

# City Council Update on Climate Adaptation and Energy Projects

City Council Priority Project 9c. FY2025-26: Develop a climate resiliency pipeline of projects to cohesively synthesize citywide effort and leverage potential funding sources

May 2025

# Intended Outcomes

Provide context and purpose  
of developing a Climate  
Resiliency Pipeline

Share the draft Climate  
Resiliency Pipeline that  
cohesively demonstrates how  
the City is helping to build a  
resilient community in the  
face of climate change

Seek feedback from Council

# Currently...

- ▶ Credit where credit is due: the City is doing a lot to prepare for our future needs

## But!

- ▶ We aren't always great at telling our story
- ▶ We can be “wonky”
- ▶ Sometimes, we operate in silos

# What is this “Climate Resiliency Pipeline” and why?

## ► What: Climate Resiliency Pipeline -

- Set of projects, plans, and programs that cohesively demonstrates how the City is helping to build a resilient community in the face of climate change
- Is relatable
- Is impactful

## ► Why:

- Identifies opportunities and gaps
- Tool for prioritization
- Helps gauge if our efforts will “meet the mark”
- Resource to leverage impact and partnerships
- RESOURCES FOLLOW COHESION!

### A ROBUST PIPELINE IS

#### 1. Sufficient

Together, the deals and projects in the pipeline meaningfully move the community toward the shared priority.

#### 2. Efficient

The deals in the pipeline are doable, that is, they can realistically be completed in a reasonable time frame with a reasonable amount of effort

#### 3. Impactful

Completing the deals and projects in the pipeline will make a significant difference for the community.

# What could a resilient future look like?

*Consider this imaginary  
example...*

# Arcata Climate Resiliency Pipeline

Ensures that Arcata can absorb climate shocks while preserving a healthy quality of life

Quality of Life Goal	Description and Aligned Project Types	Current and Recently Completed Projects, Plans, Programs (Recently Completed, Current)	Planned/Upcoming Projects, Plans, Programs
<b>The community and its assets are protected from local climate risks, while public access and open space is preserved</b>	<p><i>Safeguard people and communities from climate pressures through protection from and prevention of risk.</i></p> <p><i>Examples include: flood protection, stormwater management, access to clean water and sanitation, open space multi-benefit projects</i></p>	<ol style="list-style-type: none"><li>1. Arcata Wastewater Treatment Facility Coastal Hazards Adaptation and Implementation Plan</li><li>2. Arcata Wastewater Treatment Facility Levee Project</li><li>3. Arcata Local Coastal Plan Update</li><li>4. Arcata Sea level Rise Vulnerability Assessment and Capital Improvement Project (CIP) Adaptation Plan</li><li>5. Jacoby Creek Watershed-level and Sea Level Rise Adaptation Planning</li><li>6. Continued replacement and rehabilitation of old City water and sewer infrastructures</li></ol>	<ol style="list-style-type: none"><li>1. Strategic property acquisition for sea level rise adaptation</li><li>2. Janes Creek and Jolly Giant Creek Restoration and Stormwater Management Projects</li></ol>

# Arcata Climate Resiliency Pipeline

Ensures that Arcata can absorb climate shocks while preserving a healthy quality of life

Quality of Life Goal	Description and Aligned Project Types	Current and Recently Completed Projects, Plans, Programs (Recently Completed, Current)	Planned/Upcoming Projects, Plans, Programs
<b>The community is readily able to prepare for, respond to, and recover from natural disasters</b>	<p><i>Prepare communities to respond to, and recover from climate-related disasters with equity and care.</i></p> <p><i>Examples Include: community resilience hubs, neighborhood mobilization, hazard planning</i></p>	<ol style="list-style-type: none"><li>1. Arcata Community Center designated as an evacuation center and Red Cross location</li><li>2. 2022 Community Emergency Response Team training provided for all City staff</li><li>3. Tank 1C Water Storage Project</li><li>4. Update the Local Hazard Mitigation Plan in partnership with the County Office of Emergency Services</li><li>5. Keep the City of Arcata Emergency Operations Plan up to date</li></ol>	<ol style="list-style-type: none"><li>1. Tsunami evacuation community outreach</li><li>2. Tabletop exercises for disaster preparedness</li><li>3. Develop the Valley West Community Center</li><li>4. Prepare and implement City Specific Emergency Response Safety Assessment program</li><li>5. Mitigate for impacts of fire-related air quality hazards</li></ol>

# Arcata Climate Resiliency Pipeline

Ensures that Arcata can absorb climate shocks while preserving a healthy quality of life

Quality of Life Goal	Description and Aligned Project Types	Current and Recently Completed Projects, Plans, Programs (Recently Completed, Current)	Planned/Upcoming Projects, Plans, Programs
<b>The community has access to local, reliable, low- or no-carbon energy</b>	<p><i>Develop energy-resilient infrastructure, reduce greenhouse gas emissions from entering the atmosphere to minimize Arcata's impact on global climate change, and protect indoor and outdoor air quality</i></p> <p><i>Examples include: building electrification, rooftop solar, battery back-up</i></p>	<ol style="list-style-type: none"><li>1. City facilities enrolled in Repower+ for all electric accounts</li><li>2. Arcata Community Center Battery Energy Storage System</li><li>3. Arcata Community Center Rooftop Solar</li><li>4. City Hall Battery Energy Storage System</li><li>5. Secure cost-effective organics recycling franchise agreement and rates</li></ol>	<p><u>Climate Action Plan Implementation:</u></p> <ol style="list-style-type: none"><li>1. Support development of Regional Climate Committee</li><li>2. Reduce existing residential building natural gas consumption by 4% by 2030</li><li>3. Reduce existing non-residential building and natural gas consumption by 5% by 2030</li><li>4. Decarbonize 95% of new residential building construction by 2027</li><li>5. Decarbonize 95% of new nonresidential building construction by 2027</li><li>6. Electrify or otherwise decarbonize 12% of small off-road engines/equipment by 2030</li><li>7. Electrify or otherwise decarbonize 50% municipal fleet by 2030</li><li>8. Develop City-wide facility decarb plan and decarbonize 30% of facilities by 2030</li></ol>

# Arcata Climate Resiliency Pipeline

Ensures that Arcata can absorb climate shocks while preserving a healthy quality of life

Quality of Life Goal	Description and Aligned Project Types	Current and Recently Completed Projects, Plans, Programs (Recently Completed, Current)	Planned/Upcoming Projects, Plans, Programs
As we transition to a resilient community, affordability is at the forefront	<p><i>Reduce energy, utility, and transportation costs to ease climate-related financial burdens. Connect to opportunities for jobs and revenue generating opportunities for community groups.</i></p> <p><i>Examples include: energy efficiency, rooftop solar, electric vehicles, power purchase agreements, 'green' workforce development</i></p>	<ol style="list-style-type: none"> <li>1. Support Humboldt Waste Management Authority in development of in-County organics processing facility</li> <li>2. Complete Zoning Code updates consistent with 2045 General Plan and Gateway Area Plan</li> <li>3. LED retrofits in City facilities</li> <li>4. Steel waterline replacement project</li> <li>5. Implement Countywide Edible Food Recovery Program</li> <li>6. Bayside Park Farm – incubator for agricultural producers and community supported ag</li> </ol>	<ol style="list-style-type: none"> <li>1. Develop building electrification incentives (fund to support residential decarbonization)</li> <li>2. Implement replacement of water meters throughout the City with remote-read smart meters</li> <li>3. Support RCEA in implementation of Northern Rural Energy Network programs</li> <li>4. Support RCEA in workforce development programs</li> </ol> <p><u>Climate Action Plan Implementation:</u></p> <ol style="list-style-type: none"> <li>1. Support ZEV car share companies coming to the region to develop an accessible ZEV network</li> <li>2. Reduce per capita potable water consumption by 15% by 2030</li> <li>3. Partner with RCEA to provide EV monthly bill discount program and explore methods for charging different rates for different user groups</li> </ol>

# Arcata Climate Resiliency Pipeline

Ensures that Arcata can absorb climate shocks while preserving a healthy quality of life

Quality of Life Goal	Description and Aligned Project Types	Current and Recently Completed Projects, Plans, Programs (Recently Completed, Current)	Planned/Upcoming Projects, Plans, Programs
Every community member has access to open space and a variety of low- or no-carbon transportation options	<p><i>Ensure access to community-level resources.</i></p> <p><i>Examples Include: public transit, active transportation, EV charging infrastructure, community gardens, farms, parks, trails</i></p>	<ol style="list-style-type: none"><li>1. Arcata EV Charging Stations located at Arcata Community Center, Carlson Park, and F Street</li><li>2. E-bike vouchers for Arcata Residents in partnership with Redwood Coast Energy Authority</li><li>3. Arcata Community Forest Voluntary Carbon Offset Program</li><li>4. Implement and maintain active transportation Infostructure projects such as – Humboldt Bay Trail North, Arcata Rail with Trail Connectivity Project, Arcata Annie and Mary Trail, Bicycle Blvds, Safe Routes to School projects, Complete Street Projects.</li><li>5. Complete South Arcata Multi-Modal Safety Improvements Plan</li><li>6. Isaackson Phase II sidewalk project</li><li>7. Partner with Humboldt Transit Authority to improve ridership and routes supporting a regional transit network</li><li>8. Implement Local Road Safety Plan to improve bicycle and pedestrian infrastructure in the City</li></ol>	<ol style="list-style-type: none"><li>1. Advance the Reconnect Arcata Project</li><li>2. Continue to plan for annual sidewalk improvement projects</li></ol> <p><u>Climate Action Plan Implementation</u></p> <ol style="list-style-type: none"><li>1. Implement programs to increase the active transportation mode share from 9% to 12% by 2030</li><li>2. Expand public transit network to increase public transit mode share from 2% to 20% by 2030</li><li>3. Develop Transportation Demand Management Plan for City Employees</li></ol>

# Questions for consideration...

- ▶ How could this be useful to Council?
- ▶ How might we share and co-create our vision with the community?
- ▶ Is there interest in developing a longer time horizon (say, 2050)?
- ▶ How might we reflect partnerships and more regional efforts?
- ▶ Do these categories make sense?
- ▶ In your perspective, how will we know if we have “met the mark”?
- ▶ What could accountability to our community look like?
- ▶ Does this overall strategy resonate?

Thank you!
