

Dana Quillman

Think globally, act locally! In 2020 I realized that Covid-19 was purposely engineered and released to do all the destruction it has done to most people, in one way or another. Being well informed of the global plans being made for the world, I have done my due diligence in sharing information purposely kept from the public by powerful entities. Censorship has become the norm, sadly, even here in Humboldt County.

The public has been misled into giving up their basic freedoms by a sophisticated fear campaign for an illness with a 99% survival rate. It is a fact that inexpensive, safe, and effective early treatments were available early on and then were quickly vilified and purposely made unavailable to justify coercing every person to take an experimental gene-therapy injection (with no liability for the very many injuries and deaths). Many injection recipients are then infected, often spread the illness, and encouraged to get more injections which creates new variants, bankrupting the resources of the masses, while enriching the guilty few.

I promise to always do everything in my power to help thwart the global digital ID surveillance prison, which is the ultimate goal of the Covid-19 "Trojan Horse".
