Class Description

HVAC expert Dick Rome will provide an overview that will address ductless mini-split heat pump systems. Topics include basic configurations and operation, possibilities for high efficiency heating and cooling, possible applications in California housing and current barriers to their use, and the role of mini splits in our energy future.

This is a basic course for residential and small commercial builders and developers, general contractors, architects and designers, HVAC technicians and installers, HVAC mechanical engineers, HERS raters, and home inspectors.

Agenda

- Introductions and Safety Announcements
- Mini Split Basic Operation and Configurations
- Opportunities for Mini Splits in California Housing
- Overcoming Current Barriers to Mini Split Acceptance
- Future Role of Mini Splits in Our Energy Future
- Wrap-up and Q&A

About the Instructor ***Dick Rome—PG&E Energy Training Center***

HVAC expert Dick Rome has over 23 years experience in the HVAC industry. He holds a BA in Vocational Technician Education from Pittsburg State University. He has owned two HVAC companies in the Kansas City area.

A joint project of Pacific Gas and Electric Company (PG&E), the Redwood Coast Energy Authority.

PG&E Pacific Gas and Electric Company®

REDWOOD COAST EnergyAuthority

This program is funded by California utility customers and administered by PG&E under the auspices of the California Public Utilities Commission.
