that permissible within any of the first three noise limit categories above, the allowable noise exposure standard shall be the ambient noise level.

C. If possible, the ambient noise level shall be measured at a location along the real property boundary on the property adjoining the parcel which is the location of the alleged offending noise source. If the intruding noise source is continuous and cannot be reasonably discontinued or stopped for a time period whereby the ambient noise level can be measured, the ambient noise level shall be determined by traveling away from the noise source to a point where a steady state decibel reading is achieved. If this test is not possible, the noise level shall be compared directly to the noise level standards in section A above.

D. Adjustment for character of sound. In the event the alleged offensive noise, as judged by the noise control officer, contains a steady, pure tone such as a whine, screech, or hum, or is an impulsive sound such as hammering or riveting, or is repetitive or rhythmic in character, the standards set forth in section A above shall be reduced by five dB.

Section 4325 Offensive or Unreasonably Disturbing Noises

A. Notwithstanding the standards set forth in Section 4320, no persons shall make, cause, suffer or permit to be made any offensive or unreasonably disturbing noise which disturbs any person within hearing distance of such noise.

B. Offensive noise means any noise which is loud, boisterous, irritating, penetrating, repetitive, rhythmic or unusual, or that is unreasonably distracting in any other manner, such that it is likely to disturb people of ordinary sensitivity in the vicinity of such noise."

2.5.2 Proposed Amendments to the Land Use Code

Based on GHD's review, the current version of the Land Use Code is generally in line with current state-of-the-art. However, the following amendments are proposed to provide further clarity for the implementation and enforcement of the City's noise policies:

- Revise section 9.30.050.D.1.a to the following: "If the measured ambient noise level exceeds the applicable **stationary** noise level standard in any category shown in the tables, the applicable **stationary** standards shall be adjust to equal the ambient noise level."
- Revise the title of Table 3-2 in section 9.30.050.D.1 to the following: "Table 3-2 – Maximum Allowable Noise Level **from Stationary Source** by Receiving Land Use"
- Revise Table 3-2 in section 9.30.050.D.1 to clarify the limit values are in terms of A-weighted decibels (**dBA**), consistent with common practices for environmental sound level limits.
- Add the following note below Table 3-2 in section 9.30.050.D.1: "'Maximum' sound level shall be taken to mean the maximum A-weighted sound level measured with the sound level meter set to Slow response."
- Add the following note below Table 3-2 in section 9.30.050.D.1: "Sound level measurements use to evaluate stationary sources against the applicable limits in should be performed using a lab-calibrated Type 1 or Type 2 sound level meter as defined in ANSI standard S1.4, and checked before and after the measurements using an acoustic calibrator meeting the requirements of ANSI standard S1.40."
- Add the following note below Table 3-4 in section 9.30.050.D.2: "The time restrictions above only apply to heavy equipment and activities which generator significant outdoor noise emissions."
- Add the following note below Table 3-4 in section 9.30.050.D.2: "Heavy equipment usage may operate on Sundays and holidays if the project is compatible with objective design standards, the project includes restricted affordable housing, and the project timeline requires an exception from this prohibition."

3. Existing Noise Conditions in Arcata

This section summarizes existing ambient noise conditions in the City, with a focus on the Development Areas. The primary existing sources of noise in the City are understood to be vehicle traffic from highways and local roadways, as well as light industrial/commercial activities. In addition, existing commercial/light industrial areas within the City are a source of stationary noise. Sources of ground borne vibration are typically minimal but can occasionally be sourced to vehicles using the roadway. Based on communications from the City, GHD understands there are no active rail lines within the City.

3.1 Existing Transportation Noise Sources

Current conditions in the City are generally dominated by the noise sources associated with traffic on US-101, Samoa Blvd (US-255), and arterial roads, along with numerous other smaller streets. Noise sources include stopping, turning, accelerating, and decelerating automobiles and trucks. In addition, stationary noise sources (air conditioning units, loading docks, mechanical equipment, etc.) from commercial and light industrial activity also contribute to the ambient noise environment.

A community noise survey conducted in 1997 as part of background studies for the General Plan showed that typical noise levels in noise-sensitive areas of the City ranged from 46 dB to 63 dB Ldn. The primary sources of noise at that time were road traffic, railroad operations, industrial activities, and neighborhood activities. Since the time of the survey, the following changes have occurred:

– There are no longer any active rail operations within the City
– Traffic volumes are assumed to be higher in present-day compared to 1997
– There have been changes in land uses within the City

Based on projected 2020 noise contours presented in the Arcata General Plan: 2020 as well as the noise survey results referenced above, GHD estimates that existing road traffic noise levels within the City are generally in the range of 50 dB to 65 dB Ldn. At locations in close proximity to major roads and highways there is potential for existing noise levels exceeding 65 dB Ldn.

3.2 Existing Non-Transportation Stationary Noise Sources

Noise can result from many processes and activities even when the best available noise control technology is applied. Noise exposure within industrial facilities is controlled by federal and state employee health and safety regulations, but exterior noise levels may exceed locally acceptable standards. Activities at commercial, recreational, and public services facilities can also produce noise that affects adjacent land uses.

Non-transportation related noise generators are typically called “stationary”, “fixed, “area,” or “point” sources of noise. Industrial processing, mechanical equipment, pump stations, and heating, ventilating, and air conditioning (HVAC) equipment are examples of fixed location, non-transportation noise sources within the City of Arcata and Gateway Area. Some non-transportation sources are not stationary but are typically assessed as point or area sources due to the limited area in which they operate, such as truck deliveries, agricultural field machinery, and material handling equipment.

Of these noise sources, noise generated by delivery truck activity typically generates the highest maximum noise levels. Delivery truck loading and unloading activities can result in maximum noise levels from 75 dBA to 85 dBA Lmax at 50 feet. Other noise sources specific to commercial centers and industrial zones of the City include light and medium industrial land uses, which can vary in noise level.

Based on GHD’s review of aerial imagery of the Gateway Area, Downtown Area and properties in the immediate surroundings, these areas currently include some light- and medium-scale industrial/commercial facilities. The majority of these facilities are existing in close proximity to sensitive/residential uses and would not be expected to produce significant noise levels without resulting in complaints from residents. However, there are also some medium-scale industrial/commercial facilities south of 8th Street and west of L Street within the Gateway Area, and just south of the Gateway Area, which are not as close to sensitive receptors (e.g., Wing Inflatables, 300 feet from nearest residence; C&K Johnson Industries, 380 feet from nearest residence). These facilities appear to have the potential for significant noise emissions in the areas surrounding them. At this time, it is not known if any of these facilities produce noise levels exceeding the standards set out in Table 3-2 of the Municipal Code (Table 5 of this report).

The Craftsmall Mall infill area includes a mixture of residential and light- to medium-scale industrial/commercial facilities. At this time, it is not known if any of these facilities produce noise levels exceeding the standards set out in Table 3-2 of the Municipal Code (Table 5 of this report).

The Valley West infill area includes a mixture of residential and light-scale industrial/commercial facilities. At this time, it is not known if any of these facilities produce noise levels exceeding the standards set out in Table 3-2 of the Municipal Code (Table 5 of this report).

3.3 Construction Noise

Noise from temporary construction and demolition activities adds to the noise impacts experienced by sensitive uses surrounding such activities. Such activities are expected to occur from time to time within the existing environment of the Gateway Area, as a consequence of normal development, redevelopment, and/or renovation activities.

The U.S. Environmental Protection Agency has published sound level data for various types of construction equipment, including loaders, trucks, back hoes, and compressors. Noise levels from construction can generally range from about 70 dBA up to nearly 100 dBA at a distance of 50 feet (US EPA 1971), which can be readily perceived both on site and off site, dependent on the types of activities. As per the Municipal Code, construction activities are limited to the daytime hours, excluding Sundays and holidays, which would help to reduce noise nuisance.

3.4 Ground-borne Vibration

Common significant sources of ground-borne vibration include construction activities, rail operations, and some industrial processes (e.g., metal stamping). Road vehicles such as trucks are typically not significant sources of ground-borne vibration (FTA 2018).

Ground-borne vibration can generally produce three types of impacts:

– Audible noise produced off-site by way of re-radiation by lightweight structures, which act as large loudspeakers to transmit vibration energy to the air (FTA 2018)
– Perceptible vibration of the ground or structures that can be felt by humans, which can be a source of nuisance particularly when felt in sensitive uses (e.g., residential dwellings)
– Structural damage due to significant vibration levels

As there are no active rail lines within the City, the only significant sources of ground-borne vibration would be construction, and possibly certain industrial facilities. Similar to construction noise, ground-borne vibration due to construction would be temporary and would only occur during daytime hours per the Municipal Code.

One potential industrial source of ground-borne vibration is the C&K Johnson Industries facility located at 1061 Samoa Blvd, which is a manufacturer of structural steel products with processes including rolling, breaking, blasting, shearing, punching, and forming (C&K Johnson 2022). Further investigation would be required to confirm the significance of ground-borne vibration associated with operation of this facility.

3.5 Airport Noise

There are no airports that are anticipated to be significant noise of noise for the City. Accordingly, air traffic noise impacts were not evaluated in this Study.

3.6 Railroad Noise

Rail lines in Arcata are understood to be inactive (some have been paved over), with no plans to reintroduce rail operations. Accordingly, rail traffic has not been evaluated in this Study.

4. Noise and Vibration – Standards of Significance

This analysis uses the significance criteria from the California Environmental Quality Act (CEQA) Guidelines Appendix G. The proposed General Plan Update would result in a significant impact on noise if one of the following exists:

a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.
b. Exposure of persons to or generation of excessive ground-borne vibration or ground- borne noise levels.
c. Substantial permanent increases in ambient noise levels in the project vicinity above levels existing without the project.
d. Substantial temporary or periodic increases in ambient noise levels in the project vicinity above levels existing without the project.
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.
f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels.

Items “a” and “c” are addressed in the following Sections 4.1 and 4.2. Items “b” and “d” are addressed in Sections 4.3 and 4.4. Items “e” and “f” are not applicable, as there are no airports or airstrips within 2 miles of the City.

4.1 Permanent Transportation Noise Exposure, Land Use Compatibility, and Mitigation Measures

Adherence to City of Arcata Municipal Code Table 3-3 (see Table 6 of this report) maximum allowable transportation sound level limits requires that outdoor sensitive receptors not be exposed to transportation sound levels exceeding an 60 dBA Ldn (with exception of playgrounds and parks, where 70 dBA Ldn in the limit). In the event that all feasible mitigation options have been exhausted, transportation Ldn levels as high as 65 dBA at sensitive outdoor receptors are acceptable.

Transportation-related noise sources inside of and surrounding the Gateway Area include car and truck traffic on highways and local roads. Roadways, in particular federal and state highways, are a major source of ambient noise in general, especially because most developed communities are located adjacent to these transportation corridors. Highways and streets are expected to remain the major transportation noise sources in the Gateway Area and surrounding region.

Traffic noise emissions depend on several factors including traffic volume, speed, commercial vehicle percentages, environmental effects, and distance to the receptor. The primary source of noise from automobiles is high frequency tire noise, which increases with speed. In addition, trucks and automobiles produce engine and exhaust noise (audibly dominant over tire noise at low speeds), as well as wind noise. Pavement type and condition can also influence traffic noise. Noise from automobiles is generally located at ground level, whereas truck noise sources can be located as high as 10 to 15 feet above the road surface due to tall exhaust stacks and higher engines.

Differences in elevation can reduce the perceived noise level. Noise from a thoroughfare in a trough or valley between residential areas is reflected upward and focused, similar to a satellite dish, while noise from an elevated thoroughfare will dissipate and is perceived as less of an annoyance. On flat ground, a buffer (such as a sound wall or dense vegetation) can greatly reduce the noise escaping to surrounding areas.

Projected growth during the General Plan Update planning period (up to 2045) is expected to result in development of noise-sensitive uses in the Gateway Area where noise levels may exceed applicable standards

for sensitive interior and outdoor areas. Transportation noise levels exceeding standards contained in Table 6 of this report would represent a significant impact.

Future noise levels were calculated by GHD for US-101, SR-255 (Samoa Blvd), K Street, Alliance Road, 11th Street, and H Street, which are expected to be the primary sources of road traffic noise in the Gateway Area. Traffic noise levels for these roadways were assessed using the United States Federal Highway Administration's (FHWA) Traffic Noise Model (TNM) Version 2.5. TNM modelling and analysis assumptions used in this Study included:

- **Ground Absorption**: Ground surfaces throughout the entire Gateway Area were modelled as pavement (i.e., flow resistivity of 20,000 cgs Rayls)
- **Receptor Elevation**: Noise contour and intersection sound levels are evaluated at 5 feet above grade
- **Foliage**: No attenuation due to foliage was included to be conservative
- **Building Massing**: No building structures or barriers were included in the model to be conservative
- **Topography**: All topographical changes in elevation have been reflected in the acoustic modelling

Based on the United States Environmental Protection Agency (EPA) publication "Protective Noise Levels" (EPA 1978), standard building construction in warm climates provides on average approximately 12 dBA noise reduction with windows and doors open, and 24 dBA with windows and doors closed. Thus, for potential developments where exterior road traffic sound levels exceed the indoor sound level criteria of Table 6 by more than 10 dBA (rounded down from 12 dBA), central air conditioning systems will be required to allow occupants to close their windows to achieve acceptable indoor noise levels. Further, where exterior road traffic noise levels exceed the indoor sound level criteria by more than 20 dBA (rounded down from 24 dBA), façade construction upgrades would be required to achieve the applicable indoor sound level criteria.

The projected traffic volumes used in the model were provided by GHD's Transportation Engineering team. The results of the traffic noise analysis under future (2045) conditions are presented graphically as noise level contours in Figure 2. General setback distances from the roads to achieve various road traffic noise thresholds are summarized as follows:

Table 8 Setback Distances to Noise Prediction Thresholds

Road Segment	> 65 dBA Ldn	≤ 65 dBA Ldn	≤ 60 dBA Ldn	≤ 55 dBA Ldn
	Setback Distance			
Redwood Highway (US-101)	< 1,300 ft	≥ 1,300 ft	≥ 2,700 ft	≥ 5,000 ft
US-299	< 900 ft	≥ 900 ft	≥ 1,800 ft	≥ 3,600 ft
Samoa Blvd (US-255)	< 180 ft	≥ 180 ft	≥ 550 ft	≥ 1,800 ft
K Street	< 180 ft	≥ 180 ft	≥ 550 ft	≥ 1,800 ft
Alliance Road	< 110 ft	≥ 110 ft	≥ 350 ft	≥ 1100 ft
11th Street	< 80 ft	≥ 80 ft	≥ 250 ft	≥ 800 ft
Mitigation Required for proposed residential, transient lodging, hospitals, extended care	Upgraded building exterior construction (1), acoustic barriers for Outdoor Activity Areas (2), and central air conditioning	Acoustic barriers for Outdoor Activity Areas (2), and central air conditioning	Central air conditioning	None
Study Requirements	When standard design features and adherence to the building code does not result in sufficient noise attenuation, the City may require that minimum	When standard design features and adherence to the building code does not result in sufficient noise attenuation, the City	Not required	Not required

Road Segment	> 65 dBA Ldn	≤ 65 dBA Ldn	≤ 60 dBA Ldn	≤ 55 dBA Ldn
	Setback Distance			
	building façade sound insulation performance shall be specified by an acoustical consultant and must be sufficient to achieve the applicable indoor sound level limit assuming windows and doors are closed. Dimensions and layout of acoustic barriers shall be specified by an acoustical consultant and must be sufficient to achieve the applicable outdoor sound level limit. As per the City of Arcata Municipal Code, sound levels up to 65 dBA Ldn may be acceptable in cases where it is not possible to reduce noise levels to 60 dBA Ldn using a practical application of the best available noise reduction measures.	may require that dimensions and layout of acoustic barriers shall be specified by an acoustical consultant and must be sufficient to achieve the applicable outdoor sound level limit. As per the City of Arcata Municipal Code, sound levels up to 65 dBA Ldn may be acceptable in cases where it is not possible to reduce noise levels to 60 dBA Ldn using a practical application of the best available noise reduction measures.		

As seen in Figure 2, projected 2045 road traffic noise levels in the Development Areas exceed 55 dBA Ldn, such that noise mitigation is expected to be required. For any planned sensitive uses within the corresponding roadway setbacks noted above, mitigation will be required as described below.

Mitigation Measures:

- For any planned sensitive uses within the corresponding roadway setbacks, and dependent on the proximity to the roads, measures including central air conditioning, acoustic barriers for Outdoor Activity Areas, and/or upgraded building exterior construction shall be required.

Level of Significance: Less than significant with appropriate mitigation where necessary.

4.2 Permanent Non-Transportation Stationary Noise Exposure, Impacts, and Mitigation Measures

Adherence to City of Arcata Municipal Code Table 3-2 (Table 5 in this Study) maximum allowable non-transportation sound level limits requires that all outdoor sensitive receptors not be exposed to stationary source sound levels exceeding an hourly Leq of 45 dBA to 55 dBA, dependent on the time of day, and an Lmax of 70 dBA to 75 dBA, dependent on the time of day. Additionally, interior sensitive receptors are not to be exposed to stationary source sound level exceeding an hourly Leq of 35 dBA to 45 dBA, depending on the time of day and an Lmax of 60 dBA to 65 dBA, depending on the time of day.

Noise-related land use controls are typically focused in two areas: (1) preventing the introduction of new noise-producing uses in noise-sensitive areas; and (2) preventing encroachment of noise-sensitive uses on existing noise-producing facilities. The first land use control can be achieved by applying noise performance standards to proposed new noise-producing uses. The second land use control can be accomplished by requiring that new noise-sensitive uses located near noise-producing facilities include mitigation measures to ensure compliance with noise performance standards. Site-specific noise analyses should be performed where noise-

sensitive land uses are proposed near noise sources, or where noise sources are proposed to be located near sensitive land uses, and the City has determined that noise attenuating standards in building design are not likely to effectively comply with noise performance standards. Based on typical land use compatibility guidelines, where GHD recommends the following setbacks be used to evaluate the need for detailed assessments of potential noise compatibility issues between stationary sources and sensitive uses:

Table 9 Industrial Categorization Criteria and Recommended Setbacks (MECP 2021)

Industry Classification	Industry Characteristics	Area of Concern
Light Industry	– Small, self-contained plant or building which produces/stores a packaged product – Daytime operations only – Infrequent movement of products and/or heavy trucks – Sound from operations inaudible or barely audible off-property	70 ft
Medium Industry	– Medium production levels, possibly with some open processes – Nighttime operations permitted – Frequent movement of products and/or heavy trucks, primarily during daytime hours – Sound from operations occasionally audible off-property	250 ft
Heavy Industry	– Large production levels, with open processes – Frequent nighttime operations – Outside storage of raw materials and/or finished products – Frequent movement of products and/or heavy trucks, including during nighttime hours – Sound from operations frequently audible off-property	1000 ft

The City would continue to enforce building noise standards and attenuation requirements per the Building Code for all uses. The building code regulates the interior environment of new construction. If a proposed commercial/industrial facility is located within the respective setbacks identified above relative to an existing sensitive use, or a property that is zoned to permit sensitive uses, and the City has determined that noise attenuating standards in building design are not likely to effectively comply with noise performance standards, then a detailed stationary noise impact assessment should be required at the expense of the developer to ensure that appropriate noise controls are incorporated into the design to achieve the applicable sound level limits of Table 5. Similarly, if a proposed sensitive use is within the respective setbacks identified above relative to an existing industrial/commercial facility, then the developer of the sensitive use should be required to conduct such a study. Note that the proponent of the new proposed use in both scenarios would be responsible to bear the costs of mitigation.

Mitigation Measures:

– In general, high-noise generating uses (e.g., new industrial uses) should be located away from noise-sensitive land uses and minimize excessive noise through project design features that include noise control and landscape buffers.
– For discretionary projects, an acoustical analysis shall be required as part of the environmental review process for development of noise sensitive land uses proposed in within the recommended setbacks of Table 9. This analysis shall meet the following requirements:
    a. Be prepared by an engineer, architect, or other qualified person experienced in the field of acoustics with an Institute of Noise Control Engineering (INCE) Board Certification.
    b. Include representative noise level measurements with sufficient sampling periods and locations to adequately describe local conditions.

c. Recommend appropriate mitigation or include reference to standardized metrics for assemblies used in the construction that are known and tested to reduce interior noise to achieve compliance with the adopted policies and standards of the Noise Element.

d. Estimate interior and exterior noise exposure after the prescribed mitigation measures have been implemented.

In the event that an acoustical analysis of a proposed development identifies exceedances of applicable non-transportation sound level limits, the analysis should identify and expand on the source(s) of noise responsible for the non-compliance. Upon identification of the problematic source(s), tailored mitigation measures can be developed.

Level of Significance: Less than significant with appropriate mitigation incorporated into design of developments where necessary to comply with the sound level limits of the Land Use Code.

4.3 Temporary Ground-Borne Vibration Exposure, Impacts, and Mitigation Measures

It is likely that intrusive ground-borne vibration levels will almost exclusively be sourced from construction activity inside the Development Areas during future development. While large trucks on roadways have the capacity to generate ground-borne vibrations, the road surfaces in question around the Development Areas are unlikely to generate intrusive levels of ground-borne vibration.

Earth moving and earth compacting activities using heavy machinery would create ground-borne vibrations and noise that may be noticeable on a temporary and intermittent basis, at nearby residences, school, commercial and retail businesses. Noticeable ground-borne vibrations and noise would be limited to normal daytime hours. Any proposed development projects would comply with all applicable City policies to abate construction-related noise impacts. The Municipal Code restricts construction activity to specified daytime hours, and that all construction equipment be maintained in good working order and fitted with factory approved mufflers. Adherence to these policies would result in a less than significant impact with regard to exposing persons to or generating excessive ground-borne vibration or ground-borne noise levels. Additional ground-borne vibrations beyond baseline conditions are not anticipated as a result of normal operational (permanent) activities, and the potential impact would be less than significant. For significant construction activities occurring within 50 feet of an existing structure, construction vibration assessments may be warranted to ensure potential for damage is minimized and monitored.

Mitigation Measures:

– Vibration intensive construction operations such as pile driving should be avoided whenever possible in favor of less intensive alternatives such as caisson drilling.

– If vibration intensive operations must be conducted, active vibration monitoring of nearby sensitive structures should be conducted to ensure no foundational/structural damage occurs.

Level of Significance: Less than significant with mitigation.

4.4 Temporary Construction Noise Exposure, Impacts, and Mitigation Measures

Construction in the Development Areas would temporarily increase noise in the surrounding area. The temporary noise increases would result from use of construction equipment for the project, as well as from increased traffic as construction workers commute to and from the construction site. To prevent noise disturbance to the community, the Municipal Code limits construction activity to the hours between 8 a.m. and 7 p.m. Monday through Friday, And between 9 a.m. and 7 p.m. on Saturdays. No heavy equipment-related construction activities shall be allowed on Sundays or Holidays. Temporarily heightened noise levels would be

generated during construction. Noise levels would be consistent with the reference noise levels in Table 6 below:

Table 10 Construction Equipment Reference Noise Levels as Measured at 50' (FTA 2018)

Equipment	Noise Level (dB[1])	Equipment	Noise Level (dB)
Drill rig truck	84	Jackhammer	85
Horizontal Boring Hydraulic Jack	80	Large Generator	82
Front end loader or Backhoe	80	Paver or Roller	85
Excavator	85	Dump truck	84

Sound from a point source is known to attenuate at a rate of -6 dB for each doubling of distance. For example, a noise level of 84 dB Leq as measured at 50 feet from the noise source would attenuate to 78 dB Leq at 100 feet from the source and to 72 dB Leq at 200 feet from the source to the receptor. Based on the reference noise levels in Table 6, the noise levels generated by construction equipment at the project site may reach a maximum of approximately 85 dB Leq at 50 feet during site excavation and construction. The maximum noise level would result in short-term increases in noise to sensitive receptors in and adjacent to the project area; however, construction-related increase in noise would not constitute a significant noise-related impact.

Mitigation Measures: No mitigation is necessary beyond adherence to the Land Use Code.

Level of Significance: Less than significant.

5. Summary and Conclusions

GHD has quantitatively assessed the transportation noise impacts projected inside the City and established a land use compatibility plan for new development projects in the City. Mitigation measures for developments located in heightened acoustic conditions have been recommended to ensure compliance with the existing Municipal Code sound level exposure limits, and include central air conditioning, acoustic barriers, and/or upgraded building exterior construction.

Qualitative guidance is also included for screening assessment of the non-transportation noise impacts to identify industries that may warrant detailed assessments to ensure compatibility with sensitive uses, in cases where a new sensitive or industrial use is proposed. General concepts for noise mitigation are also discussed.

All relevant points pertaining to Appendix G of the CEQA guidelines on significance of noise impacts have been addressed and proper explanations, mitigation measures (where necessary), and policy adherence have been recommended to ensure less than significant impacts arise from both temporary noise and ground-borne vibrations operations as well as permanent noise increases associated with new developments.

[1] "dB" is an A-weighted decibel measurement for assessing hearing risk and, therefore, is used by most regulatory compliance.

Project Name	City of Arcata Gateway Specific Plan and General Plan Update		
Subject	VMT Option 2 Smart Growth Score: Methodology and Guidance for SB-743 Implementation Interim Ordinance		

1. Introduction

This memorandum describes the proposed methodology for assessing transportation impacts in the City of Arcata (City) consistent with SB-743 and current CEQA Guidelines. Validation, testing and limitations of the proposed methodology, and initial findings associated with the methodology are presented herein. Additionally, GHD recommends a baseline VMT metric to which the City's average metrics will be compared and a percent reduction target for determining thresholds of significance. The methodology and guidance presented herein has been developed for use by the City in establishing an interim ordinance for SB 743 implementation in the City.

1.1 The VMT Problem

Assembly Bill (AB) 32, or Global Warming Solutions Act of 2006, set the State of California's first greenhouse gas emission (GHG) target which called on the state to reduce emissions to 1990 levels by 2020, and required the California Air Resources Board (CARB) to develop regulations and scoping plans to meet the state's GHG reduction goals. In 2016, SB 32 expanded upon AB 32 and set the goal of achieving a 40 percent reduction in emissions from 2020 levels.

The transportation sector has long been the single largest source of carbon pollution in the state. In 2020, the transportation sector accounted for 36.8% percent of the state's GHG emissions. Of the emissions associated with the transportation sector, 69.3% is associated with single passenger vehicle use. Single passenger vehicle use alone is thus responsible for 25.5% of the State's total emissions. An additional 8.8 percent of the State's total emissions are associated with heavy vehicles, meaning that on-road vehicle use accounts for 34.3 percent of the State's total GHG emissions.[1]

Previous research has shown that a neighborhood's environment affects travel behavior and further research has quantified the effects of smart growth practices on travel behavior. [2] This was done as part of the Sacramento Area Council of Governments (SACOG) Blueprint Project – the ground-breaking study of how smart growth policies could lead to reductions in vehicle-miles traveled (VMT) by examining the blind spots

[1] California Air Resources Board (2022). California Greenhouse Gas Emission Inventory - 2022 Edition. Data available at: https://ww3.arb.ca.gov/cc/inventory/data/data.htm

[2] *Making Travel Models Sensitive to Smart Growth Characteristics*, D. Hubbard and G. Walters, 2006.

inherent to traditional traffic models and improving the Sacramento regional traffic model's sensitivity to the four dimensions of smart growth, also known as the 4D's.

The Blueprint Project represented a sea change in how transportation impacts were analyzed, because it demonstrated that conventional travel demand models have inherent blind spots that make them insensitive to the effects of residential and employment **d**ensity, neighborhood **d**esign, **d**iversity of land uses in close proximity to one another, and access to regional **d**estinations (the 4D's). It went a step further and developed procedures external to traffic models to forecast the effects of the 4Ds on travel behavior. This work won a host of awards including US-EPA's National Award for Smart Growth Achievement, FHWA's Transportation Planning Excellence Award, the American Institute of Architects' Presidential Citation, and AMPO's National Award for Outstanding Achievement in Metropolitan Transportation Planning.

The Sacramento Blueprint Project was the inspiration for SB 375, or the Sustainable Communities and Climate Protection Act of 2008[3]. SB 375 was enacted to support the emissions reductions goals of AB 32 by specifically addressing the land use and transportation components of greenhouse gas emissions. By requiring the integration of land use, transportation, and housing policies through the development of regional Sustainable Communities Strategies (SCS), SB 375 focuses on reducing Vehicle Miles Traveled (VMT) and urban sprawl. Under SB 375, regional and local governments are pressured and incentivized to implement "smart growth," compact development and transportation alternatives with the goal of reducing VMT, the single largest source of all GHG emissions in California.

While the goal of SB 375 was to help jurisdictions plan communities that would result in reduced VMT, transportation impact requirements were still focused on congestion, or Level of Service (LOS), as a key measure of success, which does nothing for helping to reduce VMT. In fact, focusing on LOS as a key metric, results in the opposite, leading to more sprawl, forcing cities to prioritize the travel experience of vehicles over encouraging neighborhoods more comfortable for non-auto modes and contributing to longer driving distances due to development being more spread out in order to avoid congestion.

1.1.1 SB-743 as a Response

In response, SB 743 was signed into law in 2013. Beginning in July 2020, agencies were required to begin assessing transportation impacts based on VMT rather than LOS.

SB-743 addresses a range of topics and aims to better promote statewide policies that: (a) combat climate change by reducing greenhouse gas emissions and particulates; (b) encourage infill development and a diversity of uses instead of sprawl; and (c) promote multi-modal transportation networks, providing clean, efficient access to destinations and improving public health through active transportation. As part of implementing SB 743, revisions to CEQA Section 15064.3 that describes specific considerations for evaluating a project's transportation impacts went into effect statewide on July 1, 2020.

CEQA gives lead agencies broad discretion over analytical methodologies. CEQA Guidelines §15064.3(b)(4), which is new with SB 743, reads:

> "*Methodology. A lead agency has discretion to choose the most appropriate methodology to evaluate a project's vehicle miles traveled, including whether to express the change in absolute terms, per capita, per household or in any other measure. A lead agency may use models to estimate a project's vehicle miles traveled, and may revise those estimates to reflect professional judgment based on substantial evidence. Any assumptions used to estimate vehicle miles traveled and any revisions to model outputs should be documented and explained in the environmental document prepared for the project. The standard of adequacy in Section 15151 shall apply to the analysis described in this section*."

No particular methodology or metric is mandated; the choice is left to the lead agency. In making this choice, an agency should bear in mind what sort of criteria the legislature had in mind for determining the significance of transportation impacts goals of SB-743. These were expressed in PRC §21099(b)(1),

[3] Darrell Steinberg, the author of SB 375 and later SB 743, represented Sacramento in the State Legislature and was heavily involved in the Blueprint Project. He is currently Mayor of Sacramento.

"*Those criteria shall promote the reduction of greenhouse gas emissions, the development of multimodal transportation networks, and a diversity of land uses*."

The methodological approach for assessing transportation impacts in the City of Arcata presented herein is adapted from The Blueprint Project approach described previously. The following section describe the proposed methodology in detail.

2. Methodology

Design parameters

In setting out to design a tool to replace traditional travel demand modeling for SB-743 analysis, our team kept these key design parameters in mind:

- The tool must be capable of analyzing and measuring the components of SB-743's description of impact criteria, namely: "*Those criteria shall promote the reduction of greenhouse gas emissions, the development of multimodal transportation networks, and a diversity of land uses*." (PRC§ 21099(b)(1))
- The tool should provide useful information beyond what can be obtained using a travel demand model alone.
- The tool must be of practicable use in-house by agency staff with limited resources. So:
    - The tool should use data that is readily available.
    - It should be possible to input the background data once (the initial set-up by consultants) and thereafter only need input data for the project being analyzed (by agency staff).[4]
    - The tool should work on software already available to most planning and public works departments in California, rather than on specialized modeling software.
    - Run times should be relatively short—minutes rather than hours.
    - It should be easy to use; ideally staff can learn it in the course of a single afternoon.

The need for quantitative analysis on widely available software led to the decision to use a spreadsheet-based tool. The next section describes the characteristics of the tool developed and the associated methodology.

2.1 Analysis Steps

Data shows that when housing is in close proximity to shops and services uses people will walk or bike to those uses at least some of the time, and even if they drive, the trips will be short (i.e., low VMT trips)[5]. Similarly, the likelihood of people walking or biking to work, rather than driving, is influenced by the distance between their homes and workplaces. So, measures of proximity are also measures of the potential for VMT reduction. The methodology presented herein consists of determining the land use characteristics across the jurisdiction to assess the potential for interacting with complementary land uses through non-auto trips, and computing scores measuring land use diversity, density, and proximity to destinations

The steps in the methodology are shown in flow chart in Figure 1 and are described in detail below. The steps are as follows:

[4] Background data may need to be periodically updated in the future, if the background data inputs become outdated based on local or regional residential or employment growth. This can be done in GIS at the parcel level and editing the input data, or by identifying the hexagon zones in which growth has occurred and applying a growth factor as appropriate. This may require assistance from a consultant, depending on the technical capacity and/or access to software of the involved City staff.

[5] Section 15064.3(b)(3) provides for an analysis of transportation impact to be based on proximity to destinations.

Compute Base Land Use Inputs

1. The analysis area—the City of Arcata and its sphere of influence (SOI)—and the Humboldt County region was divided into hexagons. A hexagon was identified as within the City's SOI if the centroid of the hexagon is within the SOI boundary. The hexagons are sized so that the distance from the center of any given hexagon to the opposite edge of a neighboring hexagon is 0.5 miles. The size of the hexagons was based on survey data of typical distances for walking trips by Americans. This means that all of the land uses in a given hexagon and its neighboring 6 hexagons are within comfortable walking and biking distance.
2. The number of households, retail jobs, and non-retail jobs is input for each hexagon. This data would typically come from a parcel database or from census data.[6] For the purposes of this tool, "retail jobs" include employment types where trips to the site by visitor/customers are equal to or greater in number than the home-base work (HBW) trips made by employees.[7] So retail, service, finance, and medical employment are all categorized as retail jobs. "Non-retail jobs" are those where most of the trips to the site are HBW trips. This category includes non-medical office, government, industrial, and agricultural jobs.
3. The three land use categories for each hexagon and its six neighbors are aggregated to represent the land use characteristics available within comfortable walking distance to people in the hexagon.

Computing the Diversity Indices

4. Based on the data from the preceding step, the following scores are computed, each representing a different type of interaction between land uses:

   Jobs/Housing Diversity – This is the relative number of jobs, retail and non-retail, in the seven hexagons compared to the number of households in the same seven hexagons. This represents the opportunity to walk or bike to work. If a car is used, then the distance traveled will be short. In traffic forecasting this type of trip is termed a home-based work (HBW) trip.

   Retail/Housing Diversity - This is the relative number of retail jobs in the seven hexagons compared to the number of households in the same seven hexagons. This represents the opportunity to walk or bike locally for non-work trips. If a car is used, then the distance traveled will be short. In traffic forecasting this type of trip is termed a home-based other (HBO) trip.

   Jobmix Diversity – This is the relative number of retail jobs compared to non-retail jobs in the seven hexes. This represents the opportunity for interactions between complimentary non-residential uses to use walking or bicycling modes. An example of this would be someone walking from their office to a restaurant or coffee shop. If a car is used, then the distance traveled will be short. In traffic forecasting this type of trip is termed a non-home-based work (NHB) trip.

   The formulas used to calculate these scores were as follows:

   Jobs/Housing Diversity =1-[ABS(b*HHs-EMP)/(b*HHs + EMP)]

   Retail/Housing Diversity = 1-[ABS(d*HHs-REMP)/(d*HHs + REMP)]

   Jobmix Diversity = 1-[ABS(c*REMP-NEMP)/(c*REMP + NEMP)]

   Where:

   HH = Number of households

   REMP = Number of Retail and Service Jobs

   NEMP = Number of Non-Retail Jobs

   EMP = Total number of jobs (i.e., REMP + NEMP)

[6] Existing households and jobs by hexagon were estimated using Humboldt County parcel data, 2020 occupied housing unit estimates from the 2020 Decennial Census and 2019 Longitudinal Employer-Household Dynamics (LEHD) employment by industry data.
[7] Trips were calculated using the residential and employment land use estimates and the trip generation rates from the Humboldt County Travel Demand Model (HCTDM).

b = total regional employment / total regional households

d = total regional retail/service employment / total regional households

c = total regional non-retail jobs / total regional retail jobs

The three diversity variables can be thought of as measures of how far the land use mix has deviated from the ideal mix. The scores ranging from -1 (only one of the three land use types is present) to +1 (only the other land use type is present), with the ideal score being zero (no deviation from the ideal mix).

The ideal mix of land uses, represented as variables “a”, “b”, and “c” above, are determined from the county-wide mix of the three land use types. The rationale for this is the fact that land uses tend to balance when viewed over a large area. For example, government jobs may be concentrated in one part of the region and industrial jobs in another, while residences and shops are distributed among various other communities. However, when taken together, the housing, retail, and non-retail uses in a region tend to occur in the correct proportions for that particular region.

5. The diversity scores can then be mapped out using GIS software. If a two-color scheme is used, as shown in, Figure 11, for example, then it is easy to see which parts of the study area have a good local balance of land uses and which areas have a relative over-concentration of one type of land use.

Computing the Density Scores

6. Studies have shown that residential and employment density affect average travel behavior and VMT. In the case of residential density this is because dense communities tend to be comprised of smaller dwelling units, with fewer residents and thus fewer trips/unit. In the case of employment density this is due to interactions not just between retail and non-retail jobs, but also due to trip chaining between businesses, such as parking once and walking to several destinations, or delivery vehicles making multiple stops within a neighborhood.

   The residential density score is computed by dividing the number of households in each hexagon by the acreage of the hexagon, then normalizing the calculated score to a 0 to 100 scale, where the hexagon with the highest density score for the region, in this case Humboldt County, receives a score of 100 and the lowest receives a score of 0. Similarly, the employment density score is computed by dividing the total number jobs in each hexagon by the acreage of the hexagon.

Computing the Destinations Scores

7. The destinations score for each hexagon is then computed for each of three trip types. It is computed from the travel demand model as the sum, for all hexagons in the study area, of the attractions in a hexagon times the trip distance from the hexagon’s TAZ to the hexagon in question. Or, expressed another way:

   Destinations = Sum [Attractions(j)*Travel Impedance(i,j)] for all regional TAZs “j”

   A destinations score is computed separately for HBW, HBO, and NHB trips.

Combining the Individual Scores into an Aggregate Score

8. The land uses from Step 2 are multiplied by the trip generation rates to find the number of HBW, HBO, and NHB trips generated by each hex.

9. The number of trips of each type is then converted into a percentage of trips for each type. This percentage will vary depending on the hexagon. For example, an industrial area will be mostly HBW trips with some NHB and few if any HBO, while a residential area will have many HBO, some HBW, and few NHB.

10. The elasticities of VMT with respect to density, diversity, and destinations from the Blueprint project are then applied separately to HBW, HBO, and NHB trips. The result is an estimated reduction in the VMT

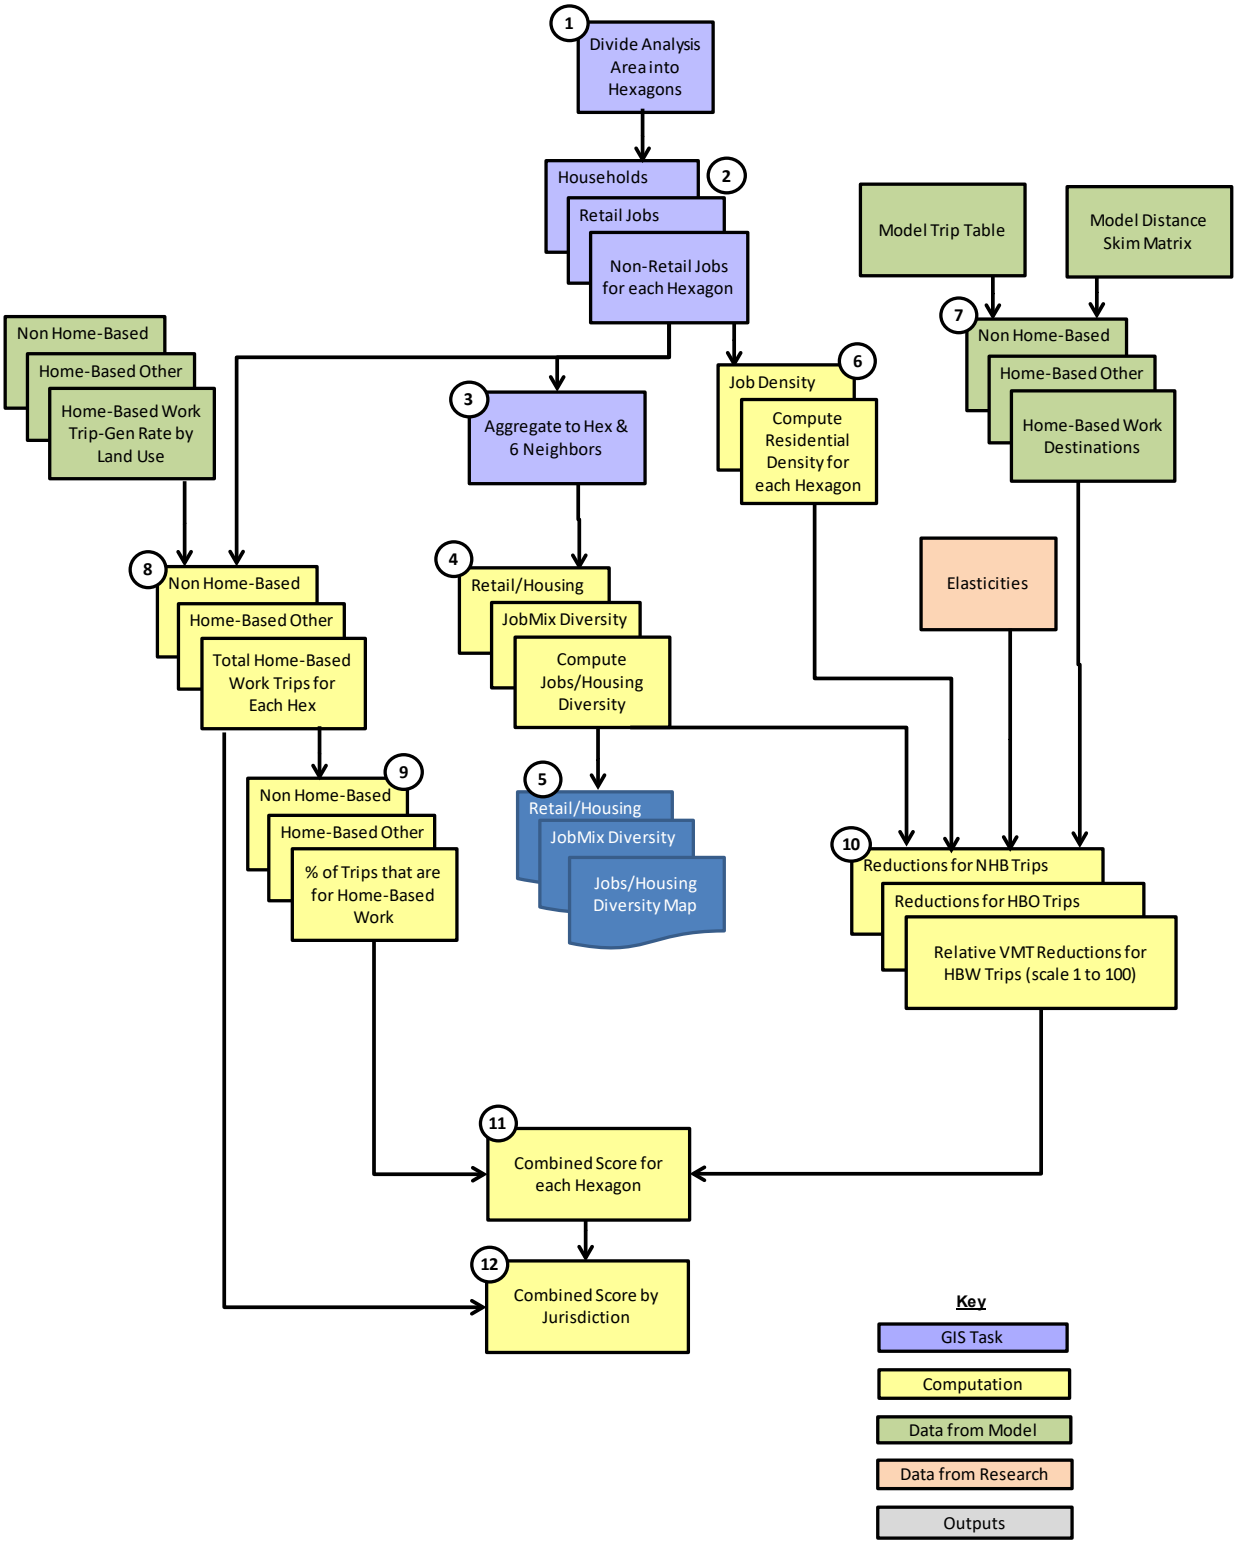
for each trip type. This is scored in relative terms on a scale of 1 to 100, with 1 being the worst score possible and 100 the best.

11. Then the overall score for each hexagon is the computed by combining the effect on HBW, HBO, and NHB trips by weighting the effect on each trip type by the percentage of trips from that hexagon that are that type.
12. A combined score for a jurisdiction can then be computed using an average of the scores of each hexagon in the jurisdiction, weighted by the number of trips generated by the hexagon.

Computing Countywide Score

Using the same methodological steps above, the existing countywide score was computed to compare against the existing citywide score to aid in establishing thresholds of significance.

Figure 1: Overview of Methodology



2.2 Validating the Methodology

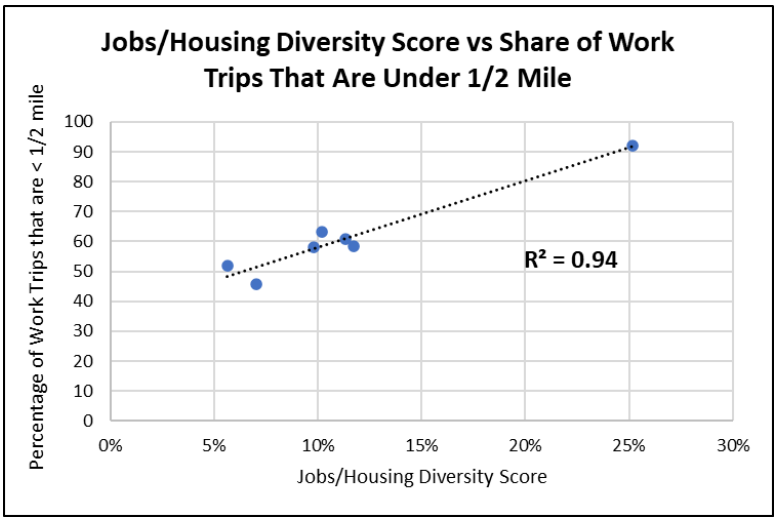
Prior to using this, or any other, analytical tool for CEQA analysis, it is best practice to test whether the results are supported by substantial evidence. In this case we felt it prudent to check the results with recent data in Caltrans District 1 region. We therefore used Replica data on travel behavior from the seven incorporated cities in Humboldt County as an independent[8] check of whether the tool's underlying assumptions regarding travel behavior are borne out in the field. Replica represents movement by combining data from three primary sources: public use population census data, proprietary locational data from telecommunications and other IT infrastructure in the region, and field observations data from customer public agencies (ground truth). It is used by many public agencies for VMT-related work.

2.2.1 Jobs/Housing Diversity Score

The Jobs/Housing Diversity score is a measure of the neighborhood-scale balance between workers' residential location and their job location. The underlying assumption is that people take proximity to their workplace into account when choosing their home, and vice-versa. So, a person may choose to live in a neighborhood close to their job or, conversely, may seek jobs that are close to their home, or may simply be better aware of job opportunities in their neighborhood compared to more distant locales. While not everyone will choose to live close to their work, the higher percentage that do so will reduce average VMT by making walking and biking viable options to driving and, if the traveler does drive, shortening the length of the vehicle trip.

Figure 2 graphs the Jobs/Housing Diversity score of each city against the share of work trips that are under ½ mile in length. The data shows a very strong relationship between the two (the R-square[9] is 0.94), which confirms that the underlying assumption is correct; when people live in close proximity to workplaces, they are more likely to have short work trips.

Figure 2: Jobs/Housing Diversity Score vs Share of Work Trips That Are Under 1/2 Mile



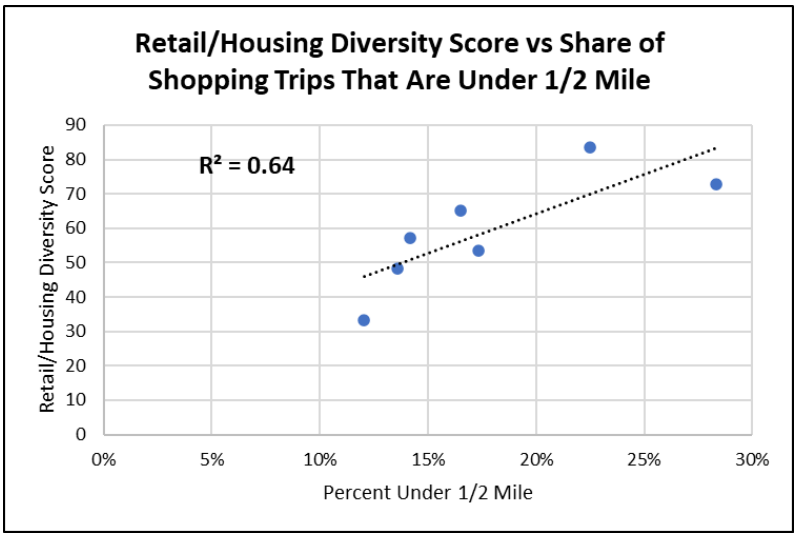
2.2.2 Retail/Housing Diversity Score

The Retail/Housing Diversity score is a measure of the neighborhood-scale balance between shoppers' residences and opportunities to shop and eat locally. The underlying assumption is that if people have such opportunities close to their homes, then they will increase the percentage of short shopping trips they take relative to longer ones. This will reduce VMT by making walking and biking viable options to driving and, if the traveler does drive, shortening the length of the vehicle trip.

[8] "Independent" meaning that the data set used to test the methodology was different from the data set used to develop the methodology.
[9] R-square (R^2) is the proportion of variation in Y (in this case the Diversity score) explained by the independent variable X (the percentage of shopping trips that are under ½ mile). An R^2 of 0.94 means 94% of the variation in the output can be explained by the input variable.

Figure 3 is a graph showing the relationship between each city's Retail/Housing Diversity score and the share of shopping trips[10] that are under 1/2 mile. The data shows a strong relationship between the two (the R-square is 0.64), which confirms that the Retail/Housing Diversity score is a good indication of whether residents will, in fact, do more of their shopping locally.

Figure 3: Retail/Housing Diversity Score vs Share of Shopping Trips That Are Under 1/2 Mile

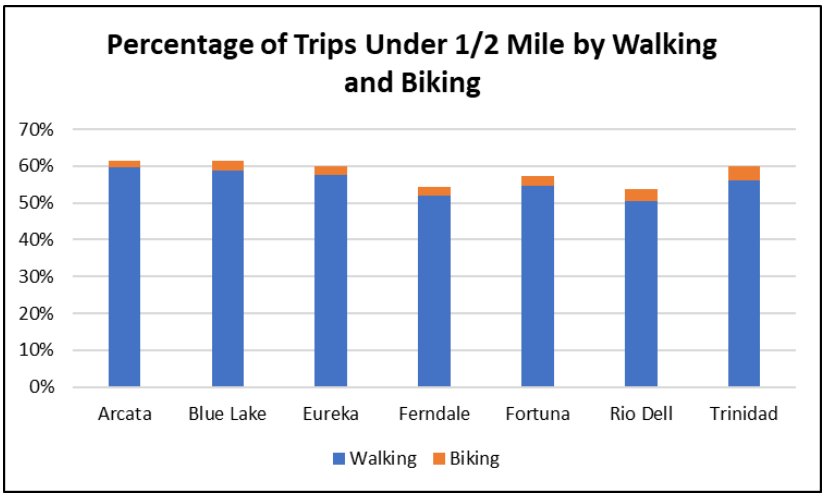


2.2.3 Mode Split for Short Trips

As mentioned in the preceding discussion, the fact that a higher percentage of trips are short in places with good Diversity scores reduces VMT for trips made by automobile. However, even greater reductions in VMT occur when people choose to use non-auto modes for these trips, thus reducing the VMT for those trips to zero. The next check was to see whether the underlying assumption that non-auto modes would form a significant share of short trips was true.

Figure 4 shows the percentage of trips of all types under ½ mile in each of the cities that is made by walking or biking. In every case walking and biking accounted for more than half of short trips. This confirms the assumption that locally balanced land uses will not only reduce the length of auto trips but also reduce the number of auto trips made.

Figure 4: Percentage of Trips Under 1/2 Mile by Walking and Biking



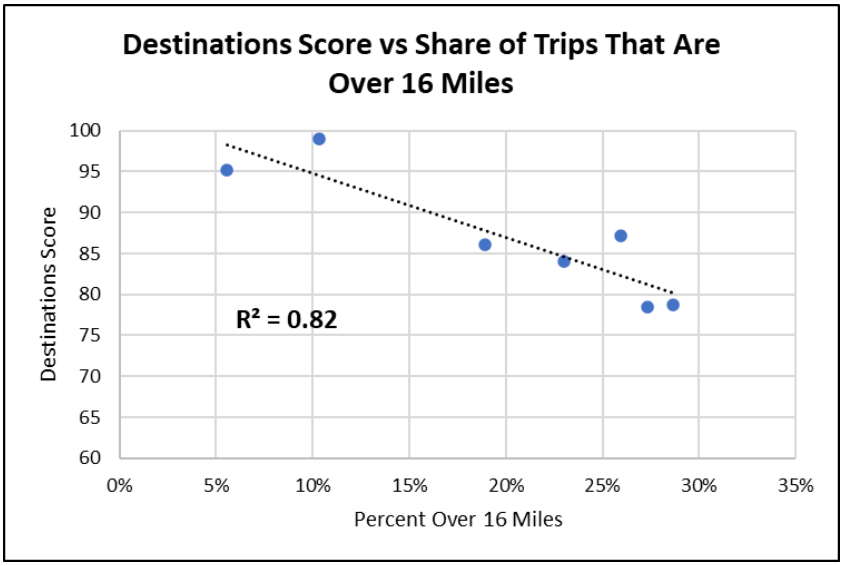
[10] The figures shown are for trips under Replica's Shop, Eat, and Other categories. This excludes trips in the Work, Social, School, Recreation, Errands, and Commercial (freight) categories.

2.2.4 Destinations

The Destinations score is a measure of how far a particular location is from the places that attract trips, such as offices, shopping areas, schools, airports, etc. While the Diversity scores are indicative of the likelihood of a person making short trips, Destinations measures the likelihood that they will make long trips. The underlying assumption is that people living in places with a high Destinations score will make long trips less frequently and so generate less VMT per capita.

Figure 5 graphs each city's Destinations score against the share of trips originating in that city that are over 16 miles long[11]. The data confirms the fact that the Destinations score is strongly indicative of the propensity to make long trips; i.e. the higher the score, the fewer long trips are made.

Figure 5: Destinations Score vs Share of Trips That Are Over 16 Miles



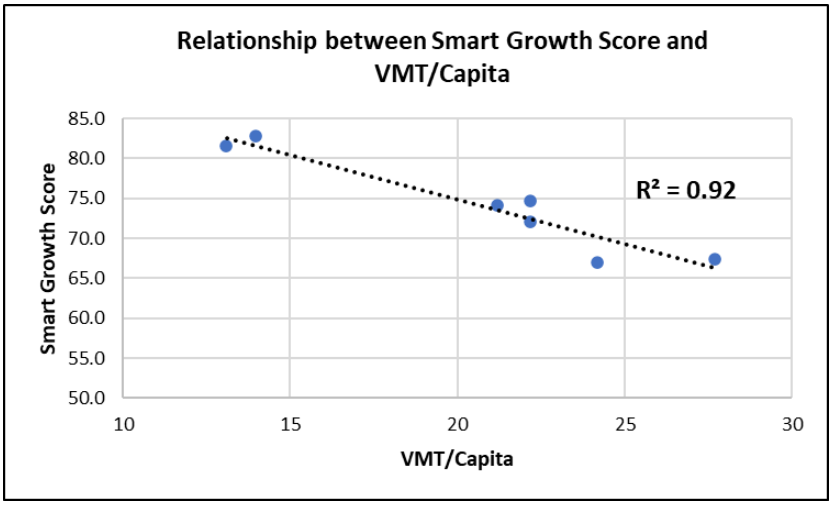
2.2.5 Overall Smart Growth Score

Once each of the testable components had been confirmed with independent substantial evidence, the final test was whether the aggregate score, which consists of a weighted combination of the individual scores, was in fact indicative of VMT per capita.

Figure 6 graphs the Smart Growth Score against the average VMT per capita for the seven six cities. As can be seen in the figure, the score bears a very strong relationship with VMT per capita.

[11] The 16-mile distance was chosen based on the distance intervals available in Replica's database.

Figure 6: Relationship between Smart Growth Score and VMT per Capita



2.2.6 Validation Conclusion

Our conclusion from the validation tests was that the methodology indeed captures important relationships between land uses and VMT per capita. Land use projects that increase an area's Smart Growth Score are likely to result in reductions in VMT.

2.3 Advantages of the Methodology

This methodology offers several practical advantages:

a) Ease of Use: It does not require expensive software or extensive training to use, as is the case with most traffic models. City staff can evaluate projects in-house using GIS and Excel.

b) Nuanced, Informative Results: Unlike other methodologies, whose output is a just a number saying the VMT is high or low, this methodology provides a clear indication of the underlying causes of high or low auto use. For example, at the project level it might show the analyst that a proposed housing project is in a location that lacks local shopping opportunities and might be improved with the addition of locally serving retail. At the general plan level, it might show that a city as a whole is tilted too far towards residential uses and that additional residential development would increase VMT/capita if not mitigated by contemporaneous local retail and non-retail developments. It would even tell the user which type of development would be more helpful in reducing VMT, retail or non-retail.

c) Appropriate Scale: While this methodology cannot substitute for a conventional traffic model for forecasting over large geographic areas (entire counties), it is likely to provide a more accurate representation of travel behavior in a small town than is possible with a conventional model. This is because traffic models incorporate certain necessary simplifications, such as centroid connectors and frictionless intersections, that are inconsequential when forecasting long trips but are highly distorting when forecasting trip-making over small areas. With a total area of just over 9 square miles of land area, the City of Arcata is the sort of compact, walkable city better suited to a proximity-based model than a trip-based model.

2.4 Limitations of the Methodology

As is the case with any tool, there are situations where the smart growth score is useful and other situations where it either cannot be used or where some other methodology might be better suited to the task. The main limitations to the tool are:

- It can only be used to analyze land development projects. Transportation projects require a different analytical methodology.
- It was designed for use in analyzing smaller jurisdictions that are not part of a large, contiguous urban area. In small, relatively isolated towns trips tend to be either long, to another jurisdiction, or short, within the jurisdiction. In such circumstances a focus on balancing land uses within the jurisdiction can reduce the longer trips by substituting local destinations in place of more distant ones. Moreover, the short distances within the jurisdiction create the potential for a significant percentage of trips to be made by non-auto modes. Conversely, a city that is part of a large contiguous urban area is likely to have a lot of medium-length trips that are not represented well in this tool. A conventional traffic model would work better in that case.
- The smart growth score is not suitable for places with substantial fixed-route transit use, because transit is not represented in the tool. Fixed route transit plays such a minor role in the transportation networks of most small jurisdictions in California[12] that its inclusion is not worth the additional complexity it would entail. The dial-a-ride services that are sometimes available are analogous to auto trips and so are already represented in the model.

[12] It does not show up at all in the Replica data for jurisdictions in Humboldt County.

3. Smart Growth Scores

The following sections discuss the components that make up the VMT Option 2 “Smart Growth Score” methodology proposed for SB 743 implementation in the City of Arcata. The estimated distribution of existing land uses, as well as the results for diversity, density, and destinations analyses of the existing condition are presented herein. Additionally, the overall scores are reported for the City of Arcata and Humboldt County as a whole. The city- and countywide scores support our recommended thresholds, which are discussed in a following section.

3.1.1 Land Use & Trip Estimates

Figure 7, Figure 8 and Figure 9, respectively, show the estimated distribution of households, retail jobs and non-retail jobs by source hexagon zone within the City of Arcata’s SOI. Figure 10 shows the distribution of total trips associated with this estimated distribution of land uses. While the general pattern of concentrated land use is seen through the center of the City, in the areas flanking US 101, at the northern end of the City and to the southeast of US101 / SR 255 (Samoa Blvd), there is some variation between the distribution of the three land use types considered herein.

3.1.2 Residential Land Use

The City’s residential land use is estimated based on the census block-level occupied housing unit count and group quarter population from the 2020 U.S. Decennial Census, which comprise what is categorized as households herein. As shown in Figure 7, the City’s residential land use is most concentrated through the center of the City, in the neighborhoods on either side of US 101, including Humboldt State University, within the California Heights, Sunset and Westwood neighborhoods, within some hexes at the northern end of the City in the Valley West and Vassaide neighborhoods and to the southeast of SR 255 (Samoa Blvd) / US 101 in the East Arcata neighborhood.

3.1.3 Employment

Employment within the City’s SOI is estimated using 2019 Longitudinal Employer-Household Dynamics (LEHD) employment by industry data. Retail/service employment is presented Figure 8 and non-retail/service employment is presented in Figure 9.

3.1.3.1 Retail/Service Jobs

As shown in Figure 8 the highest concentration of retail/service jobs is to the west of US 101 in the City’s Uniontown, Downtown Plaza Area, and Arcata Heights neighborhoods, and near the university. There are also a few pockets at the northern end of the City near the intersection of US 101 and SR 299, as well as to the southeast of SR 255 / US 101, where health services and some commercial development is located.

3.1.3.2 Non-Retail/Service Jobs

As seen in Figure 9, the largest concentration of non-retail/service jobs is at the university campus. There are also some hexes to the west/southwest of the university, as well as to the east of SR 255 / US 101 and at the northern end of the City where non-retail jobs are concentrated.

3.1.4 Total Trips

Figure 10 presents the distribution of total trip associated with each hex, which includes home-based work, non-home based and home-based other trips. Unsurprisingly, trips are concentrated in the same areas where residential and non-residential land use is concentrated. Most trips are associated with a cluster of 5 hexes at and near the university, as well as at the northern end of the City and to the east of Sr 255 / US 101.

3.1.5 Land Use Diversity

Figure 11, Figure 12, Figure 13 and Figure 14, respectively, show the jobs/housing, jobmix, retail/housing and overall diversity indices results, as well as trips by hex, associated with the areas within the City's SOI. As discussed in the methodology section of this memorandum, the jobs/housing, jobmix, and retail/housing diversity formulas produce scores for individual hexagons that range from -1 to 1, with a score of 0 indicating an ideal mix of land uses and scores of -1 and 1 indicating that only one of the land uses is present. The diversity score is calculated based on the sum of land uses within a given hex and its surrounding six hexes. The results computed for each of these indices in the City of Arcata are discussed in the sections below.

3.1.5.1 Jobs/Housing Diversity

The jobs/housing diversity index represents an individual's opportunity to walk to/from their place of employment from where they live based on the mix of residential and employment land use within a given hex zone and its surrounding zones. A score of -1 within this index represents an over-abundance of employment relative to housing (purple hues), while a score of 1 indicates an over-abundance of housing relative to employment (orange hues). A score of 0 indicates a perfect balance between jobs and housing (lightest hues on the purple to orange spectrum). The main map frame of Figure 11 shows the jobs/housing diversity calculated for the areas within the City's SOI, as well as the number of total trips associated with each hex. The map inset on the left side of the figure shows the jobs/housing diversity scores by hex across the County.

While some areas are shown as leaning toward too much employment or too much housing, it is important to also note the magnitude of trips coming from these areas, which is indicated by the presence and size of the circles within the hexagonal areas. For example, many hexes on the eastern and southern ends of the City's SOI lean toward more residential land use, but there are very few trips associated with these hexes. This means there is very little land use located in these areas and the impact on the City's total diversity is small or non-existent because the total diversity score is weighted by the number of trips associated with the area.

As shown in Figure 11, the areas closest to the university are relatively well balanced between jobs and housing with scores ranging from -0.30 to 0.30 and have the greatest number of trips. The areas to the west of US 101 through downtown Arcata also show a significant share of the City's trips but lean toward more jobs than housing. Building more housing in these areas would improve the jobs to housing land use mix and could reduce VMT/capita.

3.1.5.2 JobMix Diversity

The jobs mix diversity index represents the opportunity for interaction between retail and non-retail uses based on the mix of employment types within a given hex zone and its surrounding zones. A score of -1 (blue hues) within this index represents too much non-retail/service employment relative to retail uses, while a score of 1 (red hues) indicates too much retail/service employment, and a Null value indicates no employment. The main map frame of Figure 12 shows the jobs mix diversity calculated for the areas within the City's SOI, as well as the home-based work trips associated with each hex. The map inset to the left side of the figure shows the Jobmix scores by hex across the County.

As shown in Figure 12, throughout much of the City, retail and non-retail employment is in different areas (the red and blue hexagons). However, in the areas of the City where home-based work trips are the most concentrated, there is relative balance, especially in the hexes near the university (light colored hexagons).

3.1.5.3 Retail/Housing Diversity

The retail/housing diversity index represents an individual's opportunity to walk from their home to shopping trips based on the mix of residential and retail land use within a given hex zone and its surrounding zones. A score of -1 within this index represents too much retail relative to nearby housing, while a score of 1 indicates too much housing relative to opportunities to shop locally. The main map frame of Figure 13 shows the retail/housing diversity calculated for the areas within the City's SOI, as well as the number of total trips

associated with each hex. The map inset on the left side of the figure shows the retail/housing diversity scores by hex across the County.

As shown, the areas with the most trips are located through the center of the City. Similar to the jobs/housing diversity results, the areas to the west of US 101 near the City's downtown show a significant share of the City's trips but lean toward having more retail/service land use than housing. Again, building housing in these areas would improve the land use mix and could reduce VMT.

3.1.5.4 Overall Diversity Score

The total diversity index combines the three diversity indices scores and weights these scores based on the number of trips associated with the source hexagon. Weighting the total diversity score by trips negates the impact of areas with little land use and few or no trips on the overall diversity score. Figure 14 shows the total diversity calculated for the areas within the City's SOI, as well as the number of total trips associated with each hex.

3.1.6 Land Use Density

The density scores use a relative rather than absolute scoring system, calculating the residential and employment density within the source hex, and normalizing the score relative to the densities throughout the rest of the County. The residential density score is computed by dividing the number of households in each hexagon by the acreage of each hexagon, then normalizing the calculated score to a 0 to 100 scale, where the hexagon with the highest density score in the County receives a score of 100 and the lowest receives a score of 0. Similarly, the employment density score is computed by dividing the total number jobs in each hexagon by the acreage of the hexagon and normalizing the score to a 0 to 100 scale. The overall density score by jurisdiction is then also weighted by total trips.

Both the highest residential and the highest employment densities in the City of Arcata are located within hex zone 24354, which is the area at/near the university. Residential density in this location is about 10 households/acre, while the employment density is about 27.35 jobs/acre. Since the residential density in this hex is the highest in the County, the hex receives a score of 100. The employment density receives a score of 45.8 because it is normalized to the highest score in the County, which is 59.70 jobs/acre within a hex located in the City of Eureka.

The actual residential and employment densities for the City and County are shown in Figure 15 and Figure 16, respectively. The density scores for the whole jurisdiction, which is weighted by trips, is reported in a later section.

3.1.7 Proximity to Regional Destinations

Figure 17 presents the trip-weighted average destinations score by hex zone on a zero (worst) to 100 (best) scale. The main map frame shows the results for the City of Arcata, while the map inset on the left shows the results for the County. As shown, hexes in Arcata score high on its proximity to regional destinations because the city is a regional destination within Humboldt County. Although there is little variation in the destinations score within the City, there is a lot of variation in the County as a whole. The outlying communities that have a low destinations score would tend to have high VMT/capita.

3.1.8 Overall Smart Growth Score

Figure 18 presents the existing overall smart growth score by hex zone, with the main map frame showing the results for the City of Arcata and the map inset on the left side of the figure showing the countywide results. These results are also shown by jurisdiction in Table 1. As shown in Figure 18, most of the City of Arcata scores well when the different components that make up the smart growth score are considered together.

Table 1: Humboldt County Overall Smart Growth Scores by Jurisdiction – Existing Condition

Jurisdiction	Diversity Scores			Density Scores			
	Jobs/ Housing Diversity	JobMix Diversity	Retail/ Housing Diversity	Residential Density	Employment Density	Average Destinations	Total Weighted Score
City of Arcata	**58.3**	**77.4**	**53.5**	**37.5**	**13.1**	**95.1**	**81.5**
Blue Lake	51.9	71.5	33.2	10.2	5.4	87.2	72.0
Eureka	58.1	62.2	57.1	26.2	15.0	99.0	82.7
Ferndale	92.1	81.2	83.6	12.2	2.1	84.0	74.6
Fortuna	63.2	69.0	65.0	21.7	3.4	86.1	74.0
Rio Dell	45.6	77.5	48.4	17.6	0.9	78.5	67.4
Trinidad	60.7	70.1	72.8	6.0	4.0	78.8	67.0
Unincorporated County	47.6	45.0	39.5	9.4	1.2	70.4	58.7
Countywide Average	55.7	60.8	51.4	22.6	9.2	88.3	74.3

As shown in Table 1, the total weighted score for the City of Arcata is 81.5. Table 1 also shows the scores for the other incorporated jurisdictions in the County, the unincorporated areas and the countywide average. The other jurisdictions are included here to show how areas within the County compare against each other. Additionally, the countywide average is important to consider when deciding upon a baseline to compare impacts against and whether to use a local or regional threshold, which is discussed in the following section.

3.2 Thresholds of Significance

CEQA analyses performed under SB-743 require the use of thresholds, as was the case for the LOS-based analyses they replaced. These thresholds may be adopted for general use or may be chosen ad hoc for use on individual projects. We recommend that the City establish three types of thresholds, namely:

1) **Thresholds for Screening by Size:** CEQA offers categorical exemptions for very small projects from having to do EIRs, both because of the negligible impact they are likely to have on the environment and because the expense of performing an EIR might make small projects unviable. We recommend that the City use the Class 1, for small expansions of existing uses, and Class 3, for new small projects, exactly as they are written in CEQA Guidelines §15301 and §15303, respectiively. Some jurisdictions are experimenting with converting the thresholds in the CEQA Guidelines, which are measured in square feet, into some sort of equivalent in vehicle trips per day. We do not recommend this approach, because it involves a series of assumptions that may prove difficult to defend[13], and in any case offers no significant advantages for the City of Arcata over the sections as written.

2) **Thresholds for Land Development Projects:** The methodology described in this memo is intended for use in analyzing land use projects. As with other aspects of SB-743, there is considerable uncertainty regarding how the thresholds should be set. OPR's Technical Advisory suggested using a threshold requiring a 15% reduction in VMT over existing conditions. The 15% number originated in CARB's *California's 2017 Climate Change Scoping Plan*, where it was computed as the average reduction state-wide that would be needed to achieve the State's GHG reduction goals. However, this state-wide average may not be appropriate for all jurisdictions, and CARB has more recently set higher targets in some MPO areas and lower targets in others. For example, CARB's latest plan calls for a 19% reduction in VMT for the state's four largest MPOs[14] down to less than 10% for some of the smaller MPOs. The City of Arcata is not in an MPO region, and thus is not included in CARB's target-setting. For that reason, we suggest using the targets for Shasta RTA, as it is both the geographically closest MPO and demographically most similar MPO to the City of Arcata. CARB set the target for Shasta RTA at a 4% reduction in average per-capita VMT.

3) **Thresholds for Transportation Projects:** As stated earlier, it is the intent of SB-743 that lead agencies use criteria that "... *shall promote the reduction of greenhouse gas emissions, the development of multimodal transportation networks, and a diversity of land uses*." (PRC §21099(b)(1)). We recommend setting a threshold that explicitly focuses on balancing transportation modes within the city. An example would be:

   > *"A project's impacts shall be deemed significant if it results in a percentage increase in road capacity higher than the percentage increase in bicycle or multi-use capacity."*

   Note that this threshold would make all active transportation projects presumptively less-than-significant. It would not preclude the City from undertaking road expansion projects, but it would mean that such projects would need to include expansion of the bicycle facility system as well. As written, it would require a 1%-to-1% expansion of the two systems, but it could easily be tweaked to require a 1%-to-2% or 3% expansion of bike facilities to help that system catch up with the facilities offered to cars.

The countywide score is computed in the same fashion as described above and is calculated at 74.3 (see Table 1). Based on the 4% threshold referenced above, an impact threshold could be established that aims to achieve a total smart growth score for the City that is at least four percent higher than existing regional averages for Humboldt County. The method for determining the percentage difference between a city's score and the County average is shown in Table 2. As can be seen in the table, the City of Arcata's overall score of 81.5 means that it is 18.5 points away from the ideal score. Since the countywide average score is 74.3, or 25.7 points from perfect, Arcata's score is 28% better than the countywide average.

[13] Among other things, a threshold based solely on the number of trips generate would be vulnerable to challenge for not taking trip length into account.
[14] SCAG, MTC, SANDAG, and SACOG

Table 2: Comparing Smart Growth Scores to Countywide Average Score

Jurisdictions	Total Weighted Score	Deviation from Ideal	% Better or Worse than Countywide Average
	(A)	(B)=100-(A)	(C)=1-[(B)/(Average B)]
Arcata	81.5	18.5	28%
Blue Lake	72.0	28.0	-9%
Eureka	82.7	17.3	33%
Ferndale	74.6	25.4	1%
Fortuna	74.0	26.0	-1%
Rio Dell	67.4	32.6	-27%
Trinidad	67.0	33.0	-28%
Unincorporated County	58.7	41.3	-61%
Countywide Average	**74.3**	**25.7**	**0%**
4% better than countywide average >	75.4	24.6	4%

Using the land use diversity methodology described above, impacts associated with a city buildout scenario could be determined to be less than significant if the future citywide smart growth score performs at least 4% better than the existing countywide condition, meaning a future citywide score higher than 75.4 would be less than significant, while a lower score would indicate a significant impact. Note that Arcata's and Eureka's overall smart growth scores are currently so much better than the countywide average that the more of the County's residential and employment growth that gets channeled into these cities the better, from a VMT reduction standpoint.

4. Test Application

4.1.1 Future Scenario

A future scenario for City of Arcata land use mix was analyzed based on the future land use prepared for the City of Arcata General Plan Update. The future scenario at the hexagon-level is developed based on the 2045 Model Year of the Humboldt County Regional Travel Demand Model, which is at the TAZ-level. The land use at the TAZ-level is distributed to the parcel-level based on the in-fill opportunity zones and development sites identified by the city, as well as land use, undeveloped parcels and vacancy status from the parcel database. These estimates are then aggregated to the hexagon-level based on the hexagon that is associated with a given parcel's centroid.

The smart growth scores shown previously in Table 1 for the existing condition are shown in Table 3 for the future scenario analyzed herein. As shown, the overall score improves from 81.5 to 83.9. Using the threshold of significance described previously, the transportation impacts of the future scenario would be less than significant.

Table 3: Humboldt County Overall Smart Growth Scores by Jurisdiction – Future Scenario

Jurisdiction	Diversity Scores			Density Scores		Average Destinations	Total Weighted Score
	Jobs/ Housing Diversity	JobMix Diversity	Retail/ Housing Diversity	Residential Density	Employment Density		
City of Arcata	**64.0**	**72.7**	**57.0**	**66.2**	**16.0**	**95.2**	**83.9**
Blue Lake	51.9	71.5	33.2	10.2	5.4	87.2	72.0
Eureka	58.1	62.2	57.1	26.2	15.0	99.0	82.7
Ferndale	92.1	81.2	83.6	12.2	2.1	84.0	74.6
Fortuna	63.2	69.0	65.0	21.7	3.4	86.1	74.0
Rio Dell	45.6	77.5	48.4	17.6	0.9	78.5	67.4
Trinidad	60.7	70.1	72.8	6.0	4.0	78.8	67.0
Unincorporated County	47.6	45.0	39.5	9.4	1.2	70.4	58.7
Countywide Average	57.2	60.9	52.4	30.5	10.2	88.7	75.3

4.1.2 Individual Projects

Using this methodology for an individual land use project would be similar to using it for evaluating a General Plan buildout scenario. In the case of evaluating individual projects, a score could be computed for the entire city, or a score could be computed only for the hex(es) where the proposed project will be constructed. The former score will reflect the impact of the proposed project's interactions with all the other land uses[15] within typical walking distances for the city as a whole, while the latter will reflect the same only for the hex within which the proposed project is located. The idea is to see whether the project moves the city or neighborhood it is in towards the "Goldilocks" spot where the three main types of land uses are in perfect balance.

[15] This should include both existing and already-approved land uses
